

# Councillors group attacks Steel over his management of party

By Stephen Goodwin

The Association of Liberal Councillors yesterday criticized as "profoundly undemocratic" the way in which Mr David Steel managed the party in the run-up to the general election in June.

In particular it cites the drawing up of the Social Democratic Party-liberal Alliance manifesto and choosing Roy Jenkins as Prime Minister-designate.

The attack comes at a sensitive time for the Liberal leader. Last week *The Times* reported that Mr Steel was expected to resign the leadership at next month's assembly at Harrogate takes away his right of veto over the election manifesto.

In a strongly worded submission prepared for the assembly the association also accuses the liberal leadership of a lack of commitment to the strategy laid down by earlier assemblies.

"Many campaigning local Liberals have felt a clear difference between their own work and that of the national party during the past 13 years," the association says.

The association, with more than 2,000 members, claims Liberal successes at seats such as Yeovil, Gordon, Leeds West, and Southwark, Bermondsey are the result of the same

"campaigning approach" which has earned the party a substantial power base in cities and metropolitan areas.

Mr Trevor Jones, of Dorchester, the association chairman, says: "There is a real danger that the Liberal Party will spend too much time on internal navel-gazing and nipping of its constitution."

He wants the assembly to come out with a renewed commitment to the creation of a campaigning party.

"It is time for the national institutions of the party, and its leaders both inside and outside Parliament, to understand that it is their job to provide the campaigning leadership and commitment which is needed," Mr Jones says.

In a rebuff for Mr Steel, the association expresses dissatisfaction about the Alliance which, it says, cannot continue in its present form.

"We are unhappy about the failure to put forward a clear programme of radical reform at the election. But the concern is with the effect of the Alliance on the mechanics of decision-making, and the presentation, as well as with the content," the association says.

"The way in which the joint programme and Prime Minister designate were determined was profoundly undemocratic. The

way in which the Alliance has operated on the ground has resulted in a lot of wasted time and energies, and in some cases reduced our effectiveness and public impact.

"We must not approach another general election with similar mistakes or with another arbitrary seats allocation process."

The association maintains that the continued existence of two separate Alliance parties cannot be sustained in the long run. It calls for a democratization of the structures of the Alliance at a national level and encouragement of integration at a local level.

The association intends to ask its own members to support a programme that will promote joint Liberal/SDP council groups and allow associate membership of the association for SDP members. It also supports the principle of joint selection of candidates for European Parliament elections.

The document adds that it is important that moves towards what it describes as an "organic merger" should be optional. "Integration should be encouraged where Liberals and Social Democrats want it."

Mr Steel's high standing with the electorate is the subject of an indirect warning by the association.

# TUC affiliation fees to increase by 26%

By Paul Routledge, Labour Editor

The TUC is increasing its affiliation fees by 26 per cent in order to stave off a deficit of £300,000 this year and mounting financial problems thereafter. Delegates to next month's Trades Union Congress in Blackpool will be asked to approve a two-stage rise in per capita payments from the existing level of 47.5p to 60p a year. Even this will mean a reduction in the labour movement's reserves.

Details of the TUC's financial position were published for the first time yesterday, and they disclose a gloomy picture of falling membership, rising expenditure and a tight squeeze on services to members.

The TUC general council's report to Congress states that if membership affiliation fees do not rise, there would be a net deficit this year of £300,000, bringing the movement's administration fund down to about £800,000.

Expenditure in 1983 is expected to be £5,150,000, a record, as the trade union centre spends more on its organisation in the regions and implements projects under its development programme. In an effort to contain costs, the TUC is

examining the contribution that micro-technology can offer. The general council is proposing that per capita affiliation fees should rise by 7 1/2p from January 1, 1984 and by a further 5p from January 1985. But the new subscription of 60p a head - 50 per cent up from January 1982 - is still not enough to halt the slide.

If the objective was to restore TUC funds to the level of last year, then it would be necessary to impose an increase of twice the proposed level next January, the report adds. This was rejected "to avoid undue financial pressure on the unions".

As it stands, the financial package will provide the TUC with an estimated extra income of £750,000 next year, leaving reserves of £400,000 at the end of 1984 and avoiding the prospect of a 1985 deficit.

The report also discloses that membership has fallen so fast that the TUC was obliged to repay to unions £285,000 "overpaid" in the wake of optimistic affiliation levels in 1981, and expects to make further repayments of the same kind when the 1982 affiliation figures are corrected.

# Conviction for 'wrong man' threat

James Burns spent months building up dossiers on the family of the man he believed was his wife's lover. Wood Green Crown Court in north London was told yesterday.

He then harassed the family with hundreds of telephone calls and threatened to murder the man, Mr Michael O'Connor, aged 29. But Burns, father of five, had chosen the wrong man, Mr Charles Byers, for the prosecution, told the court.

It was a friend of Mr O'Connor who was having an affair with Burns's wife. Mr Byers said the dossier compiled by Burns even included copies of birth certificates relating to the O'Connor family.

Burns, aged 55, unemployed, of Percy Road, Isleworth, west London, received an eight-month prison sentence suspended for two years after a jury found him guilty of three charges of making threats to murder. The Recorder, Lord Elystan-Morgan, said Burns had conducted a "well planned and carefully executed campaign to wage fear and terror" against the O'Connor family, of Tottenham, north London.

But the judge accepted that Burns had been distraught when his wife walked out on him.

# Greenham Common women's visit to Russia seeks to 'end paranoia'

By Nicholas Timmins

Thirty women, including founders of the Greenham Common peace camp, are to visit Moscow next month for a 17-day visit to the Soviet Union.

More than £12,000 has been raised by Women for Life on Earth to make the trip possible and Mrs Karman Cutler, one of the organizers, said yesterday that they had now received confirmation from the official Soviet peace and women's committees that they were expected.

The visit comes after a trip to

Moscow in May by Mrs Cutler and Ms Ann Pettit, two of the organizers of the original march to Greenham Common. When they met official and unofficial peace groups in Moscow and arranged the second larger visit.

Mrs Cutler said the women would divide into four groups and visit various parts of the Soviet Union, including parts of Georgia and Lithuania, as well as Leningrad.

Visits had been arranged, through the Soviet women's committee, to hospitals and training colleges. However,

plenty of time had been left to allow the women to meet whomever they liked, Mrs Cutler added.

The aim of the visit, she said, was "human contact", to try and overcome the paranoia on both sides "and that starts with personal contact".

"There are all these fears on both sides. In this country there is fear of the Russians and Soviet society and they see us as the aggressive countries of Nato. We want to start at the bottom and get rid of some of these fears by talking."

Under wraps: The 320ft clock tower at the Palace of Westminster, which houses Big Ben, is taking on the appearance of a giant Meccano kit as renovation work continues inside a cobweb of scaffolding and sheeting. One of the clock faces is virtually obliterated. The work is the most visible stage of a six-year programme of restoration on the Victorian buildings. (Photograph: Brian Harris).

# TUC chiefs approve launch of newspaper

By Paul Routledge, Labour Editor

Trade union leaders decided yesterday by a one-vote margin to go ahead with plans to raise £6.7m to launch a new daily newspaper of the left.

The TUC's "inner cabinet", the finance and general purposes committee, voted by 6 to 5 in favour of setting up a top-level committee of union leaders charged with the daunting task of finding the launch capital to challenge the current range of Fleet Street titles with a successor to the long-defunct *Daily Herald*.

The full TUC general council will be recommended tomorrow to put the plan to next month's Trades Union Congress in Blackpool.

The split yesterday was on familiar political lines, with left-wingers predominating in the majority wishing to start up a new paper to replace the values of the trade union movement. Moderate union leaders argued that with membership falling and costs rising, they could not afford to invest heavily in such an initiative.

A £28,000 TUC feasibility study carried out by the opposition peer Lord McCarthy has suggested that the labour daily could make a profit if it was contract printed outside Fleet Street and had a minimum of journalists. With a circulation of more than 300,000, it could break even.

If next month's Congress approves the fund-raising scheme, union leaders will be asking more than 100 TUC affiliates for cash to get the paper on to the streets for two years. Capital might come from union funds or from loans guaranteed by the unions' still-considerable revenue from subscriptions.

# Children in care get grant to fight cases

By Our Social Services Correspondent

Thousands of young people who are living in care will be encouraged to set up local groups to fight for better conditions in children's homes as a result of a government grant of £100,000 over the next three years.

The grant is being paid by the Department of Health and Social Security to the National Association of Young People in Care after meetings in which the organization was questioned about its future.

The money will allow the association to employ three permanent staff, all of whom will be young people who have lived "in care", and to open offices in London and Bradford. The organization has given evidence to the Commons Select Committee on Social Services inquiry into children in care. It regards the grant as official recognition of its value as an outlet for young people who feel inhibited from complaining through child care and social work channels.

Mr Leon Parker, aged 24, the full-time development officer of the association, said yesterday that the priorities would be to expand the number of local

groups of young people in care and to get the organization's quarterly newsletter into community homes.

About 15 local groups meet regularly to discuss issues such as the involvement of young people in care in the statutory six-monthly reviews on their future, complaints about the regime in children's homes, arrangements for when they leave care, and their access to files about them. Of the 230 members of the association,

A study carried out for the association by Mr Michael Stein, lecturer in applied social studies at Leeds University, and Mr Shane Ellis, Bradford development officer of the organization, found that for most children in care reviews are a lottery.

Few are allowed to attend the entire review hearing. Those who do find themselves faced with adults they have never met who discuss their future "in incomprehensible language". Mr Parker said that "once children in care reached the age of 12 or 13 they should have the right to attend their own review hearings, accompanied by another young person if they wished."

# Warning of revolt over plan to cut benefits

A former Conservative minister gave a warning yesterday of a possible backbench revolt against Treasury proposals to save £100m by cutting housing and rental allowances paid to unemployed teenagers (Anthony Bevins writes).

Mr James Lester, MP for Broxtowe, said on the BBC radio *Today* programme that he had found no lack of incentive on the part of young people to find work. He said: "I personally have not felt that incentive effect is needed in the majority of children." He added that the plan could therefore harm the

majority for the fulfil of a tiny minority. Mr Lester, a former Under-Secretary for Employment, was asked whether he thought there could be a Commons revolt if ministers pushed ahead with the proposal.

He said: "Yes, I would have thought that there is a great deal of feeling in the Conservative Party, on the backbenches and indeed among ministers, that you cannot take it out on the unemployed and you cannot take it out on the most vulnerable people in our society."

# Soldier kept secret papers in caravan

Warrant Officer Euan Dear, who took home 74 classified documents and stored them in a caravan, pleaded guilty to two charges under the Official Secrets Act yesterday.

Ten of the documents were secret, 23 confidential, and the rest restricted. Lieutenant-Colonel John Mitchell, for the prosecution, told a court martial at Balford Camp, Wiltshire.

The papers related to Warrant Officer Dear's work as acting chief clerk of the Royal Electrical and Mechanical Engineers at the Army Air Centre, Middle Wallop, Hampshire. Warrant Officer Dear, aged 41, who had served in Borneo, Malaya and Yemen took them back to his married quarters in Andover, Hampshire, before he went on leave, Lieutenant-Colonel Mitchell said.

He was sentenced to be dismissed from the service, imprisoned for six months, and reduced to the ranks. Findings and sentence are subject to confirmation.

# Anglo-US steel link plan 'dead'

Mr Ian MacGregor's plan to export semi-finished steel from the Ravenscrag plant in Motherwell to the Fairless works in Pennsylvania is dead, a Scottish Labour MP said yesterday.

Dr Jeremy Bray, MP for Motherwell, South, also called on Mr Cecil Parkinson, Secretary of State for Trade and Industry, to consult US Government officials in an attempt to terminate the British Steel Corporation chairman's scheme.

Two weeks ago Mr MacGregor said his plan was all but ready. Dr Bray said the plan was the "hottest talking point in US industry" and he was putting pressure on the Government to introduce measures protecting the industry against imports.

He said: "I firmly believe the deal is dead, but it is time for the British Government to step in to prevent further damage being done by continuing talks."

Union leaders at Ravenscrag and Fairless fear the deal would mean the loss of about 2,000 jobs in each plant.

Dr Bray said US Steel, which owns Fairless, is already cooperating with the unions to consider alternative futures for the Pennsylvania works.

Some of the 2,000 workers dismissed by Highland Fabricators last week have been invited to reapply for their jobs at the company's oil platform yard at Nigg on the Moray Firth.

Overseas selling prices for steel are high and the industry is facing a difficult time.

# Record number of Scouts to go abroad to help Third World

By David Nicholson-Lord

A record number of Scouts are expected to take part in overseas activities ranging from expeditions and outdoor sports to community work in developing countries this year, according to the Scout Association.

More than 16,000 members, including an increasing number of girls, will have gone abroad by the end of September. Many of these will be in the 16 to 20 age range of the Venture Scouts, the fastest growing area of Scout membership.

In contrast with the recent decline of scouting membership in Britain, Venture Scouting has increased from a membership of 30,000 in 1979 to more than 36,000 this year. It is the only area of scouting where girls are allowed: they now make up

about 20 per cent of overall numbers.

The record numbers of all age groups going abroad is put down by the association partly to the lack of challenge in Britain. "Places to camp in this country that can offer the right sort of challenge are becoming less available", Mr Jack Olden, an association official, said yesterday.

Venture scouting was popular because it was organized on democratic and cooperative lines, with maximum participation in planning projects. Parties of Venture Scouts, including a group from Berkshire, will next year be travelling to villages in Kenya and Sri Lanka to install piped water supplies as part of the United

Nations "water decade" campaign. A group from Rotherham, South Yorkshire, last year piped water two miles to Balam, a village in the Himalayan foothills of Nepal, after raising £30,000.

Another group, from Ilford, Essex, built an adventure playground for handicapped children at a Salvation Army centre in Begoro, eastern Ghana.

Those returning from expeditions overseas, Mr Olden added, displayed a radical change in attitude. "They appreciate their home and their parents more. They appreciate all those facilities in their own home they have always taken for granted."

# Health service and the cuts: 2 Managers refuse to suggest victims

By Pat Healy, Social Services Correspondent

The seven people who manage hospital services in the Bristol and Weston district health authority have declined to come up with any suggestions as to how they can meet their share of the £788,000 cash cut imposed in the Chancellor's spending cuts announced in July.

To meet cuts of that order, on top of the efficiency savings already imposed, would mean cutting major services, the unit managers say. If that is the case, it is up to the district health authority (DHA) to decide as a matter of policy which major services they want to go.

The district management team met abortively on Wednesday to try to identify where major services could be cut. Mr Vincent Harrall, the district administrator, says that the fact has already been cut and now they are being asked to cut into the bone.

"It is like trying to walk up an escalator that is going down", he said. "People used to be proud to work in the health service. Now they feel embattled and wonder where the next cut is coming."

Before the July cuts, and before the manpower targets for this year were communicated at the end of the month, the district had already cut jobs by 114, reduced working hours and closed several wards.

Three wards are closed at the Winford orthopaedic hospital, which serves the whole of Avon county; one ward at the

Children's Hospital, 40 per cent of whose patients come from outside the district's boundaries. Another four wards have been closed at the Royal Infirmary, three of them surgical.

Local people are still bitter that the Wendover Maternity Hospital has closed. Mothers now have to travel up to 15 miles to the Bristol Maternity Hospital to have their babies in the high-tech atmosphere common to many modern hospitals. As an economy measure, they are now required to take with them nappies and sheets for their babies.

The district has managed to raise extra cash by taking over from a private contractor the laundry services for neighbouring Southmead district, and by agreeing to train nurses from a private hospital near by in cardiac surgery.

But it still has to make cuts of about £1.5m this year and lose another 90 jobs, although another 150 nurses are needed.

Mr Roy Bennett, the district nursing officer, said in his 1982 report that it would be naive to assume that the nursing service had managed to maintain a safe level of patient care. The nursing service was £3.3m underfunded; Mr Bennett was given £600,000 more to employ some of the nurses still needed.

He now says that patient care is at a safe level only because of the goodwill of nurses, who are working extra hours without being paid overtime.

Local GPs are already noticing the effect of the Peter Featherstone, who works in a health centre serving the deprived areas of St Paul's and Montpelier, says the hospitals are now discharging patients with only a day's supply of drugs. They used to supply enough for two weeks.

Dr Featherstone's health centre has also experienced a doubling from 6,000 to 12,000 patients seen at its treatment room, where minor operations and casualty work can be done. At the same time, there has been a sharp fall in the patients seen at the casualty department of the Royal Infirmary.

Those are just some of the ways in which cuts in health service budgets increase costs in the family practitioner services. The Bristol and Weston district management team (DMT) is not alone in accusing the Department of Health and Social Security of failing to take account of the interdependence of the various parts of its empire.

Mr Douglas Cook, branch secretary for the National and Local Government Officers Association, put the point directly to Mr Norman Fowler, Secretary of State for Social Services, when the TUC health services committee met him last month.

Mr Cook asked how the department's economic problem would be solved by seeking more health service workers, who would then claim social

security. He says Mr Fowler had no answer.

Dr David Burman, consultant paediatrician at the Bristol Children's Hospital and a member of the DMT, says the short-sighted nature of present DHSS policy goes farther. The department is encouraging greater efficiency in bed use, which means faster discharges of patients and closing wards at weekends.

But the most expensive time a patient is in hospital is during the first few days, so admitting more patients and discharging them sooner adds to costs.

Nevertheless, the DMT expects to be able to meet its revised cash limits by rejigging capital programmes, penalizing departments that were over-spent last year, and by bringing forward its manpower targets to January 1 instead of April 1 next year.

It is expected to lead to cuts in patient care, which is why the unit managers have advocated direct responsibility to the health authority.

Mr Paul Barker, whose unit includes the Royal Infirmary, the eye hospital, the radiotherapy centre, and the Dental Hospital, says the cuts are irrational and remove the ability of managers to make decisions.

Changes in policy must, he says, be made by the DEA in public, so that the damage being done to the health service can be clearly explained. Concluded.

# Telecom chief attacks union critics

Sir George Jefferson, British Telecom chairman, has attacked opponents in the corporation to the Government's privatization policy. (Bill Johnston writes). The unprecedented attack is contained in a special edition of the corporation's staff newspaper, *Telecom Today*.

No union is mentioned but the unions representing most of the 240,000 employees of British Telecom oppose the Government's plans to privatize half of the corporation and to encourage private sector competition.

Sir George says: "This is undoubtedly the way to destroy jobs, not protect them as the militants claim."

The BT Office Engineering Union has refused to connect Mercury to a public telephone network and are now engaged in industrial action against the partners of Mercury - Cable & Wireless, Barclays Merchant Bank and British Petroleum.

# Sexual harassment causes physical and mental illness, TUC report says

Sexual harassment at work is causing women physical and mental illness, lost promotion, forcing them to leave their jobs, and even resulting in their dismissal, according to a TUC guide published today.

The guide, *Sexual Harassment at Work*, says that the stress caused by sexual harassment has been linked to depression and physical illness such as cystitis, headaches, digestive problems, nausea, general physical disability, and lack of resistance to infection.

It urges unions to take issue seriously and join in a campaign to combat it. Many trade unionists had not yet recognized sexual harassment as a serious problem and still regarded it as a "hiss about nothing", the guide says.

Mrs Anne Gibson, secretary of the TUC's women's advisory committee, which compiled the guide as a result of a TUC's women's conference mandate, said: "This problem is much more widespread than anybody had thought".

"Individual cases include: a journalist who dreamed going in for the evening shift because of constant unwanted touching and being stopped and trapped

in the locker area; young women who had to drop out of an apprentice scheme for electricians because of the constant touching, ribbing, innuendo, and sex talk among the men; and office workers whose bosses suggest they might like to stay behind after work or spend a weekend with them."

No precise figures were available, but the harassment of women occurred across the whole spectrum of employment, in both blue and white-collar jobs, she said.

The guide includes the kind of behaviour that must not be tolerated in future: leering, ridicule, embarrassing remarks or jokes, unwelcome comments about dress or appearance, deliberate abuse, the offensive use of pin-ups, pornographic pictures, repeated unwanted physical contact, demands for sexual favours, and physical assaults on workers. Unions would not support members sexually harassing other workers.

The TUC recommends that unions should include a clause in agreements negotiated with employers that would treat sexual harassment as a form of discrimination and would set up speedy and confidential

grievance procedures for the victims of such behaviour.

Although the victims of sexual harassment are usually women, the guide emphasizes that it is also applicable to men.

The employers' organization, the CBI, said it would not comment on the proposals before seeing the guide.

The guide calls on individual male trade unionists to examine their behaviour towards female colleagues and make sure that any actions that they may regard as "near the knuckle" but "only good clean fun" do not constitute sexual harassment.

Victims are asked to keep notes of each incident and inform union representatives immediately. The harasser should be warned that legal action could be taken against him.

The guide adds: "Too often women workers are seen in terms of their family caring roles, or as sexually attractive objects, and not as workers attempting to earn their living."

*Sexual Harassment at Work* (Publications Dept, TUC, Great Russell Street, London WC1B 3LS, 15p).

Sophie Birdwood (left), the victim of mistaken identity, and Miss Carolyn Herbert, who was at Balmoral.

## Mix-up leaves press little to coo about

The name of Prince Andrew's latest girl friend - if, indeed he has one - remained a secret last night after a classic Fleet Street case of mistaken identity.

The prince, who is reported to have ended his friendship with Miss Koo Stark, the American actress, spent the weekend at Balmoral with Miss Sophie Birdwood, according to a pack of national

tabloids, led by the *Daily Mirror*, yesterday.

That was news to Miss Birdwood, aged 19, last year's Deb of the Year and daughter of Lord Birdwood - and with good reason. At the time when she was supposed to be spending her time with the third-in-line to the throne, she was in fact on holiday.

Miss Birdwood's return to Britain yesterday somewhat puzzled to find herself in the

## White asbestos risk report challenged

A report being considered today by the Health and Safety Commission seriously underestimates the risk of cancer for those exposed to white asbestos, the type still in general use in Britain, it was claimed yesterday.

The report, written by members of the Medical Research Council (MRC), include Professor Donald Acheson, shortly to become chief medical officer at the Department of Health and Social Security, calls for a formal ban on new blue and brown asbestos products and the replacement of white asbestos by substitutes.

Its authors said there was an attempt by the Health and Safety Executive, the enforcement arm of the commission, to suppress it when it was published last month.

The MRC report, however, finds little evidence of a link between white asbestos and mesothelioma, a cancer that causes an estimated 400 deaths each year. That finding was challenged yesterday by the Society for the Prevention of Asbestos and Industrial Diseases, (Spaid).

According to Spaid which has analysed the research data considered by the MRC, the report bases its conclusions on a sample of only 171 mesothelioma deaths, out of a total of 3,957 cited in official figures for the 1968-81 period.

Spaid also says that the

## Extradition granted for accused Germans

An extradition order against two Germans accused of terrorism offences was granted yesterday at Bow Street Magistrates' Court, London. It is subject to confirmation by the Home Secretary.

Walter Kexel, aged 22, a farmer, and Ulrich Tillman, aged 21, a journalist, were said by the prosecution to have belonged to a neo-Nazi group with Soviet sympathies which was responsible for planting bombs under American servicemen's cars in Germany.

The pair were accused jointly of two armed robberies, three attempted murders, two ex-

## Young prefer building societies

A survey has revealed that more than half of all teenagers over 16 have building society accounts, even though most are non-taxpayers.

Tax on building society interest is deducted at source and is not reclaimable by non-taxpayers - yet 34 per cent of all children invest in a building society and in the 16 to 19 age group the proportion is 52 per cent.

Nearly 20 per cent of all building society investors are under 25, though they account for only 4 per cent of investments held in society accounts.

Boys have significantly less interest in junior investors. Only 10 per cent of the under-fives hold a bank account. The figure is 17 per cent for children aged 10 to 15.

National Savings Bank, probably the most suitable investment for a child, does little better. Only 13 per cent of under-fives have an account,

the figure rising to 21 per cent at ages 10 to 15.

The survey was conducted by the British Market Research Bureau on behalf of the Building Societies' Association. It also reveals wide regional differences in saving patterns - 75 per cent of adults in the South-East hold building society investment accounts, while only half the adults in Scotland save with a society.

Overall 57 per cent of adults have a building society account but only 32 per cent save with eight street banks - though six out of 10 adults run a bank current account.

Savers in the South-East appear to be more sophisticated and make most use of financial institutions generally. Nearly 20 per cent of all adults in this area also have National Savings Bank accounts of some sort, but the figure is less than 7 per cent in the North.

Wales, which has one of the

lowest proportions of building society investors, has the highest incidence of saving with the National Savings Bank - 22 per cent of all adults.

House prices are rising at an annual rate of between 10 and 12 per cent but there is unlikely to be a big price boom, the Royal Institute of Chartered Surveyors says in its latest survey of the residential property market published today (Baron Phillips writes).

During the three months to the end of July half the estate agents taking part in the survey report rises of between 1 and 5 per cent. But the institution says there are marked regional variations. Many agents say there have been no price increases. In the Midlands, agents report that prices have levelled off following rises earlier this year.

Demand is still running high among first-time buyers for pre-1919 terrace houses.

## Tube killing charge men remanded

Three men from north London accused of murdering Mr Peter Clarke, security guard, at Beilze Park Underground station on Friday were remanded in police custody until Thursday. Highgate magistrates yesterday.

They were: James Browne, aged 22, a street trader, of Herbert Street, Kenilworth, Terence Ellis, aged 45, a taxi driver, of Ewart Grove, Wood Green, and James Killick, aged 18, a delivery man, of Beaumont Walk, Hampstead.

Det Insp William Griffiths, of the Flying Squad, told the court that the defendants were interviewed further.

Mr Clarke, aged 52, who was married with two children, lived in Marlock Road, Ilford, Essex. He worked for PPR Security, which is based in Ilford.

## More families falling into debt, survey says

Increasing number of people are falling into debt, with more than 100,000 inquiries a year involving debt being referred to the Citizens' Advice Bureau.

"It is no longer just the poor who cannot manage - widespread redundancy has created a new class of debtor, the white-collar or skilled worker used to a relatively high standard of living," Ms Camilla Dinkel says in the latest edition of the National Consumer Council's magazine.

"The single most likely cause of debt, according to research by the West Midlands Money Advice Project is sudden loss of income through redundancy, bereavement, or divorce."

Families with children are most likely to get into debt, the research reveals, with the elderly who have learnt over the years to live on a very low income, and single childless people least at risk.

"There is hardly a national chain store that does not offer instant credit of up to £100 or more. Credit cards are easy to come by and it is possible by getting several cards to obtain a very considerable amount of credit."

A report soon to be published by the council calls for a number of reforms including changes in the laws that deal with debt recovery.

## Marathon field up to 20,000

The number of runners in the London Marathon will be increased from 19,000 to 20,000 next year. Disabled competitors, about whose status there was a dispute with the Greater London Council this year, will start 15 minutes early to prevent bottlenecks.

A computerized system will process applications to avoid queues outside post offices. The race will be on May 15.

## Couple killed

Mr Michael Matthews, aged 25, and his wife Sandra, aged 24, from Wembley, north London, who were married on Saturday, died yesterday after being involved in a collision with a lorry near Dover at the start of their honeymoon.

## Child sex charge

A man aged 35 from Guildford, Surrey, who was charged with having unlawful sexual intercourse with a girl aged seven, was remanded in custody for eight days by Guildford magistrates yesterday.

## £160,000 raid

Jewelry valued at more than £160,000, including a £100,000 gold and diamond necklace, was stolen from the home of an Arab in Old Windsor, Berkshire, on Saturday night, it was disclosed yesterday.

## PC accused

Police Constable Philip Mason, aged 21, was remanded on bail by Teesside magistrates yesterday accused of indecently assaulting two girls aged 12 and 15 and a woman in Middlesbrough.

The burnt-out sculpture and (left) Mr Mach on his work (Photographs: John Manning (top) and Brian Harris).

## Burnt sculpture may be replaced, gallery says

Mr David Mach, sculptor of the submarine that was set alight early yesterday outside the Royal Festival Hall in London, said after inspecting the damage that he hoped the model would be rebuilt (Kenneth Goelling writes).

A spokesman for the Hayward Gallery, which mounted the Sculpture Show in association with the Serpentine Gallery with Arts Council and Greater London Council finance, said it was likely that a decision about rebuilding would be taken today.

Mr Mach said he had been shocked to hear of the 170ft-long Polaris submarine model's being vandalized,

"especially since during the building of the sculpture I had considerable public support".

The condition of a man who suffered severe burns in the fire was said last night to have "deteriorated slightly".

Mr James Gore-Graham, aged 37, a designer, of Collet Gardens, Hammersmith, London, was taken to St Thomas's Hospital and transferred to the burns unit of Queen Mary's Hospital, Roehampton. He was said to be in a critical condition, suffering 90 per cent burns.

Forensic scientists have been studying the remains of the submarine. Petrol cans are understood to have been found among the 6,000 tyres

## Sex attack hunt centres on brown German car

The hunt for three men who sexually attacked a boy aged six after abducting him from a street near his home in Brighton centred yesterday on a large brown left-hand drive car with German number plates.

A woman noticed the car, which had black numbers on a white plate, when it honked off a kerb near the spot where the boy was abducted. She told the police that it was driven by a fair-haired front seat passenger, she is not sure whether this person was a man or a woman. In the back was a teenage boy, about 15 years old, and a little boy she recalls as having fair hair.

The descriptions tally with those of three men seen in a newsagent's shop used by the victim and his twin brother earlier on the evening of the attack.

Police are now checking on the owners of the 92 cars that took the next available Newhaven-Dieppe ferry a few hours after the boy was attacked. They have asked for the help of French and German police.

A brown car or a dark car is the most consistent element of all the likely sightings of the men that were thrown up in the massive police operation on Sunday night in the Brighton area when hundreds of motorists were questioned.

The police have confirmed that their inquiries have been hampered by difficulties communicating with the boy, who has a speech impediment.

WPC Terry Micklam, who has been trained to deal with child abuse cases and who is befriending the boy, said: "His state of shock is decreasing now. He is quite a happy little boy, but there are times when he is unhappy and thinks about what happened. He does talk a bit more about what has happened."

Police are also looking for a man seen talking to the boy earlier in the evening of the attack. He is described as between 50 or 60, of slim build, 5ft 9in tall, with grey hair. He was wearing an open neck shirt and check trousers.

## Theatre buyer

Andrew Lloyd Webber, the composer, is expected to announce today that he is buying the Palace Theatre in Cambridge Circus, which is valued at up to £2m.

## Kidney disease children still extremely ill

In the condition of two children suffering from the kidney disease haemolytic uraemic syndrome in a Birmingham hospital was still causing concern yesterday (Arthur Osman writes from Birmingham).

One, a boy aged eight, has been in a coma for nine days. There are three other children still detained but making progress. Eighteen others in the West Midlands have suffered the disease during the past five weeks.

Two people in the West Midlands have died from it, a woman aged 59 and a girl aged two, as well as a girl aged nine in Nottingham.

## TV-am's Roland Rat gnaws at BBC ratings

The antics of the puppet character Roland Rat are continuing to narrow the audience gap between its creators TV-am and the rival BBC *Breakfast Time* programme.

"This may be the first time in history that a rat has come to the aid of a sinking ship", a *Breakfast Time* spokesman said yesterday. In fact, TV-am's fortunes, far from sinking, seem to be on the rise, after the station's disastrous early days.

Last week's audience figures show TV-am reaching audiences of more than one million during the week before 9am for the first time since it came on air. The dawnmarket programming, instituted since the palace revolution which ousted Peter Jay, Anna Ford, and Angela Rippon has brought in growing numbers of child viewers during the summer holidays, many of them hooked on Roland Rat.

According to a report from the advertising agency Davidson Pearce, housewives have followed their children to the set. The agency estimates that two thirds of TV-am's viewers are women.

**There's more than one way to get the Navy to sponsor your degree.**

The first way. Join the Royal Navy on the University Cadetship scheme.

Places are now available for young men with the potential to get to the top. If you are accepted you join the Royal Navy up to a year before university and undergo initial Officer training.

You then study for your degree. You receive £4,563 for the first year, £5,110 for the second and on promotion to Sub-Lieutenant, £5,661 for the third. A similar scheme applies to the Royal Marines.

The second way. Apply for a Royal Navy Bursary.

You have to be accepted for at least a Short Career Commission in the Royal Navy, the Royal Marines or the Women's Royal Naval Service. While you are studying for your degree we pay you £900 a year on top of your grant.

You will be expected to get involved in naval activities during your vacations, but you don't join the Navy until after you graduate.

How to apply. To qualify for either scheme you must have a confirmed or provisional place on a UK degree course and you must graduate before your 26th birthday. You must also be a UK resident.

For more information write to Captain S.G. Palmer RN, Officer Entry Section, Dept. 205, Old Admiralty Building, Spring Gardens, London SW1A 2BE.

Or call in at any Royal Navy and Royal Marines Careers Information Office.

The Aquino assassination

Marcos defends himself on TV

Manila (AFP, Reuters) - President Ferdinand Marcos of the Philippines appeared on government television yesterday to deny responsibility for the assassination of his political opponent, Benigno Aquino. He blamed opposition leaders and foreign reporters for the bad international publicity his regime has received because of the Aquino case.

President Marcos: Quelled rumours he was dead

He appeared with his wife, Imelda, and members of his Cabinet. There had been rumours that he was either dead, seriously ill or in a coma. Mr Salvador Laurel, president of the 12-party coalition known as the United Nationalist Democratic Organization (Unido), called yesterday for a non-violent campaign for democratic reforms, and said the killing would unite the opposition to the Marcos Government.

"We are resolved we are going to the people and tell them what is going on. We are not just going to talk. We are going to move", he said. He added that it was possible that some of the Government's opponents would "go to the hills".

The Unido statement read by Mr Laurel condemned Mr Aquino's murder as brutal and treacherous, and said that those left behind would continue his struggle to restore human rights

and freedom and to avert revolution.

Mr Aquino returned despite government warnings that there were threats to his life from personal enemies, and that he would be sent back to the military prison from which he was released in 1980, so he could have heart surgery in the United States.

The statement also questioned the "mysterious circumstances" of Mr Aquino's death, and asked how the gunman, who was immediately killed by security guards, had penetrated airport security.

Mr Laurel said a post-mortem examination showed that Mr Aquino was shot from a

distance of less than 18 inches and that President Marcos should assume "full responsibility" for failing to protect him.

The results showed that the single bullet that passed through the back of Mr Aquino's head and went out through his chin had travelled downwards, yet the alleged assassin was said to be six inches shorter than Mr Aquino.

The body of the presumed assassin "has mysteriously disappeared", Mr Laurel said.

He said he had received several reports that martial law had been re-imposed by Mr Marcos, and called on the President to say whether they were true.

A power failure which paralysed most of Manila yesterday fuelled rumours of violent political unrest after the murder. Government and military authorities appeared later on television to say it had been caused by a break in transmission lines, and to dispel the rumours of bombings, riots and student deaths.

TAIPEI: Taiwan said yesterday it did not know that Mr Aquino, who arrived in Manila on a China Airlines flight from Taipei, had been in the country (Reuters reports).

A Foreign Ministry spokesman said there was no record of anyone entering or leaving under the name of Aquino.

The Communications Minis-

ter, Mr Lien Chan, said that Mr Aquino must have been travelling under an assumed name without the airline's knowledge.

Worldwide condemnation: The US Government has condemned in the "strongest possible terms" the "cowardly and despicable" murder of Mr Aquino (Our Foreign Staff writes).

A State Department statement said that the US Government "trusts that the Government of the Philippines will swiftly and vigorously track down the perpetrators of this political assassination and bring them to justice and punish them to the fullest extent of the law".

President Reagan will go ahead with a visit to the Philippines in early November during a two-week Asian tour.

France also condemned the murder, describing it as a blow to hopes of democratic debate in the Philippines.

Australia condemned the assassination, while Japan expressed concern and said it would closely watch developments.

In Tokyo the Chief Cabinet Secretary, Mr Masaharu Gotoda, said: "We extend our sincere condolences. We hope the facts will be probed by the Philippines Government at the earliest possible date."

Bombs rock army centre in Bronx

New York (AP) - Two bombs exploded at a United States Army reserve centre in the Bronx area of New York early yesterday and police think those responsible may have caused several earlier New York bombings.

No injuries were reported, but the blasts caused extensive damage to the five-storey brick building and to a number of military vehicles.

A police spokesman said that a group calling itself the United Freedom Front had claimed responsibility as it had done for previous blasts in Queens and on Long Island.

Mass grave in Yugoslavia

Zagreb (AP) - A mass grave holding the remains of people killed at the Jasenovac death camp by members of the Ustasha, a Second World War Croatian extremist organization, has been found on the banks of the Sava river.

The Zagreb daily Vjesnik said the discovery was made by fishermen because of the river's extremely low water level this summer.

Mrs Nixon ill

Washington (AP) - Mrs Patricia Nixon, aged 71, wife of former President Richard Nixon, suffered a mild stroke last week, it was disclosed after she returned to her home in Saddle River, New Jersey, yesterday. She was said to be "recovering nicely".

Big Mac's pay

Hamburg (AFP) - The West German restaurant workers union has accused McDonald's, the American fast food chain, of "abusive exploitation", saying that 58 per cent of its 12,000 workers received less than £100 a month.

Malta's profit

Valletta - The Malta Dry-docks made a profit of about £1m through refitting the Cunard Countess earlier this year, according to a Maltese daily newspaper. The refit was completed within a 44-day time limit.

Mayor quits

Santo Onofrio, Italy (AP) - Signor Vito Facciolo, the Christian Democrat mayor of this Calabrian village has resigned after receiving Mafia threats to blow up his house and family.

Stay-at-home

Vienna (Reuters) - Mr Vaclav Havel, the Czechoslovak dissident playwright and a founder of the Charter 77 group, has refused offers to travel to the West for fear he could not return.

Curfew widens

Colombo - The 7pm to 4am curfew in Colombo and other cities in the south of Sri Lanka has been extended to Jaffna, and Vavuniya in the north and Trincomalee in the east.

Trees guarded

Delhi (Reuters) - People illegally felling trees in the Himalayan state of Jammu and Kashmir will be shot. A special force is being organized to protect forests ravaged by people for firewood.

Top seed

Agen, south-west France - A lorry driver from Agen has won the annual French melon-seed spitting contest with a 24.5ft projection. He beat 48 other competitors.

Alpine ordeal

Grenoble (Reuters) - A three-year-old girl is recovering in hospital after spending 48 hours huddled next to her dead grandfather on a mountainside after a fall in a thunderstorm.

Public hangings

Damascus (Reuters) - Two men convicted of committing a series of crimes including armed robbery and killing policemen were hanged at dawn in Damascus square.

Mass for gays

Stockholm - Eleven members of a fundamentalist Swedish religious sect were arrested when they interrupted a Mass for homosexuals in Stockholm Cathedral.

No smoking

Stockholm - Scandinavian Airline Systems (SAS) is to ban smoking on all its flights between Stockholm and Oslo next month.

Royal visit

Heilinki (AFP) - King Carl Gustav and Queen Silvia of Sweden arrived in Finland on board a Swedish Navy vessel for a four-day state visit.

Last to be first

Mbabane (AP) - A new Miss Swaziland will be crowned today because the master of ceremonies last week read the winners' list backward, crowning the fourth-place finisher and making the winner fourth.

Radical change of mood

French forces in Chad on 'state one alert'

By Leslie Plummer

French forces in Chad, now believed to number more than 3,500, including technicians and medical teams, have been put on "state one alert" as a further signal to Libya that the French deterrent is serious.

While France wants a cooling in the Chad conflict, where the forces of Colonel Gaddafi, the Libyan leader and the former Chadian president Mr Goukouni Oueddei, are challenging the government of Mr Hissène Habré, the mood at French headquarters in N'djamena, the capital, has changed radically in the past week towards what has become their biggest operation since Algeria.

Worries about Libya's ability to attack in more than one place simultaneously have contributed to the change in French attitude, as has accumulating evidence of direct Warsaw Pact involvement in Chad at a high level.

After intensified ground reconnaissance - thought to have extended right into the northern rebel arsenal town of Faya-Largeau - the French conceded that planning by senior Warsaw Pact advisers attached to Libyan forces was probably behind the recent rebel successes.

Though France is reluctant to see the conflict in East-West terms, as the US does, officers do not rule out the possibility that non-Libyan forces which bombed Faya-Largeau, which fell to the rebels on August 10.

French intelligence also shows, however, that there is a defensive element in the weaponry still being poured into Faya-Largeau by Libya, reinforcing reports that Mr Goukouni fears an attack in the north as much as Mr Habré says he does in the south.

An unconfirmed report in Paris yesterday said the rebel leader held secret talks with French government officials about 10 days ago, possibly in Paris. The French are said to have stated that they support reconciliation between the warring parties, but not the division of Chad, as Colonel Gaddafi might like.

France now feels beleaguered on several fronts in Chad: its contingents in surrounding countries have been reduced to

France does not share the American fixation with driving Colonel Gaddafi into the sea, and has little faith in American military methods or American understanding of Africa.

One source summarized the attitude of French officers in Chad towards the Americans: "They go round here as if they own the place, telling us how to fight a war in a country that was ours for decades."

France also resents the extent of US influence over Mr Habré and President Mobutu of Zaire.

French officers believe the Americans are behind Mr Habré's continued calls for a preemptive strike against the rebels - something France considers foolhardy - and they suspect the Americans of failing fully to share with them intelligence from Awacs surveillance aircraft in the region.

They fear that the American attitude is that the less France knows, the more it will have to commit itself to cover all possibilities.

The French also have a mixed view of Mr Habré: some advisers consider his judgment erratic, while some officers believe he is withholding information from them to try to play off America and France to his advantage.

which took place with the help of an East German who had previously fled to the West.

He drove his former wife, aged 31, their daughter and a friend close to the border, then parted with them and officially travelled to Austria at an independent "think tank" whose researches on social and industrial issues have been widely praised.

which took place with the help of an East German who had previously fled to the West.

Israel plays the Libya card in Africa

From Christopher Walker, Jerusalem

The provision of access to the extensive intelligence material on Libyan activities in Africa gathered by Mossad, Israel's secret service, has emerged as the strong card in the Begin Government's attempt to resume diplomatic ties with black Africa.

It was learnt yesterday that the main demand made by Liberia as a *quid pro quo* for resuming relations broken off in 1973 was a breakdown of all Israel's classified assessments about Libyan actions and intentions in Africa. Liberia pledged to pool material gathered by its own somewhat less efficient intelligence service.

The disclosure was made by Israeli sources only hours before General Samuel Doe, the Liberian President arrived here to begin a four-day state visit, the first by an African head of state since 1971. The occasion was hailed as a

diplomatic triumph for the Israeli Government. The general has given the full red carpet treatment.

Greeting him after a 21-gun salute, President Chaim Herzog said that the visit had special significance. "You come from Africa facing the new danger of Libyan colonialist ambitions which threaten the independence of many African countries," he said. "Your struggle against this new-found imperialism is one with which we can identify and sympathize."

The Jerusalem sources explained earlier that General Doe, when seized power in Monrovia in 1980, had recently ousted a number of pro-Libyan figures from his administration and was now "deeply concerned" that his military regime might be the target for a Libyan-inspired coup.

It is understood that the handling over of the Mossad dossiers took place three weeks ago, when a three-strong delegation from Liberia paid a secret visit to Israel.

The Israeli sources said that intelligence material had been supplied to the Liberians about the recent dispatch of "Libyan agents" to Niger and the Central African Republic, as well as about activities of Libyans and Cubans based in Ghana.

It was made clear that assistance in the struggle to resist Libyan expansion is now being employed by senior Israeli officials as one of their main weapons in the often clandestine negotiations now under way to persuade all black African states to return their ambassadors to Tel Aviv.

No official information was available about the extent to which the new agreement on intelligence sharing between Israel and Liberia will be developed, but this will be one of the topics discussed by General Doe during his stay. He will also visit an Army base and the headquarters of Israeli military instructors.

In addition to the security aspects of the renewed link with Israel, the Liberians have also requested Israeli cooperation in establishing a shipping line, reorganizing the national airline and restructuring the country's agricultural sector.

The visit of General Doe has focused attention on the extent to which Israel has maintained contacts in Africa despite the mass diplomatic exodus prompted by the 1973 war. At the latest count, Israel had commercial, agricultural, military or diplomatic ties with 22 African countries in which some 4,000 Israelis were working on various missions.

In from the cold, page 8

of initiating the latest round of fighting, which shattered a shaky week-old ceasefire. Major Bennett said it appeared, however, that the Druze had fired the first shot.

In Damascus, the leftist Progressive Socialist Party of Mr Walid Jumblatt, issued a statement accusing Lebanese Army positions around Beirut airport of firing at Druze villages in the Chouf mountains. The statement said that Druze militias would shell the airport and force its closure "if this aggression continues".

The Lebanese Army Command denied the Druze claim, and Major Bennett said there had been no reports of firing from the direction of the airport towards the mountains. Beirut's international airport was reopened last week after shelling from Druze positions had forced its closure for six days.

Meanwhile, Mr Robert McFarlane, President Reagan's special Middle East envoy, flew

Beirut shelling turns into full-scale battle

From Kate Dowling, Beirut

morning before a ceasefire was arranged.

At least six people were reported to have been killed in the indiscriminate bombardment of densely populated areas.

Initially the fighting broke out between Druze and Christian gunmen stationed in Shweifat and Kfarshima. Later, the clashes spread to surrounding districts. Local radio said several Army posts around the capital were attacked and artillery rounds also hit the suburb of Baabda, where the presidential palace is located.

Major Stuart Bennett, the spokesman for the British contingent of the peacekeeping force, said that a few rounds landed "uncomfortably close" to the British headquarters in the tobacco factory along the Old Sidon Road. He said he had worked up to the sounds of rocket and artillery fire and "the sprinkling of machine gun fire" just before dawn.

Both sides accused each other

of initiating the latest round of fighting, which shattered a shaky week-old ceasefire. Major Bennett said it appeared, however, that the Druze had fired the first shot.

In Damascus, the leftist Progressive Socialist Party of Mr Walid Jumblatt, issued a statement accusing Lebanese Army positions around Beirut airport of firing at Druze villages in the Chouf mountains. The statement said that Druze militias would shell the airport and force its closure "if this aggression continues".

The Lebanese Army Command denied the Druze claim, and Major Bennett said there had been no reports of firing from the direction of the airport towards the mountains. Beirut's international airport was reopened last week after shelling from Druze positions had forced its closure for six days.

Meanwhile, Mr Robert McFarlane, President Reagan's special Middle East envoy, flew

proposed cuts in maternity benefits, and he was soon joined by other Land Prime Ministers, who saw the popularity of such measures. Egon Wülfelberg and Schleswig-Holstein have joined in the revolt, but the Government insists it will not back down.

The Chancellor has been annoyed by all this, but kept a lofty distance from the polemics.

Commentators here see a danger that in spite of a generally successful first year in office, Dr Kohl is letting things drift, reacting to events rather than making policy.

This would be especially dangerous as the Government comes under pressure over the deployment of Nato missiles. Dr Kohl has quietly dropped the proposals he made last month that a compromise formula should be sought at Geneva involving the waiving of the Pershing 2 missiles.

Over the weekend also Herr Hans-Dietrich Genscher, the Foreign Minister, turned down the proposal by Greece, the current chairman of the European Community, that deployment should be delayed, although this proposal was promptly welcomed by Herr Willy Brandt, chairman of the Social Democratic Party, Bonn is clearly anxious to demonstrate resolve abroad as well as at home.

That resolve will soon be put to the test. In two weeks' time the peace movement is to hold its first big demonstration of the promised "hot autumn", with a sit-down and blockade of the American base in Schwabisch Gmünd.

one of these is the question of the Government's austerity policy. Herr Strauss's Government in Bavaria announced recently that it did not accept

Crash aftermath: A survivor (right) helping the police at the scene after 11 people had been killed when an aircraft carrying 24 skydivers and two pilots crashed on to a

road in northern Washington state. The aircraft, a twin-engine Lockheed Lodestar, burnt out after crashing on Sunday near the town of Stanwood.

Biafra war hero fails at ballot box

Lagos (AP) - Mr Odumegwu Ojukwu, who led his 100 people on the losing side of the Biafran war, has been defeated in his attempt to become a Nigerian federal senator, officials said yesterday.

Mr Ojukwu lost by more than 12,000 votes in the eastern state of Anambra in his fight against Mr Edwin Ovwuodike, a former state health commissioner and candidate for the opposition Nigerian People's Party, the official News Agency of Nigeria said.

A bearded 49-year-old Oxford graduate, Mr Ojukwu was attempting a political comeback as a candidate for the ruling National party of Nigeria headed by president Shehu Shagari.

It was Mr Shagari who pardoned Mr Ojukwu in June, 1982, 12 years after the bitter 30-month Biafran civil war in which more than a million people were believed to have been killed.

His political opponents in Anambra trumpeted word of his loss even before the results from Saturday's balloting were officially disclosed.

The Satellite newspaper, published in the Anambra capital of Enugu, called him "the ex-war-monger" and said he was beaten "overwhelmingly".

Mr Ojukwu: Pardoned by the President

Radio stations controlled by the Christian Phalangists linked the sudden escalation yesterday to the visit on Sunday of Major-General Mustafa Tlass, the Syrian Defence Minister, to the Syrian-controlled Bekaa Valley in eastern Lebanon.

The executive of the newly-launched United Democratic Front (UDF), which is being described as the broadest and one of the most significant alliances of anti-government groups formed in South Africa, is to seek talks with Seibler Pérez de Cañellas, the UN Secretary-General, in Cape Town this week.

Its publicity spokesman, Mr Zac Jacob, said yesterday: "There is no reason why the UDF should not tell people around the world their struggles."

The Government has so far declined comment about the formation of the UDF, launched at a mass rally in Cape Town on Saturday, but Dr Frederick van Zyl Sijthoff, leader of the official opposition Progressive Federal party has said that the Government ignored it at its peril.

It claims the backing of the South African Council of Churches, the Council of Unions of South Africa (CUSA), sports bodies such as the anti-apartheid South African Committee on Sport (SACOS) and the black consciousness Azanian Peoples Organization (AZAPO) among its backers.

Significantly, it has not attracted the support of the biggest black labour movement, the Federation of South African Trade Unions (FOSATU) nor of the strongest individual unions such as the General Workers' Unions and the Allied and Food Workers Union.

Its patron includes a number of veteran anti-apartheid campaigners of the 1950s, includ-

# US agent jailed in Moscow as Belgium breaks Soviet spy ring

From Richard Owen, Moscow

A Soviet citizen named Ivanov has been imprisoned for spying for the United States, Tass said yesterday, adding that the involvement of American Embassy staff in Moscow had been "incontrovertibly" proved.

Tass did not name the Americans concerned, however, which is apparently a sign that Moscow does not intend to make an issue out of the case.

It gave no details about Ivanov or his alleged espionage, beyond saying that he had acted on instructions from the CIA.

There have been two cases this year in which American diplomats have been named as spies and declared persona non grata, but neither case was given prominence by the Soviet media, which give the impression that the CIA remains endlessly resourceful and remorselessly anti-Soviet, whatever the ups and downs of Soviet-American relations.

BRUSSELS: Belgium has expelled at least six East Europeans for economic espionage and uncovered a Brussels electronics firm serving as a front for Soviet technological spying, a senior Belgian official said yesterday, (Reuters reports).

The official, who spoke on condition that he was not named, said that the discovery of the firm followed the expulsion at the weekend of one Soviet and three Romanian diplomats and an employee of the Romanian Embassy without diplomatic status. At least one Soviet employee of the firm had also been expelled.

The expulsions resulted from the arrest some 10 days ago of Eugene Michiels, a European trade specialist in the Belgian Foreign Ministry, who has admitted selling documents to the diplomats. Mr Michiels is being held in prison.

The role of the electronics firm was discovered by security agents working on the Michiels case, but it was not clear whether there was any connection between the two.

The electronics company was run and financed by Russians but had been set under Belgian law and employed several Belgians, the official said.

Mr Leo Tindemans, the Belgian Foreign Minister, said in a weekend radio interview that diplomats had been expelled after the arrest of Mr Michiels. He declined to say how many or give their countries of origin, but the State Prosecutor's office has confirmed the expulsion of five.

A Romanian Embassy spokesman denied to the Belgian press agency that any Romanians had been expelled, and said that such reports could seriously harm relations between Belgium and Romania. The Soviet Embassy declined comment.

The Belgian official said that the issues dealt with by Mr Michiels's department were of only moderate intelligence value, but there was widespread concern that he might have obtained more sensitive information from contact with other departments.

# Crumbling Cairo: Part 2 Metro strangled in red tape

In the second of two articles on Cairo's problems, our correspondent ROBERT HOLLOWAY describes the difficulties faced by the city's metro project.

They are replacing the pink granite colonnades of Ramses II outside Cairo's main railway station with a replica. The original, moved from Memphis in 1955 to what may be the most congested square in Africa, is at risk from traffic fumes and vibrations.

Whoever suggested transferring it to the museum may have been anticipating a pharaonic attack of apoplexy. Ramses, the most prodigious builder of antiquity, would not have tolerated the delays plaguing Cairo's metro.

Work began 20 months ago on phase one of the project, a tunnel running for two and a half miles beneath the city centre to link two existing overland suburban lines, and incorporating them into a single, 26-mile system.

Construction is already more than a year behind schedule, not a yard of track has been laid, and the French-led consortium which won the £155m contract refused to predict when the metro, due for completion in 1986, will come into being.

It is even harder to predict what Cairo will look like when it does. More than four million people, one third of the city's population, are believed to crowd each day into communal taxis or noisy and foul-smelling buses, many of them in transit between Ramses station and Sayeda Zeinab, the terminus

serving the southern industrial complex at Helwan.

Last May, the official news agency reported that Mr Salehman Mustafa, the Minister of Transport and Communications, had ordered the removal of all obstacles to excavation of the tunnel and five underground stations. It needed the intervention last month of Dr Fuad Mubammad, the Prime Minister, to make it

## Toll rises to 36 in collapsing houses

The death toll after the collapse of four houses in Cairo, and Alexandria over the weekend has risen to 36 (Reuters reports).

When three adjoining houses in Cairo collapsed on Saturday, 22 people died and 16 were injured, and 14 died and 10 were injured in Alexandria when a seven-storey building fell down. The daily *Al-Ahram* reported that three housing officials were arrested and charged with manslaughter.

The 17 French firms involved, headed by SOGREAH, are concerned about the effect of delays on Coface, the French Government's export credits department, and big French banks, which together are financing about 70 per cent of the project.

Ramses, confronted with the bureaucracy of his descendants, might have cause to ponder upon his own boast (rendered with licence by Shelley): "Look on my Works, ye mighty, and despair!"

When they dig, the contractors have no idea what they will

find. Site work included the removal of a landmark - an empty plinth which stood for years in Tahrir Square, where Anwar Sadat station will be located. No one seems to recall whose statue was originally to stand on the pedestal.

Nor does anyone know how many water and gas mains or electricity cables lie beneath the streets, let alone their precise location. Some were laid during emergencies in the Second World War, others may date from the First.

Those in the know do not deny the legend that one engineer, told by an exasperated official to cut a cable which did not appear on municipal charts, found himself facing an army officer sent to investigate the blowing up of 50 secret telephone lines to military headquarters.

The metro will make it possible to transport 60,000 people an hour, about one million per day, between the suburbs.

The 17 French firms involved, headed by SOGREAH, are concerned about the effect of delays on Coface, the French Government's export credits department, and big French banks, which together are financing about 70 per cent of the project.

Ramses, confronted with the bureaucracy of his descendants, might have cause to ponder upon his own boast (rendered with licence by Shelley): "Look on my Works, ye mighty, and despair!"

Concluded

Best foot forward: Pharaoh Ramses II, who is taking refuge from the chaos of modern Cairo in a museum.

# Mauritians back Prime Minister in elections

Port Louis (Reuters) - The three-party alliance of Mr Anerood Jugnauth, the Prime Minister, crushed former Finance Minister Paul Berenger's opposition Mauritian Militant Movement (MMM) in general elections yesterday.

Final results gave Mr Jugnauth's alliance 41 parliamentary seats against 21 for the MMM. Mr Berenger was beaten in his home district.

A further eight seats may be allocated later by the country's electoral commission under a complicated "best loser" system, but this cannot change the alliance's lead.

Mr Jugnauth, in a victory statement, said: "We must work for the good of the country and of the people to preserve democracy and build our economy."

Mr Berenger, conceding defeat, said: "The struggle continues but we respect the result of the election."

The election was called just 14 months after Mr Jugnauth, a London-trained lawyer, and Mr Berenger swept to power in an alliance of the MMM, of which they were then both members, with the now defunct Mauritian Socialist Party (PSM).

The alliance collapsed last March and Mr Berenger left the Cabinet with most MMM ministers. Mr Jugnauth stayed in power, supported by the PSM which since transformed itself into the Mauritian Socialist Movement (MSM).

# Gromyko spells out space weapons proposals

From Our Own Correspondent, Moscow

Mr Andrei Gromyko, the Soviet Foreign Minister, took the Soviet proposal on the banning of space weapons a stage further yesterday by suggesting it should include a ban on the use of manned spacecraft for military purposes. The proposal, appeared to be aimed at the American space shuttle, which Moscow claims Washington is planning to equip with space weapons.

Mr Gromyko was elaborating on an initiative put forward by President Andropov in a meeting with visiting American senators in Moscow last Thursday. Mr Andropov had called for a moratorium on the launching of anti-satellite weapons into space.

Pravda published the text of a letter from Mr Gromyko to Señor Xavier Perez de Cuellar, the UN Secretary-General, outlining a draft Soviet treaty banning the use of manned spacecraft for military purposes. Mr Gromyko said Russia was seeking an urgent ban on the "testing, and deployment in outer space of any space-based weapons intended to hit targets on earth" and "complete renunciation by states of the development of new anti-satellite systems".

Under the proposed treaty states would undertake "not to destroy or damage the space objects of other states", and not to test or use manned spacecraft for military purposes "including anti-satellite aims".

## South Korea: Lee Chul

By Caroline Moorehead

A Korean born in Japan, Lee Chul, is serving a 20-year prison sentence for "anti-state" activities and "espionage". Now aged 35, he was one of 21 students accused of being part of a "campus spy ring" after the interrogation in late 1975 of most Korean students normally resident in Japan but at that time studying in South Korea.

In April, 1976, Lee Chul was tried for spying for North Korea. The prosecution accused him of travelling to the North to receive training as a spy. After a confession the court sentenced him to death. The sentence was later commuted, first to life imprisonment and then, in 1981, to 20 years.

In 1976, at an appeal hearing, friends and relatives testified that he had been with them in Japan on the dates the prosecution maintained he was in North Korea.

Lee Chul said that he had "confessed" only after being tortured and informed that his family would suffer the same fate. (His wife, arrested with him, had been sentenced to three years in prison.) Lee Chul's appeal was rejected.

# Poll win by Maldives leader likely

Male, Maldives (Reuters) - The Maldives yesterday took the first step towards electing a new leader, with the President Maumoon Abdul Gayoom favoured to retain power.

Parliament was voting for a single candidate who must win a majority in a public referendum to be declared president for the next five years.

Under the country's constitution, Parliament's 48 members - 40 elected and eight nominated by the president - may choose anyone in or outside the house. There are no political parties in the Maldives, an Islamic nation of about 160,000 people, and campaigning for the presidency is banned.

Mr Gayoom, elected in 1978, is an Islamic scholar and ends his present term on November 11. A government statement on Sunday gave no indication of when the referendum on Parliament's choice would be held.

Political sources said they expected President Gayoom to win more than the 28 votes he gained in Parliament in 1978, when a 92 per cent referendum vote confirmed him in office.

Since taking power, President Gayoom, who is 46, has made major changes in the economy of the country's 2,000 coral islands, embarking on a programme to develop tourism.

The devout president, who was educated in Egypt, has linked the development with preserving the Maldives' Islamic ideals.

He has stated that he wants to introduce constitutional changes to bring more political freedom to a system where the president rules with near-absolute authority.

# Captain gets two years

From Robert Schell, Amsterdam

A court in Arnhem has sentenced the captain of a Dutch ship, the *Emmy*, to two years imprisonment for ordering a stowaway thrown overboard in October, 1979.

The court found Captain Theodore de Boudt, aged 39, guilty of manslaughter when he ordered a Ghanaian aged about 20 to be thrown overboard into the River Bonny in Nigeria. His body was never found.

The first mate, who carried out the order with the assistance of two crewmen, was sentenced to one year imprisonment.

The two officers had been sentenced twice before, but in both cases the sentences were quashed by the Dutch Supreme Court on legal technicalities and retrials ordered.

The two men were arrested in The Netherlands after members of the ship's crew had reported the matter to the authorities.

# LIGHT, MIDDLE & HEAVYWEIGHT. ALREADY ROLLING.

Whatever kind of truck you're looking for, IVECO pack a punch.

**THE LIGHTWEIGHTS**

In the 3-3.5 tonne light van and chassis cab market nothing stacks up against The Daily. It's big on capacity, tough in construction, mean in consumption and magic when it comes to manoeuvrability and driver appeal. Panel van, chassis cab, petrol or diesel, there's a Daily that fits the bill.

Stepping up a weight there's the Z range of vans and chassis cabs. They're spacy for loads, pacy in performance and mighty when it comes to economy. Car or HGV licence, there's

a model in the Z range that's made to measure.

**THE MIDDLEWEIGHTS**

At 16 tonnes GVW we really start throwing our weight around with our solo rigid and draybar workhorses. IVECO offers great flexibility at this weight division - a choice of air cooled or water cooled engines and four wheelbase options.

**THE HEAVYWEIGHTS**

In the heavyweight division we move into top gear with a range of the finest two axle premium specification tractors on the market. Available at 24, 28, 32.5 and 35 tonnes GTW to take advantage of taxation differences, the

16.5 ton tractor is the meanest machine on the street.

When Commercial Motor\* tested it, the 16.5 ton turned in better fuel economy figures than any comparable unit. And if that doesn't make it the most competitive tractor in its class, the 16.5.24 is covered by a six year anti-corrosion warranty.

The 190 series is available at 32.5 and 38 tonnes GTW. The top-of-range 190.38 Third Generation 38 tonne GTW tractor boasts a turbocharged 17 litre engine which produces a massive 1217 lb. ft. torque at 1200 rpm. All 190 tractors are covered by a two year driveline and six year anti-corrosion warranty. Still in the

heavyweight division, IVECO multi-axles, construction, off-road and special vehicles live up to their reputation for tough, reliable service.

With 59 dealers in the UK, covering road and construction vehicles, and over 3,500 service points in Europe alone, we've got the set up to match your requirements.

Light, middle or heavyweight, we pack a punch in every division.

So whether you're a one van business, a general haulage contractor, an own account operator or a TIR haulier, contact your IVECO dealer today. See Yellow Pages or call Eric Budworth on 060 65 3400.

You'll see we're already rolling.

SPECTRUM

The sale of monkeys for research is big business. This second of three articles follows the trail from capture in the wild to death in the laboratory

The serious monkey business

By Andrew Tyler

Non-human primates have been changing hands for 5,000 years or more. Accounts dating back to ancient Egypt show them as pets, zoo specimens, agriculture labourers, circus exhibits, objects of religious veneration and, increasingly in our own time, laboratory tools.

The roots of the modern biomedical relationship extend to the late nineteenth century, when a number of Russians sought cures for tuberculosis and the plague. It was in Sukhumi, by the Black Sea, that the world's first major primate centre opened in 1927, and yet by then Dr Serge Voronoff had already performed his startling rejuvenation routines that involved transplanting slivers of chimpanzee testicle (known in polite circles as "sex glands") into the scrotums of aging humans.

More sombre breakthroughs came with the beating of yellow fever in Panama, the discovery of the Rh factor in blood - thus combating the blue baby syndrome - and the West's holy war against poliomyelitis, which cost in the region of 10 million monkey lives - and is still costing.

When the polio programme began in the 1950s, neither North America nor Europe had anything approaching sufficient rhesus stock. It was to India they turned, and at the height of the battle three plane loads were arriving every week at London Airport, each plane packed with 1,600 monkeys.

For the majority, death came long before the laboratories required them to give up their kidneys. They were lost through absurdly reckless trapping, holding and transit operations. In January 1955, 394 animals died in an unventilated van at London Airport while en route to New York. Hundreds more at a time perished from disease and starvation in the holds of ships. But it was not until the early 1970s, when rabies swept through Europe, that rigorous controls were finally introduced.

India had since been joined in the marketplace by several Asian and African countries. By then, as well as polio vaccine, there was a proliferation of monkey projects involving a host of Old World species including vervets and macaques. The US now had its seven regional primate centres, while Britain enjoyed a more modest programme, principally orchestrated through the Medical Research Council. Inevitably, the almost lustful im-

portation from the wild had to slow down. Official reports were issued in Britain and the US warning of an impending shortage and calling for increased domestic breeding, self reliance and less waste.

Little heed was paid, however, until the Indian authorities turned off the tap in 1978. Apart from their concern at a relative scarcity of a once inexhaustible bounty, they had been revolted by the American radiation and neutron bomb tests: these had not been in the contract.

Bangladesh looked a likely substitute for supplies until she abruptly cancelled an exclusive 10-year contract with an Oregon firm called MoL Enterprises, also citing radiation experiments performed on early shipments. MoL retorted with a \$15m law suit, and a larger one against a competitor it claimed had bribed Bangladeshi officials to get the deal abandoned.

Meanwhile another US competitor, Charles River, plunged into the rhesus breeding business with two privately-owned monkey islands off Key West in Florida. Each free-range Charles River rhesus - just like the company's production-belt, caesarian delivered rodents - came guaranteed clean with a multi-digit code stamped on its chest.

Monkeys are treated as local pests

Charles River offered more hope when it announced that the irreplaceable rhesus wasn't quite as irreplaceable as had been supposed; that the relatively plentiful, widely dispersed cynomolgus macaque would serve as well in many key laboratory routines, including the testing of polio vaccine.

This brought such potential macaque suppliers as Indonesia, the Philippines and Malaysia more prominently into play. African baboons were also becoming a standard laboratory tool, particularly in Britain. But the truly burgeoning trade began developing in South America (New World) primates such as the marmoset and the squirrel monkey.

The majority of laboratory-reared animals live one or a handful to a metal cage and are addressed under hot lights by scrubbed-up, white-coated operatives: this, at least, is the general picture in Britain, where the Home Office watches over matters of hygiene.

"Ham", the world's first space monkey, in his capsule before lift-off at Cape Canaveral in 1961. It has been claimed that the chimpanzees were trained by electric shocks and heatings with rubber hoses

At the "resource" end, the picture is less sophisticated. Shirley McGreal, US chairman of the International Primate Protection League, says that monkeys "are not caught by professionals in white smocks. They are trapped by locals who sell them to middle-men like so many cans of beans."

"The highest mortality happens at holding stations. These local people have no regard for the monkeys. To them, they are just local pests. They are not fed well, they will squeeze six or seven into a 3ft cage, they will lift and drop the cage as if they were moving carts of stone."

Top of the US and United Kingdom import league at present is the cynomolgus macaque. This is an intelligent, social animal that has carved a niche for itself across the whole of the Asian lowlands, including Borneo and the coastal islands. In Bali it is regarded as sacred.

Cynomolgus live mostly in mangrove swamps where they swim and fish for crustaceans. Theirs is a male-dominated, completely polygamous society that bands together in troops of up to 50.

Britain's major cynomolgus operator is Keith Hobbs, whose company is called Interprim. Hobbs is a veteran monkey handler who was commissioned by the Medical Research Council in the early 1970s to take stock of Britain's primate prospects; it was he who called for more breeding and an upgrading of standards.

Since the beginning of the year his company has been shipping cynomolgus back to Britain, principally to Shamrock Farms of Sussex. Shamrock is, in fact, Britain's largest importer from the wild, and practically the sole supplier of Old World species to British laboratories.

Before their sale to the biomedical community, each of Shamrock's monkeys is "conditioned" at the company's farm premises outside the West Sussex village of Small Dole. Here the animals are given a five-figure chest tattoo and housed in small metal cages within prefabricated cabins.

They will have arrived from the wild in a state of stress and sickness incurred by rapid switches through alien environments. For the flight itself, perhaps half a dozen strangers would have been crated together. Fighting is not unusual in such circumstances, and since there is nowhere to retreat fatalities occur. It is also typical to find them, when the crate is opened, huddled in each other's arms.

A former Shamrock worker reported coming across such scenes and also finding dead babies in the containers. The mothers, he believes, were too vexed to cope with birth on the move. Shamrock's founder and chairman, Edwin Lonsdale, admits to losing two or three animals from every batch of 50 within the first few days. But a regimen of vitamins and injections, he says, rebuilds the great majority and within about six weeks they are ready for shipment to the customer.

It was this last routine, together with an on-site "freezing experiment", that raised the ire of many animal liberationists. For two years in the late

1970s - according to Shamrock's own journal - 25 cynomolgus were kept in "a kennel and run with minimal heating in the living area". The 18 that survived were then divided into two experimental groups of nine.

The first batch all perished when night temperatures fell below freezing. Five from the second batch also died during a 14-hour period. The remaining four were saved by an infra-red heater and were left out for the rest of the winter. Despite the losses, the experiment had pointed to "large savings" in heating bills.

Earlier this year the Animal Liberation Front broke into Shamrock, spraying paint and blood and destroying medical equipment. Last month several thousand protesters marched to the Small Dole premises. Now coils of barbed wire have gone up around the perimeter and sentries make night patrols.

31 baboons died in simulated smashes

A large number go for polio vaccine and drug testing, a smaller percentage to the Chemical Defence Establishment at Porton Down, which now also breeds its own monkeys. Shamrock has also supplied a French testing house, which received a degree of publicity after killing 31 baboons in simulated car smashes.

It was this last routine, together with an on-site "freezing experiment", that raised the ire of many animal liberationists. For two years in the late

THE LAWS

The key machinery for controlling and monitoring the world primate business is the 1973 Convention on International Trade in Endangered Species (CITES), to which 77 countries, including Britain, are now party.

All 184 primate species are listed in its appendices. The 66 most threatened are in Appendix I and must not be the subject of "primarily commercial" transactions. Included are gorillas, orang utans, chimpanzees and some of the more delicate New World monkeys.

The balance, including such laboratory favourites as cynomolgus, baboons and marmosets, are logged as "vulnerable to unregulated trading" in Appendix II. Appendix I animals require both export and import permits. Appendix II creatures need export permits only.

The United Kingdom implements CITES principally through the Endangered Species (Import and Export) Act 1976, whose Lists A and B conform roughly to CITES I and II. The Department of Environment is advised by the Scientific Authority For Animals whether import licences should be granted for A animals. Any licence applies to just one consignment (usually lasting nine months) of a single species and must be accompanied by a CITES export permit.

The Department of Environment is advised by the Scientific Authority For Animals whether import licences should be granted for A animals. Any licence applies to just one consignment (usually lasting nine months) of a single species and must be accompanied by a CITES export permit.

Books for the boat

To guide your holiday reading, we proudly present a statistical breakdown of the books most often bought by Britons leaving this country. It provides a sure pointer to British reading tastes. It is compiled from point-of-sale returns at the country's top ten exit points. It is, in fact...

- The Cross-Channel Best-Seller List Fiction: The Gatsby Effect, by Ken Drummond; The Ludlum Dossier, by Jack Forsyth; The Forsyth Memorandum, by Desmond Beagle; The Bagley has Landed, by Ken Syndrome; A Flight of Bees, by Ed Sedley; The Gypsum Factor, by Lud Boleum; The Dread Forsyth, by Fred Kennet; The Forsythia has Landed, by Kennet Avon; The Bugle Takes Off, by Avon Hunter; The Desmond Syndrome, by Hunter Hawker.

- Animal Books: If Vets Could Write, by Heriott Watt; Gandhi's Pets, by Richard Attenborough; Gut Along, Little Doge, Gut Along, by John Julius Norwich; Daddy Wouldn't Buy me a Boer War, by Ken Griffiths; If Pigs Could Fly, by Sir Robert Mark; La Sleeping Bags Lie, by Robert Anorak; Dogs Say the Darndest Things, ed. Gyles Brandreth; Not the Nine O'Clock News, by Ken Livingstone; It Shouldn't Happen to a Vet, by Vili Vitelva.

- Humour: A Hundred Uses for One Idea; Nag the Nine O'Clock News; How my Mummy won the Election; The Edwardian Lady's Irish Joke Book; Terry Wogan Talking; Henry Kelly Talking; Anthony Clare Listening; The Private Eye Book of Apologies; Not Another Book; The Vintage Roy Hattersley.

- Health Books: Weight-lifting with Grapefruit, by Dr Reuben Trant; Make Your Own High Fibre Clothes, by Jane Fonda; Jane Fonda's Book of Aerobic Peace Marching; The G-Spot Diet Book; Dying Makes You Stop Living, by Geoffrey Cannon; Yomp and Live! by Dr Max Hastings; The Helsinki Injury Book; The Joggling Diary of an Edwardian Lady; Getting Thinner Makes You Lighter, by Geoffrey Cannon; Lose All the Pounds You Want, by the Crown Commissioners.

- Sport: How We Lost the Ashes, by Geoff Willey; As Told to, by Geoff Boycott; How We Lost to the All Blacks, by Geoff Dilley; My Own Story, as told to Geoff Widley; The Rothmans Book of Smoking, by Geoff Warning; How We Lost the Davis, Wightman, etc Cup, by Geoff Whiffle; Why We Must Throw Away Our Javelins Now, by E.P. "Daley" Thompson; Only for the Appearance Money, by Geoff Whiddle; How We Never had the America's Cup in the First Place, by Geoff Spinnaker; The Boy's Book of Stress Fracture Injuries.

Non-Fiction

- Limbering up for World War IV, by General Sir John Hackett; God, Am I Sick of Railways, by Paul Theroux; The Edwardian Lady's Book of Truly Amazing Facts; Hello, Yes, it's me, Arthur Koestler! No, Honestly! I Am Dictating this Book from the Other Side, No Kidding! by Arthur Koestler; Across the Atlantic in a Phone Box, by Tom McNally; The Taiter Years, by Libby Purves; Talking to God, by the Editor of The Sun; The Lytton-George Melly Letters, Vol 7; The Shell Book of B.L. Moles; No, Listen, You've Got to Believe Me. This really is Arthur Koestler, Hello, Can You Hear Me? The Line Seems to be Getting Faint... Operator! by Arthur Koestler.

FASHION

Vivienne Westwood is a by-word for avant-garde London style. Anarchist and artist, she aims to turn ideas on their heads, but she is better known in Europe than back home. Guest writer Georgina Howell talks to the designer who created punk-style, dressed Adam Ant and wants to change the world

The shock of the new

Genile, fervent, scruffy, Vivienne Westwood is the image of an English missionary with a deviant vocation - to dress the civilized world in primitive warpaint.

Turning ideas on their heads is her stock in trade. Her aim is "to make the poor look rich and the rich look poor". She is, she says, an anarchist and an artist.

It is appropriate to look at her contribution this year, her wealth in the business and her fourth in the international arena, as she has just taken a major step in the commercial game by moving her production to Italy.

McLaren. "Suddenly our resources were not sufficient to fulfil the kind of orders I was getting. This country takes no account of talent - the banks won't give you the kind of financial backing you need to make your business international. Italy's different. Here all my bank manager wanted to know was whether I had a house I could mortgage. There they back talent with money and give you everything you need to make a million garments instead of 200".

While the Westwood/McLaren shop at 430 King's Road turored from Let It Rock to Too Fast to Live, Too Young to Die, to Sex and Seditionaries and currently to World's End, Westwood turned out a stream of clothes and looks unlike anything the fashion world had seen.

Her shop was where the Saturday parade down the King's Road stopped and she wanted so close to the ground it was impossible to say which was the chicken, which the egg - did the styles spring from the street or the shop? Did it matter? Her clothes became a badge for the boy who left school early to live in a London squat and for the heiress determined to stand out.

straight to Vivienne's shop to see what was cooking". Vivienne Westwood owes an enormous debt to Malcolm McLaren for getting the world to listen. If she is the artist, he is the critic and salesman, manager, promoter and exploiter of her talent.

Manager and inventor of the Sex Pistols, Adam and the Ants, Bow Wow Wow and Boy George of Culture Club, McLaren released his own LP, Duck Rock, three months ago. "For the young music is the medium", he told me. "The clothes needed the groups. Now she doesn't necessarily need the music, if her story's powerful enough. When I went into the music business no one wanted to know about the fashion connexion. Now it's the biggest plus you can have. When a pop group signs up with a recording company today there'll be a clause written into the contract that the group will have £1,000 a week to spend in clothes. The Sex Pistols got that ball rolling. As long as the group has the right look today, the music doesn't matter too much."

Although they live apart, their partnership is close. "I always thought all the ideas came from him, says Westwood today, "but I soon realised that getting the job done was the job. That's not to say he's not essential to me. He edits down on a board, sorts out the story, gives me an avenue of approach. He unscrambles my programming."

Looking Westwood: (left) Kim Sion, public relations officer to Vivienne Westwood in brown chalk striped serge jacket £150, serge knit with rolled "bandage" waist £120, Marble print shirt £56, Chico hat £20. From the autumn/winter collection "Witches" at World's End, 430 King's Road, SW10 and Nostalgia of Mud, St Christophers Place, W1, Urban Lifestyle: (right) Maroon sweatshirt jacket, print by New York graffiti artist Keith Haring, £84, Sweatshirt tube skirt with baked ink print £44, Liren "Koo" top with fluorescent lime green graffiti £30, Keith Haring scarf £24, Day glo plastic "fire" bracelet by Ted Muehling, Fashion assistant: Christine Pannell, Photographs by Suresh Karadia.

Photograph by Russ Melvins

For the last two months up to a collection, Westwood moves out of her sparsely furnished flat in Clapham and into the workshop behind Regent Street. She starts each garment from scratch, pulling cloth around her body and clipping at it from there. She uses an experienced pattern cutter, Mark Tabbard, to show her what is generally done before she works out her own approach.

"What I'm not trying to do with my clothes is to make a kind of shell that stays in place half an inch away from the body. My clothes are dynamic. They pull and they push and they slightly fall off. There's more to clothes than just comfort. Even if they're not quite comfortable and slip and

tries. The British consider themselves above fashion. If you want to design interesting clothes you must make them in a bedsit and sell them from a market stall, or go and work in a backroom at Dorothea Bis. Neither are Westwood clothes likely to sell in enormous quantities in the United States because there the rich like to look rich.

"In both countries the people who buy our clothes are the dispossessed, the disillusioned, the liberated mothers". The biggest orders come from Japan and Italy, which he finds appropriate. "Japan was for so long an isolated island that it has never got over its hunger for the status of ideas. Italy is the country of Fellini and the grand gesture. They like to mess around."

At the end of the year Vivienne Westwood will receive one of the fashion industry's highest accolades when, like Jean Muir and Zandra Rhodes before her, she will represent Britain in the Women's Wear-Daily Biannual Best of Five event in Tokyo, alongside such names as Calvin Klein of the US, Claude Montana of France and Gianfranco Ferré of Italy.

It seems that she has made a niche in the fashion establishment, and perhaps changed its point of view a little. Will she be able to keep one foot in the street and one in high fashion? If she is still getting her clothes talked about in five years time, she'll have achieved something unique. As anthropologist Ted Polhemus, co-author of Fashion and Anti-Fashion put it: "High fashion has undoubtedly gained by admitting Vivienne to their fold. Has street style lost its greatest champion?"

Outside the wacky World's End shop (left): Ann Witchard wears orange and green cotton knit top, approx £25, and tube skirt £10. Straw mountain hat £20 and rubber sandals £20. David Bracher wears cream cotton knit shorts £10 and top £25. Double-brim hat £10. Among the looks along the King's Road (right): Gene Krill knots his own chambray shirt over a graffiti T-shirt (£25) and hoicked-up trousers, rolled to reveal green fluorescent socks (beloved in the Teddy Boy era) and showing pink boxer boots. "Buffalo Boy" David Bracher works as a sales assistant in Rymans and swaps his hobo clothes for a uniform when he arrives at work. Ann Witchard in blazer/runner print skirt and top from this summer's "Punkature" collection.

The Westwood Influence: Shalamar (left) is the latest in a long line of pop groups to create its image from the World's End label. Caught here by the camera before they released their new single "Disappearing Act", on Solar Records. From the pirate frills in printed tribal clothes, the Westwood/McLaren team have worked within the music scene to become a major fashion force.

THE TIMES DIARY

Chutzpah

Naim Attalah of Quarter Books has entered God Cried written by Tony Clifton for the £3,000 H. H. Wingate Prize. What makes this noteworthy is that God Cried is a vivid eyewitness indictment of Israel's brutality in last year's siege of Beirut, and that the Wingate Prize is for the author of the book that does most to stimulate interest in Jewish affairs. Attalah, a Palestinian patriot, agrees there is scant prospect that Clifton will win. "For us it is worthwhile because at least the judges will have to look at the book and see the other point of view", he says.

Well red

Unseated MPs habitually welcome the chance to catch up on their reading. Tony Benn has arranged to get paid for it as well. He has been signed by Faber to edit its Radical Reader, a compilation of writings of the left from the Peasants' Revolt to the present day.

Goff's gaffe

Maryn Goff, director of the National Book League, has the pleasure this week of seeing one of his novels republished as a classic text. Brilliance Books, a new imprint devoted to homosexual themes, has already republished Gertrude Stein and Jean Cocteau, and on Thursday issues Goff's The Younger Director, which originally appeared in 1961. As a classic, the text is of course unaltered from the hardback original, which is unfortunate because over the intervening years Goff had forgotten that his intended ending to the book was cut by John Pudney, then editorial director at Putnam's. Goff had reinstated for the subsequent paperback, but it is missing again from the new edition. "It is strange how one forgets something that seemed so important at the time", Goff muses.

Maid to measure

The latest issue of Broadcast notes that Thames Television, an equal opportunity employer, now boasts a woman VTR editor, but that inquiries as to her identity were met with sheepish shuffling. "It appears a resident VTR editor underwent a sex change operation. It's a bit of a drastic measure to ensure a quota of women in production..."

The equality officer of the London freelance branch of the National Union of Journalists is the equally named Michael Ann Mullen.

Mal de Mel

My colleague Mel Calman has staged an Edinburgh festival exhibition of cartoons from his Workshop gallery in the Assembly Rooms. Sales are so slow that yesterday Calman took to working as a pavement artist outside, with a bat for contributions. By mid-afternoon he had raised all of 37 1/2p.

Ioned out

Some months ago I acquired on loan an ionizer from a new shop in Battersea, the Ion Age, who suggested that it be sited in the bedroom of an asthmatic sufferer of my choice. There would be, I was assured, swift and spectacular improvement in the patient's condition. Not so. In fact the device attracted pollutants, depositing them as a grimy film on nearby surfaces, while the wheezing carried on as usual. A fellow asthmatic - a much more severe case who, between trips to his oxygen cylinder, logs his condition - also found the ionizer made no difference. The Asthma Research Council confirms my unofficial findings and reckons ionizers are useless. Hard luck, Ion Age: harder luck still for hopeful asthmatics who might have bought an ionizer, some of which sell for more than £70.

From the South Lewisham Institute, I note that classes in cookery will be taken by Mrs Delicata, the short Greek course by Mrs Economou, and shoe repairs by Mr Amato. Spanish dancing, on the other hand, will be done by Mrs Rumbold, with husband Sid on guitar.

Among the victims of the war in Chad could be two species of antelope, the scimitar horned oryx and the addax. The Fauna and Flora Preservation Society is Chad-watching with particular concern because the oryx is the emblem and the addax is its quarterly magazine, adopted in 1950 for no better reason than that it was "convenient and attractive".

PHS

Give the watchdogs more bite

Alex Henney puts the case for American-style regulation of our monopoly services, whether privatized or remaining in the public sector

The electricity industry has just declared a surplus of £332m for 1982/83, pleasing the Treasury but not consumers. In New York last year, the regulatory commission ordered the private gas and electric utilities to return \$104m excess profits to customers. Monopoly services in Britain are publicly owned and rarely give anything back.

It is clear that if we are going to privatize natural monopolies they must be regulated. Ofel has been created to regulate British Telecom, and a debate is in progress on how best it should function. But some form of regulation is also needed for monopolies such as electricity, posts, and water, which are likely to remain public for a long time yet.

Franklin Roosevelt, as Governor of New York State, said that regulatory commissions were to be "the representatives of the people to see that utilities do two things: give service and charge a reasonable rate".

The commissions have a judicial power to determine issues. They base their decisions on federal and state laws, and on their own precedents. When a private American utility wants to increase its tariffs, it has to apply to the commissioners and justify the reasons for the increase in great detail. It has to go through its budget in a process that is similar to a public inquiry (but is under oath). The commission's staff critically analyses the utility's submission and, to assist their analysis, can demand any information.

The commissioners' ruling on an application gives detailed reasons for their decision, which can be challenged in the courts. They may disallow certain expenditures, such as excessive advertising or cost overruns on capital schemes that have been mismanaged, and would definitely disallow losses on activities that are secondary to the utility's main business, such as appliance selling and gas and electrical contracting. Disallowed costs are carried by the shareholders - an incentive for good management - and cannot be passed on to consumers (as happens here, without any explanation).

The rigour and openness of this process in

stark contrast to British practice. In electricity supply, the Generating Board sets its wholesale tariffs (some 80 per cent of the final price to the consumer) in secret discussions with the government and the Electricity Council, and has resisted consultation with the Electricity Consumers Council. As for retail tariffs, the London Electricity Board (and I suspect others are little different) traditionally receives a schedule showing the proposed tariffs, a sales and demand forecast, an explanatory memorandum about fuel costs and government financial targets, and a one-page budget for LEB's operating costs of nearly £200m. With such skimpy documentation, I cannot see how Board members can be satisfied that they are fulfilling their duties to promote the efficient distribution of electricity and avoid tariff discrimination.

The consumer councils have neither the powers nor, with some exceptions, the expertise to scrutinize and challenge industries' performance. In electricity, they typically spend only two or three hours a year considering tariffs, often in closed session; and show little interest in value-for-money audits. The record of government has not been much better. It has frequently been criticized in official reports for failing to monitor nationalized industries; it "asked" them to publish performance indicators in 1967, but did not follow up effectively. The Price Commission was often facile, and it was toothless. The industries, for their part, are unduly secretive and have always resisted external scrutiny.

Times are changing, and the Government is taking a more active interest in efficiency, and in making the industries more open. It has started to set performance targets for

boards, has directed the Monopolies Commission to management audit them, and is requiring them to publish better indicators. It has made the planning application for the Sizewell B nuclear power station into a major public inquiry.

But we must go further to make public boards more accountable and consumer responsive. We must abolish cosy paternalism in favour of public accountability, public performance monitoring, public scrutiny - and bonuses for managers who perform well. External board members should be given clear statutory responsibilities, including that of operating scrutiny committees, and a fiduciary duty that could be challenged in the courts. The standard required of the industries' external auditors should be raised to that now required of local authority audits, namely to report on matters in the public interest and on value for money in consumer services.

More radically, we should draw upon best American practice and set up utility commissions. They would scrutinize board performance on behalf of Parliament and consumers, and exercise limited powers of direction. They should hear applications for tariff increases in public and have access to documents, disallow expenditures that are not adequately justified, undertake efficiency studies and order boards to discontinue loss-making peripheral activities; direct the form of their reports and accounts; and rule on consumer complaints.

Given the right statutory framework, commissions would distance monopoly services from the government, getting it away from the current minutiae with which it is involved and leaving it to concentrate on major issues. We need to reduce the scope for the sloppiness, ambiguities, and confusion that have characterized relations between governments, nationalized industries, and their consumers for the last 30 years and to develop an adequate system of checks and balances.

The author is chairman of the London Electricity Consultative Council and a board member of the LEB.

Roger Scruton

To the Gulag via Helsinki

The purpose of dancing is the dance. The purpose of chatter is the chat. Human life presents countless such social occasions, in which we renounce our business, and find pleasure in the present moment alone. All time not spent in dancing or in conversation is wasted time. For these moments contain not the means of human existence but the end. The dancer and the talker are at rest - but actively at rest, rejoicing in their social condition, and at one with their fellow men.

The most valuable relations are also those, like friendship, which have no further purpose. The opposite of friendship is not hatred but crime. The criminal is the man whose purpose takes precedence over every opposing claim. He is the man prepared, through force, fraud or amplification, to discount the freedom of the other who stands in his way. He is the true enemy of peace, for he destroys the trust which makes conversation possible.

States are more like people than they are like anything else: they exist by purpose, reason, suffering, and joy. And peace between states is also like peace between people. It involves the willing renunciation of purpose, in the mutual desire, not to do, but to be.

Peace is endangered, therefore, not by the weapons of the peaceful, but by the actions of the purposeful. There exist states, just as there exist people, whose lives are structured by a purpose, and who cannot accept another's freedom as an obstacle to its fulfilment. The overriding aim is so urgent that neither the freedom nor the existence of another people can deflect it.

If the purpose is also international - involving transformations beyond the frontiers of municipal government - then peace has already been put at risk. We know this from Iran and Libya. But we ought also to have known it from the Soviet Union, a state founded upon a consuming international purpose, which has never ceased to impose its preferred political order upon unwilling recipients within its own domains, or in the domains of clients and neighbours.

Criminal law exists in order to deter the over-purposeful. But international law, which lacks the supreme coercive power of a sovereign authority, cannot exert any comparable influence. It is obeyed only because states agree to be bound by it. Of course, all states appear to be bound by international law, since there is value in sustaining this apparatus. But states with a ruling purpose cannot really be bound: they cannot be bound "in their hearts". For their hearts are ruled by something other than law, something which discounts law whenever it conflicts with the overriding idea. States which accept international law do so because it is the universal

shadow of a principle by which they already live. Thus Canada and the United States, each of which is governed by a rule of law, find no difficulty in coexisting, despite longstanding disagreements over territorial waters and disputed islands. No troops amass on their common border, no threats are made, of sanctions imposed. For a legal decision will suffice to regulate the conduct of the parties.

The mark of the purposeful polis is that it cannot be governed by law, that actual law is a pretence, which vanishes just so soon as the ruling purpose is questioned, or compromised. Such states are never truly at peace, since they are never at rest. To converse with them is dangerous; to cease to confront them yet more so.

Consider the Helsinki accords, established in order to reduce the tension in Europe. The "agreement" was twofold: to reduce military preparations, and to extend human rights. Our native politicians imagined that this agreement was genuine, and took comfort from the fact that it was "made law" by the Soviet state. What a joke! Of course it was convenient to pretend to the

A brilliant new method was acquired for identifying troublemakers. The brief pretence of legality encouraged the bravest and best citizens to come forward to attempt to secure obedience to this novel law which seemed to grant essential freedoms

agreement, and to dress it up in the bourgeois trappings of legality. Western eyes were closed for a while to the renewed build-up of armaments.

Moreover, a brilliant new method was acquired for identifying troublemakers. The brief pretence of legality encouraged the bravest and best of the citizens to come forward, to associate, to attempt to secure obedience to this novel law which seemed to grant essential freedoms. No more economical way could have been discovered of persuading the next inmates of the Gulag to give themselves up.

And, for some unaccountable reason, we are still discussing, still attempting even to "renew" this "agreement" that has so endangered us. Is it not time that we, woke up, time that we realized that we should feel bound by agreements only towards those who are able to respect them?

Paul Jennings

Class warfare on the open road

Now that car registrations have got around to A again (whatever happened to Z? Surely they didn't skip it merely because of associations with that old TV serial?) this is peak alienation time for the average motorist. And that is surely the majority of us, still paying off the loan for some model in the P to T period, wondering uneasily if the tin of petrol touch-up we finally settled for is too far away, now we actually squirt some out in daylight, from the colour which surrounds the creeping rust on the outside headlight. (And what does that idiotic little ball inside that rattles so, when we shake vigorously for two minutes, as instructed on the tin, actually do? It sounds so loose and unconnected.) We are definitely Class Three.

Class Two are the ever-diminishing number who can afford to be in the queues alleged to be waiting impatiently for the new leather, plus the evidently ever-increasing number of those who will automatically receive one from their Fleet Buyer (see Class One, below).

It is difficult enough to define our feelings about Class Two. I don't think we actually envy them. Many of us can remember the days when it was possible even for the likes of us to buy a new car, depreciating like crazy from Day One, making us worry about how long we could stay up there. How much worse it must be now they start at £4,000. At least our cars are past worrying about in that way. If we actually had £4,000 there are lots of jollier things we could do than buy a new car. We could get a garage to fix that damn rust on the existing car (engine surely good for another 30,000 miles) and take a few friends to some marvellous place we haven't seen yet (in my case, Venice). Get fitted carpet on the landing and the other bedrooms. Buy three more old cars for teenage children (even us being a taxi service). Perhaps even message Covent Garden more than once every three years.

On the one hand, if it were not for Class Two there would not be a car industry, and somehow this would affect all the other industries. We should be peasants in smocks, stared at by Japanese and even Taiwanese tourists, and England would be some-where full of lies. On the other hand, it is because of these Class Two people that we pass, on the pavements and in rows outside garages on the outskirts of cities, where land is cheaper, hundreds and hundreds of the kind of car we know in our hearts we shall have to get when this thing finally stops dead with a broken piston (and they do, they stop dead, either at 2 am, on some moor or on Saturday morning

in some bottleneck High Street); and these cars have large stickers in red or yellow luminous paint from which it is clear they start at £2,495. Only a year, and the Fleet Buyers are at it again, somehow compelling these garages to take these Vs and Ws and Xs, and now, heaven help us, Ys.

Now, one is constantly reading, or hearing on TV, about Class One, the Fleet Buyers. What feelings should we have towards them? Up to now they have always been men, of a curiously forgettable kind. Well, sooner or later, some of them, as in every other job in the world except that of the Papacy, will be women. You couldn't imagine a Mammy, but it's perfectly possible to imagine women Fleet Buyers.

The question is, have the manufacturers imagined them? Has it, for instance, occurred to them that almost all car names up till now have been classic examples of male chauvinism? Indeed, the very first one I can remember (having grown up in Coventry, in or near which were made, with the exception of Vauxhall and Ford, all British cars, which 98 per cent of British people used to buy: Standard, Alvis, Triumph, Armstrong-Siddeley, Daimler, Morris, Singer, Riley, Hillman, Humber, with Rover and Austin not far away) was the Hillman Minx. With Spiffy, the perfect image of woman as a kind of spirited toy.

Then came all the male macho names: Rapier, Jaguar, Stag, Simca, Avenger (what of, for goodness' sake? Somebody daring to try to pass you?) Following this, perhaps from an awareness that there were already women buyers, if not Fleet Buyers, a softening, down to Herald, Cavalier, Escort.

Then there were sports and resorts: Corina, Granada, Golf, Polo, one hopes against hope that when the Chinese finally export one it will be the Ping Pong. Or total mysteries, like the Passat (an expensive resort in the Atlas Mountains, known only to rich Germans).

The psychologists employed by these increasingly faceless and inter-linked giant car firms will have their work cut out to find names striking a chord in the Woman Fleet Buyer. Shall we soon be driving Atlantas, Gorniks, or the Alamo, Mogera or Tishphone (the Furica), the Virago, Termagant Six, Tigress, Regan, Lesbia, Amazon, Lady Macbeth? Or were other psychologists right all the time about the subconscious female desire to be dominated, was Maestra a brilliant anticipation? It will be long after 1984 when we Class Three get to know.

As the dust of Lebanon settles, diplomatic victories on all fronts

Israel at last comes in from the cold

Jerusalem In New York last Friday, Avraham Ben-Yosef, the Israeli Defence Ministry's adroit representative to the United States, put his signature to a \$2,700m arms deal which will ensure Israel the delivery of 75 ultra-sophisticated F-16 warplanes.

The little-publicized signing ceremony was significant not only because of the size of the deal - the largest ever negotiated between Israel and the US - but also for its symbolism. At the Foreign Ministry in Jerusalem, it was viewed as conclusive proof that Israel has shaken off the status of diplomatic pariah which resulted from the war in Lebanon.

Soon after Israeli tanks rumbled north on June 6, 1982, the impending F-16 deal was indefinitely frozen on the instructions of President Reagan. The decision to allow it to proceed was taken in Washington soon after May 17 this year, the day that Israel signed the pact with Lebanon which has proved the key to its escape from diplomatic isolation.

"Although the agreement has never been implemented, or even ratified by the Lebanese government, it was seen around the world as evidence of our good intentions," explained an Israeli official. "The mere fact that we had signed our second pact with an Arab neighbour made a lot of governments look at us in a different light."

In addition to the agreement - which is destined never to come into operation until Syria agrees to leave Lebanon - the departure of reserve General Ariel Sharon from the Defence Ministry, and the ambitions of Colonel Gadaffi of Libya, have also helped the Begin government stage its diplomatic comeback.

This is now being demonstrated with the arrival of Liberian President Samuel K. Doe, the first African head of state to visit Israel since 1971, two years before 26 African countries broke their diplomatic ties in protest over the Yom Kippur war.

Although the Israelis do not regard the former sergeant as one of Africa's leading statesmen, they see his willingness to travel here with six government ministers and a well signalled intention to clinch a military deal as evidence that the diplomatic tide in Africa is beginning to turn in their favour.

One of the factors influencing Liberia's recent decision to resume diplomatic relations was Israel's promise to use its political clout in Washington on President Doe's behalf. It is now hoped that others of the eight black African states which originally indicated they would follow the example set by Zaire just a month before the Lebanon invasion will return their ambassadors before the end of the year.

A few weeks ago, Yitzhak Shamir, the Foreign Minister, held secret talks in Europe with President Felix Houphouët-Boigny, the septuagen-

arian leader of the Ivory Coast, and there have been a string of similar clandestine talks with representatives of the other countries on which Israel is now pinning its hopes in Africa. These include Nigeria, Togo, the Central African Republic, Kenya and Senegal.

Although the markedly improved relations with the US are seen as the most important by-product of the Lebanon agreement, there is also satisfaction at Israel's improved diplomatic standing in Western Europe.

This was most clearly manifested in June when the EEC collectively renounced the economic sanctions imposed after the invasion of Lebanon, including a prohibition preventing the financially hard-pressed Israeli government securing loans on preferential terms.

Two more concrete examples of Israel's return to favour were the decision of Chancellor Helmut Kohl of West Germany to make what is certain to be a controversial visit to Jerusalem this month and the move by Iberia, the Spanish national airline, to open a direct route to Tel Aviv in July.

This is regarded by Israeli

diplomats as a precursor of the opening of full diplomatic ties with Spain. To support their optimism, they cite recent visits here by a number of leading Spaniards and the appointment of an unofficial Israeli representative in Madrid.

Even in Eastern Europe, Israeli diplomacy has scored a success with last week's visit to Bucharest by Mr Shamir and the promise of improved trading ties between Israel and Romania. "Who would have thought that a year to the day since the heaviest bombing of west Beirut, our minister would have been warmly welcomed in a communist capital", remarked one member of the Israeli party.

Amid the current diplomatic euphoria, Egypt still refuses to return the ambassador withdrawn from Tel Aviv last September. As President Mubarak continues his efforts to reassert Egypt's traditional influence in the Arab world, the Israelis see little chance of any immediate thaw in what they now describe as "the cold peace". Their one consolation is that they also see no real danger of the Camp David treaty being revoked by Cairo.

Christopher Walker

Rocking to rule with a Christian superstar

Budapest In heaven, a special table must surely be reserved for those who have become the subjects of jaunty musicals and heavy rock operas. Eva Peron and Che Guevara, Elvis Presley, draft dodgers, deaf-and-dumb pinball players: nobody, it seems, is safe from posthumous trial by ooze. For no apparent reason, lights flash, guitars thrub, lasers laser and grown men dressed in costume ride horses across ice rinks.

Until last weekend King Stephen of Hungary was simply the man who established Christianity in his country. He was crowned on Christmas Day in the year 1000, received the blessing of the Pope and, in due course, was canonized. Later, on his feast day, King Wenceslaus went out and gathered winter fuel, providing useful material for a Carol. That was about it: a good pedigree, a decent sort of life.

Now Stephen has become the hero of a rock opera, Hungary's first. Stephen the King written by the rock musician Levente Szoranyi and the lyricist Janos Brody, has just been performed for three days in Budapest.

Actress Eniko Toth provided the love interest and costumiers ran up several pairs of tight trousers for King Stephen's stage meeting with the Pope. The show was neither worse nor better than dozens of

similar extravaganzas. Now the whole thing will be recorded at a new studio on the outskirts of the city.

The opera illustrates the competing trends in the official approach to rock music in Eastern Europe. One trend takes its measure from Moscow where the new Andropovian ideological message is: protect the young, steer them in "progressive" directions, be vigilant against western decadence, take off your Pink Floyd T-shirts. In Moscow some rock bands - notably The Peddlers - have been banned, others reprimanded for disturbing traditional Russian tunes. In Poland, punk bands such as Perfekt have been barred from appearing, the group SS-20 has been told to change its name, and lyrics are regularly censored.

The other trend is dictated by economics: hard currency is at a premium and some groups can sell their products abroad. These are tolerated. Even western groups such as Nazareth have been allowed to perform in Hungary - providing that a suitable deal is reached. In the case of Nazareth, the performance - in the Budapest hills - will be filmed, and will feature in an American-Hungarian horror film to be marketed abroad. It is financed by British money.

Stephen the King is an extension of this trend. Rock operas, East European planners have decided, are exportable. Thus the director of theatre of the Lenin Komsomol in Moscow is planning to take his successful rock opera Janona and Awos to the west. According to businessmen who are involved in the transaction, the show meets the highest western standards of saccharine.

The story stars a Russian nobleman who in 1812 sails to California and falls in love with a 15-year-old girl. He returns home to seek the approval of the Tsar for marriage but dies en route in Siberia. The girl, who hears nothing from him for 35 years, goes into a convent and dies there, never betraying their love.

Stephen is not quiet as bad but it too shows a concern with the past, a sense of national continuity that precludes socialism.

Despite Soviet strictures to its youth, domestic demand has to be satisfied in some way. Rock music comes over the airwaves via western radio stations and detente opened up the East in a way that cannot easily be closed. New studios just completed outside Budapest - at a cost equivalent to £600,000 - are designed to release pop and rock music for young Hungarians under four labels. The studios will have an

### LENDER OF LAST RESORT

Aid to poor countries has never been free of controversy, but rarely has the debate been as heartfelt as it is now. While the poorest countries feel the onslaught of the world recession most keenly, the rich are suffering an acute attack of what Mr A. W. Clausen, the president of the World Bank, has colourfully called "aid fatigue."

IDA is the concessionary loan arm of the World Bank, lending to the most indigent peoples on the most generous of terms. Since its formation in 1961 it has gained general respect for the efficiency of its programmes, and is widely regarded as the best run multilateral aid agency. Even IDA's powerful critics in Washington accept that its funds are not wasted.

But that recognition has not prevented the American administration from announcing that its contributions to the seventh round of IDA funding, due to start on July 1 next year, will be severely cut. If, as it says, these contributions are reduced from about \$1,000m a year to \$750m, other countries would normally lower their contributions as well because they are supposed to reflect relative economic size. So the total funding for IDA might fall from \$1,200m, the level for the past four years, to \$900m in nominal terms. In real terms, of course, the reduction would be much more.

The US administration, which is antipathetic to aid, is suspicious of IDA because that body is largely bipartisan. Congress believes that IDA lends too much to countries hostile to the United States, and prefers the tighter control conferred by bilateral assistance. So adamant has the administration been that

IDA is very worried that the \$16,000m it believes to be the minimum necessary may prove unobtainable.

Broadly speaking, the other major donor countries favour a larger IDA than that implied by the United States, and Japan has offered to raise its percentage share. Time is running out for an agreement to bring IDA 7 into operation by the middle of next year.

There is a strong case for sustaining IDA. Not only is it an effective organization, but it is hard to replace. Because its loans are over 50 years and carry no interest, the net disbursements are very high. For countries such as those in sub-Saharan Africa which depend heavily on IDA a shortfall in assistance could be painful. It is most unlikely that other agencies would step into the breach, given the general reduction in aid budgets, and these are hardly the countries to be favoured by commercial banks already dangerously exposed in Latin America.

Sustaining IDA does not necessarily mean supplying the full amount its officials are asking for. If it were to continue to be funded at \$12,000m there would be less in real terms than for IDA 6, even before China, a new IDA member, is taken into account. But there are two things IDA could do to mitigate the reduction. One is to change the eligibility criteria for borrowing from IDA. The American Administration, for example, argues that India, the biggest recipient, is now in a sufficiently healthy state to raise substantial loans on the market, which has not been its practice. India should not lose all eligibility - it is easier to raise bank finance for some projects than for others. But a partial graduation from IDA would free funds for China.

A second course is for IDA to reconsider the terms on which it

both raises and dispenses money. Under its charter, IDA is allowed to borrow commercially, from members and from the markets. It could borrow at subsidised rates from members, and would certainly command the finest rates in the market. Conversely, this would imply charging more for loans. Maturity might be shortened, say to 30 years for the "blend" countries, which also borrow from the more expensive World Bank, and IDA could even charge nominal interest, depending on the recipient's circumstances.

So far, however, the IDA management has been unwilling actively to explore these possibilities. Those countries that recognize the virtues of a strong and well-funded IDA should be encouraging debate and providing the leadership partly abdicated by the Americans. Britain has an important role to play. Some 70 per cent of this country's contribution to IDA goes to Commonwealth members, and for every pound contributed Britain receives two in orders. British support for IDA was demonstrated last year when IDA 6 was extended by a year after Congress blocked payments.

Britain, in common with other wealthy countries, suffers from budgetary constraints. The Government prefers bilateral assistance, but is committed to multilateral aid through the European Development Fund and the Lomé Convention, which is due to be re-negotiated next year, as well as IDA and the World Bank. But sustaining IDA at a reasonable level does not appear impossibly expensive, and is some contribution to stability in a fractious world. IDA and millions of the very poorest would benefit if the British government were to show that it is not incapacitated by aid fatigue.

### DEATH IN MANILA

The full impact of ex-Senator Aquino's assassination while leaving a plane in Manila under armed guard must await the investigation promised by the government. It has been a shocking reminder of the violence that has never been absent from Philippine political life. Mr Aquino's own description of his rival President Marcos conveys the style: "a very calculating man, who would rather persuade before he bribes, bribe before he threatens, threaten before he arrests, arrest before he kills."

Even allowing for this violence, the known circumstances are incredible enough. In July, two months after Mr Aquino had announced his intended return, with or without a passport, he was given a message from President Marcos warning him that there were men after his blood and that the government needed more time to "neutralize" these agents of revenge, otherwise Mr Aquino might suffer.

On the face of it President Marcos will be the stronger from the death of a formidable political rival. Yet it did not seem that Mr Aquino's return to political life would have been as

successful as he hoped in uniting the opposition to the President. In that case his martyrdom may not unite or invigorate the opposition either. The incident may nevertheless damage President Marcos. A man whose first aim at all times has been to keep himself in power, changing the constitution, imposing martial law, fixing elections in the many ways tried by local tradition, building up his personality, exploiting his wife's varied abilities and rewarding his carefully chosen henchmen must expect that after eighteen years his magic will begin to lose its sheen.

Public feeling may be so much jolted and shamed by what has happened that, whatever the explanation proffered, a shift away from President Marcos will be accelerated. Already this has been set in motion by disappointment over the economy. In many other ways the glamour attaching to the President has not much life left in it not enough, perhaps, to carry him through the four years left of his current term.

Some such opinion seems to be gaining ground in Washing-

ton. The large American naval and air bases in the Philippines make it the most important country in south-east Asia in American consideration. If there is to be change it had better not be sudden or unforeseen, such as was the Shah's catastrophic dismissal in Iran. Relations with President Carter were cool because he made much of human rights; President Reagan has been full of warmth for President Marcos as a sound ally. Some distancing from this uncertain leader has been suggested and may now be urged more strongly, especially as the agreement for American bases is due for renewal next year.

There are other sources of generalized criticism of President Marcos that carry weight. When he visited the Philippines in February, 1981, Pope John Paul said pointedly that the exigencies of state should not take precedence over human rights. Since that visit the Roman Catholic church in the Philippines has been more and more critical of the way in which President Marcos uses his dictatorial power. Mr Aquino's death will have its reverberations far beyond the Philippines.

### A RAT TO THE RESCUE

It is easy to be superior about the reasons for the turn-around in the fortunes of TV-am's *Good Morning Britain* programme. It has recovered from the depths of despair at weekday peak viewing figures of 200,000 in the spring to 1,600,000, 400,000 more than its rival, the BBC's *Breakfast Time*. Dying with Miss Diana Dors, pop videos and cartoons are clearly what people like at that time of day. And who, in a free society, can complain if such harmless wants are gratified?

The hero of the revival at Camden Lock is Mr Greg Dyke who was brought in from *London Weekend Television* to lead the station from the brink of ruin. But its symbol is Roland Rat, an engaging creature with a Black Country accent. His snappy chat, interspersed with children's cartoons, draws TV-am's peak audience at nine o'clock in the morning. He even manages to incorporate into his routine Mr Peter Jay's "mission to explain" which so impressed the Independent Broadcasting Auth-

ority before awarding its breakfast television franchise.

Last Friday, for example, Roland, who travels the high-ways and by-ways in an old 1950s Ford emblazoned with the crest "Rat on the Road", was visiting Blenheim. He found time to put right the intellectual shortcomings of his foil, Kevin the Gerbil, who insisted that the most famous baby to be born at the Palace, Sir Winston Churchill, had been a king. With a quick quote from the old warrior's "Never in the history of human conflict" speech, Roland told Kevin that Sir Winston had been a "Primo Minister" (sic). With a bit of gratuitous criticism of Shakespeare for having written his sonnets with lines the wrong way round, the furry duo were back on the road.

As Mr Dyke clearly appreciates, the British have always had a weakness for showbusiness animals like Larry the Lamb with his cracked, clubland accent, Flanders and Swann's Gnu, birds or even insects as witnessed by the enduring popularity of Mr Arthur Askey's busy

bee. The weakness is doubtless shared by the "Good and Great" who make up the IBA, but they cannot be entirely happy at the manner of TV-am's renaissance. Despite Roland's skill as a historian and literary critic, his output bears no relationship to the original prospectus submitted by Mr Jay and the "Famous Five".

The IBA has a duty under section 3 (1) of the Television Act, 1954, to satisfy itself that "programmes maintain a proper balance in their subject matter and a high general standard of quality". When Mr Dyke rode to the rescue, there were fears that he would take an exclusively low road to recovery. This he has done. The IBA, no doubt, is mightily relieved that it is not faced with a bankrupt, no-hope television station. The story of Camden Lock has shown that the IBA has both failed in its statutory duty as the public's guardian of quality and that it has no influence, despite the power of the franchise, for shaping public taste.

### Nameless JPs

From Mr A. J. M. Baldwin  
Sir, The real problem is surely this. No one seems to expect the names of justices to be given to defendants for obvious reasons, but some expect the names to be given to newspaper reporters. Reporters only want the justices' names so that they can publish them in their newspapers. As some defendants presumably read newspapers, a court which gives the names of justices to the

press is indirectly giving them to defendants.

Over the years I have found that justices are generally not unhappy about their names being given to the press - with the possible exception of the magistrate who had his café burnt down on a number of occasions by a dissatisfied "customer" - but I have also found that when the problem is pointed out to reporters they are normally prepared to avoid putting justices at risk unnecessarily, and their account of

the proceedings is none the worse for omitting the chairman's name.

In any event the press must be aware, even if the defendant is not, that the decision the chairman announces may not accord with his or her own view; he or she is simply expressing the decision of the court. Yours faithfully, ALAN J. M. BALDWIN, Clerk of the Justices, Magistrates' Court, Harworth Road, Middlesex.

### Privatization and social needs

From Mr G. C. Ingram  
Sir, I refer to your leader (August 17) on the privatization of nationalized industries. In my opinion, your reasoning results in a misleading conclusion since you apply economic criteria to a situation that must be considered in a wider social context. Therefore the danger is not so much in "failing to think through the purpose of privatization", more in forgetting one of the purposes for nationalization, namely, total public benefit.

I agree that the ultimate benefit to the community is what matters. However, to measure this solely in economic terms prolongs the confusion that has existed since 1948. The concept of marginal cost pricing, so bravely proposed in the 1967 White Paper (*Nationalized Industries: A Review of Economic and Financial Objectives*), was generally abandoned in 1978 (*The Nationalized Industries*, Cmd 7131) as being unworkable.

Some people have argued that social benefit can be measured by a "willingness to pay" (R. Turvey in his book, *Economic Analysis and Public Enterprise*) but this also evades the complexities of the situation.

This letter is not intended as justification for maintaining unprofitable operations and a quiet life, or for resource misallocation. It is a plea to consider privatization with a social conscience rather than simply political rhetoric.

The elimination of loss-making sections of the nationalized industries simply because they do not, or cannot be made to conform to marginal cost pricing will certainly lead to a "massive and irreversible change" - to the nation's detriment. Yours faithfully, G. C. INGRAM, 15 Belhaven Terrace Place, Glasgow, August 18.

### Facts come first

From Dr Cyril S. Smith  
Sir, In your leader, "Facts come first" (August 9) you suggested that this council might be commissioned to conduct research to provide "models of the welfare state and its finances in the 1990s built on a variety of economic assumptions".

You have since published letters from two correspondents (August 16 and 17) applauding this proposal. Let it be clear that this council would welcome most commissions of this kind, from Government or elsewhere.

But it should be known that even with our depleted resources (our funds from Government have been cut by 30 per cent over five years) SSRC is already funding a number of important research projects aimed at providing just such facts as you rightly call for.

SSRC has helped to set up the Technical Change Centre, and is doing long-term support to the Centre for Health Economics at York University and the Centre for Labour Economics at LSE, to name only three of a number of study centres that have valuable contributions to make to this debate. It is not "too much to ask" the SSRC to back such work (as one of your correspondents puts it) - this council has been actively seeking out and supporting good research in these areas for a long time. With more money, of course, more could be done. Yours faithfully, CYRIL S. SMITH, Secretary, Social Science Research Council, 1 Temple Avenue, ECA, August 17.

### Belt-pinching

From Mr Oliver Smedley  
Sir, As a former director of First Garden City Limited, the company which owned the freehold and developed the town of Letchworth in accordance with the enlightened vision of Ebenezer Howard, I was as depressed to read of the Luddite invention of the National Trust to fight any Government policy which threatens to "nibble" at the green belt as I was uplifted to read of the rejection on ecological grounds of plans to develop the Gunnersbury Triangle.

The green belt idea is out of date and fundamentally wrong in principle. What are required in cities are green centres. Without its parks, its commons, its squares, its gardens and, of course, its river, London, for instance, would be uninhabitable by civilized human beings.

The excessive pressure on the limited amount of building land caused by the green belt policy brought about the postwar tower block scandal, accompanied, of course, by enormous profits for land speculators and developers. Yours faithfully, OLIVER SMEDLEY, Garden Cottage, Duck Street, Wendens Ambo, Saffron Walden, Essex, August 8.

### Athletic hybrid

From Mr Tim Healey  
Sir, I am sure I will not be the only correspondent to condemn the term "quadrathlon" for the proposed series of athletic endurance (report, August 19). The Latin prefix goes ill with the Greek suffix. Can *The Times* at least refer to it as a "tetraathlon"? Yours sincerely, TIM HEALEY, Northfield, Salisbury Street, Barmley, South Yorkshire, August 19.

### Soviet imperial burden to be welcomed

From Mr Correlli Barnett  
Sir, Your leading articles (August 18, 19, 20) on Soviet imperialism and on the British contribution to the defence of western Europe need to be read as related essays on "total strategy" and as such I find them flawed and unbalanced.

To take the question of the Soviet Union first, of course we must accept that the leadership of the Communist Party of the Soviet Union can never rest easy while any independent centre of power or thought remains in the world to challenge their own minority domination and closed intellectual system within the Soviet Empire under the flag, and the larger imperialist sphere of control in eastern Europe.

That is inherent in the origins of the party as a conspiracy for the seizing and holding of power, in the nature of the coup d'état by which it succeeded in the first aim, and the entire process since 1917 by which it has pursued the second. But do not let us give way to an undiscriminating alarm at Soviet efforts to extend the red on the map of the world, out least by building a high sea fleet.

Such extension does not necessarily mean an enhancement of Soviet power, and may well mean strategic and economic over-extension, and hence weakness. This was certainly the case with the British Empire and British imperialism by the 1920s and 1930s when, from an inadequate power base of a stagnant and backward economy, Britain had to provide for the defence of the Empire from Europe to the Far East.

As you will know, Sir, the main theme of strategic debate within Whitehall in that era lay in the insoluble puzzle of how to defend an indefensible Empire, given the national myth that the Empire buttressed British power rather than drained it. Indeed that "pink ooze"

map" served as psychological compensation, a delusive mask, for Britain's true position as a second-rate economic power.

I am convinced that similar considerations apply to Soviet Russia today, perhaps even more so since the Soviet leadership is electing to carry an enormous military budget on the back of what even Andropov acknowledges is virtually a third-world economy. Let us therefore guard our vital strategic interests, while taking pleasure in the strain induced in the Soviet system by its attempts to play the role of superpower.

You do acknowledge that western Europe is indeed a Western and British vital strategic interest, but your proposals for defending it appear to have been drafted by Neville Chamberlain's ghost. Our allies are to provide the main defensive cover on land, while we enjoy the softer options of air power and sea power, coupled with a "reserve" role on land.

BAOR as a reserve held back in Germany is only one stage from being held back in Britain (which would not be unwelcome to the "blue water" school in Whitehall); a return to the BEF of 1914 and 1939, and a return also to the politically disastrous sponginess of the British commitment to European defence before 1914 and again before 1939.

The withdrawal of BAOR from a "first-day" battle-front role in Germany would surely be militarily and politically to pull away one of the essential props of the whole Nato structure. Even Neville Chamberlain had to admit in the end that the security of western Europe was the bedrock British interest.

Yours faithfully, CORRELLI BARNETT, Churchill College, Cambridge, August 20.

### Dispute over Belize

From Dr Victor Bulmer-Thomas  
Sir, The old story that Churchill did not know where Guatemala was, referred to by George Walden in his recent feature on Belize (August 12), must surely be incorrect; as a correspondent in Cuba during the Spanish-American War, he could not fail to have known its location. One suspects that the story is repeated so often in order to conceal the ignorance of other, less informed, journalists!

This, I fear, may be true in the case of George Walden. His interpretation of the Anglo-Guatemalan dispute over Belize (formerly British Honduras) involves several serious errors and appears to have drawn the wrong lessons from the dispute with Argentina over the Falkland Islands.

The dispute with Guatemala and the Anglo-Guatemalan Treaty of 1859 involves much more than the construction of a road. Any scholarly work on the subject (and there have been several) will confirm that the British position on the Belize settlement was tenuous in international law and the 1859 treaty involved a substantial cession by Guatemala. The treaty was not "denounced" by Guatemala; its sequel, the 1863 convention, was not ratified by Great Britain as a result of delays in the Guatemalan side.

Nor is it fair to claim that the 1981 heads of agreement were "nursed down" by Guatemala's leaders. The failure of the heads of agreement was due as much, if not

more so, to the Belizean Prime Minister's intransigence over what in retrospect were very minor concessions to Guatemala.

As long as the dispute continues, British troops will be needed in Belize. Their presence, however, should be determined not by Washington's strategic interests in Central America (as suggested by Walden), but by the possibility of an invasion from Guatemala. This should not be used as an excuse by either Great Britain or Belize for not reaching a settlement with Guatemala; despite Walden's remarks, the Belizean economy is extremely fragile and long-term, socially desirable investment is impeded by Guatemala's claims.

The disputes over both Belize and the Falkland Islands make clear that the problems will not simply "go away". In both cases, the claims of ex-Spanish colonies have been pursued irrespective of the nature of the government to power. Unlike Argentina, however, Guatemala has shown a great deal of flexibility in recent years despite the turmoil of its own internal politics.

The need, therefore, is for a swift and skilful diplomatic solution to the problem, a solution which will become more difficult if the presence of British troops is defended on grounds other than Belizean security. Yours faithfully, VICTOR BULMER-THOMAS, University of London, Queen Mary College, Mile End Road, E1, August 15.

### Body and mind

From Dr Andrew Millar  
Sir, There may be substance in the articles of Ruth West and Brian Inglis, but their arguments were substantially based on erroneous and sadly misinterpreted evidence. For example, the large pilot on August 9, stated: "Treatment for asthma has been proved useless". This is simply untrue.

The subsequent text is less misleading and restricts its criticism to the treatment of severe (life threatening) asthmatic attacks, but nevertheless takes the clear and honest article from the *Lancet* out of context.

Opren is chief witness in the curd dismissal of treatment for arthritis. Side-effects of anti-inflammatory drugs are well recognised, but the benefits far outweigh them. Opren is an effective agent which generated its own popularity; the recognition of its fatal side-effects was a tribute to those who monitor prescribing, but its failure to adequately detract from the value of other drugs. I think that "needles in meridians" are unlikely to alter the course of any acute inflammatory process, but if someone can show me otherwise, and the experiment would be simple, I am ready to be convinced.

Your authors plumb the depths when they write "how useless and often lethal conventional treatment of heart disease is" and attribute this to Professor J. R. A. Mitchell's excellent review of the treatment of myocardial infarction. Mitchell did not discuss any other aspects of heart disease apart from infarction. Nowhere in his keenly critical appraisal of what we actually know did he say that conventional treatment was useless or lethal. He did point out that high technology medicine and surgical intervention had been disappointing.

Mr Kingdon's suggestions for special features, *Private Funeral and Blood and Guts*, might well have a cathartic effect. As a milder emetic all TV news editors should be obliged to recite daily Cranmer's famous words: "From plague, pestilence, and famine; from battle and murder, and from sudden death, Good Lord, deliver us." There are other things happening. Yours faithfully, ROY MCKAY, 64 Thomas More House, Barbican, EC2, August 20.

Frankly either you're ill or you're out. If you're not ill, you can still feel up or down, well or out so good. People get rid of these feelings in different ways: some people cut down on drink, some take fresh air, some a change of scenery. If people wish to accomplish the same thing by seeing an acupuncturist or a homeopath, that is fine by me. But, if I get crashing heart failure, a loop of gangrenous bowel or a fractured femur, I want to see a doctor at the front door of the hospital.

Yours faithfully, ANDREW MILLAR, Hetherston, Benson, Oxford, August 15.

### Grief-smitten

From Mrs Joyce Martin  
Sir, How apt that on the day following the announcement of the BMA's enquiry into alternative and holistic medical fields we should hear (report, August 20) of the very happy recovery of Mr Willis's sight, resulting from what must surely be one of the simplest forms of alternative medicine [a playful blow on the head from a plastic bucket]. Yours faithfully, J. S. MARTIN, HERNANUS, Hillwood Grove, Hutton, Essex, August 20.

### Monster sponsor

From Mr K. C. Banks  
Sir, Your leading article this morning (August 15) on the Loch Ness monster has opened my eyes to the danger that might be taken over, or sponsored, by the polite phrase is like cricket (by cigarettes) rugby football (by insurance) the Oxford and Cambridge boat race (by bookmakers) football (in miles) and other great national games and sports. May I suggest the answer is a short Act of Parliament which would rule Nessie Crown property the property of the Queen of Scotland? This would mean that the killing, capture, molesting, or even the exploitation of the monster could be treason, a crime for which the penalty is still death. Indeed, under Scottish law, it is probably more severe than that. I am Sir, in defence of the monster. Yours faithfully, KENNETH BANKS, Willow Grove, Yalding, Nr Maidstone, Kent.

### Religion and the TV ratings

From the Director General of the Independent Broadcasting Authority  
Sir, Your leader in today's edition (August 18) suggests that there had been no debate before the IBA took its decision to move part of Sunday religious programmes on ITV to 2pm. That is not the case. The pros and cons of the simultaneous scheduling of religious programming on BBC and ITV has been discussed between the broadcasting authorities and the churches for many years. Even with the new arrangements, 35 minutes of religious programming will still be scheduled "back-to-back" on Sunday evenings between 6.40pm and 7.15pm.

The IBA was well aware of the departure from precedent when it decided to accept the ITV companies' proposal and therefore to decline the contrary advice of the Central Religious Advisory Committee. The IBA had recognised, however, that the 6pm placing, however attractive it might seem in theory, was not actually drawing audiences in very impressive numbers.

This might have been the result of the programmes' own content, but it was also in part the result of intense competition from the BBC. Independent television is a wholly self-financing service, bearing the precise burdens of sustaining Channel 4, which is also providing religious programmes regularly. It cannot overlook the realities of its commercial situation.

The IBA has said this change in scheduling will be reviewed in the spring of next year, following further discussions with the churches. Whether the BBC chooses to alter its arrangements for the placing of its Sunday religious output is a matter for the corporation, but the licence fee does offer a measure of protection not available to the ITV companies and no doubt the BBC will have that in mind in deciding its course of action.

We know that our decision has troubled the churches, but the IBA cannot ignore a changing situation of intensifying competition. The composition of schedules is inevitably undergoing changes as audiences become increasingly free to determine schedules for themselves, having the ability to hire or record programmes.

This presents a great dilemma for the broadcasting authorities charged with protecting the public interest with, in the IBA's case, an inescapable recognition that the power to direct companies' output in particular directions is bound to be influenced by the need to ensure the companies' continuing financial viability.

Yours faithfully, JOHN WHITNEY, Director General, Independent Broadcasting Authority, 70 Brompton Road, SW3, August 18.

### At risk of repetition

From the Deputy Managing Director, BBC Radio  
Sir, I enjoyed reading Sir Roy Strong's light-hearted assault on Radio 4's repeat policy last Saturday (feature, August 13) and I particularly savoured his idiosyncratic extension of the term to cover both trailers and programmes that exploit our unrivalled archival resources. I would have thought it ill become a museum director to suggest that the latter should be left gathering dust. Even the V and A's basement wares get displayed from time to time - and very attractively too.

By his own confession, however, Sir Roy is a passionate devotee of Radio 4 and for this I owe him a straight answer to your straight question. In the year 1978/79 repeats formed 20 per cent of the total network output. Five years on, in 1982/83, the figure was - 20 per cent. No dramatic increase there. Could it be all in the mind?

Of course some people may argue that 20 per cent is too much. We find, however, that more listeners who cannot be permanently glued to their sets - not even while writing the topiary - are grateful for a chance to catch up with what they have missed.

Finally, may I reassure Sir Roy about the news? Today's headlines are the stuff of tomorrow's history and this, as we all know, has a sneaky tendency to repeat itself without any help from BBC planners. Yours faithfully, CHARLES McLELLAND, Deputy Managing Director, BBC Radio, Broadcasting House, W1, August 15.

### Monster sponsor

From Mr K. C. Banks  
Sir, Your leading article this morning (August 15) on the Loch Ness monster has opened my eyes to the danger that might be taken over, or sponsored, by the polite phrase is like cricket (by cigarettes) rugby football (by insurance) the Oxford and Cambridge boat race (by bookmakers) football (in miles) and other great national games and sports. May I suggest the answer is a short Act of Parliament which would rule Nessie Crown property the property of the Queen of Scotland? This would mean that the killing, capture, molesting, or even the exploitation of the monster could be treason, a crime for which the penalty is still death. Indeed, under Scottish law, it is probably more severe than that. I am Sir, in defence of the monster. Yours faithfully, KENNETH BANKS, Willow Grove, Yalding, Nr Maidstone, Kent.

# COURT AND SOCIAL

## SOCIAL NEWS

The Prince of Wales, patron, the Royal Opera House Development Appeal, accompanied by the Princess of Wales, will attend a concert to be given by Mr Placido Domingo, in aid of the appeal, at the Festival Hall on November 7.

The Prince of Wales, Colonel Welsh Guards, accompanied by the Princess of Wales, will attend a service to dedicate a plaque to those

lilled in the South Atlantic Campaign in the Guards Chapel, Wellington Barracks on November 9.

The Prince and Princess of Wales will attend the Festival of Remembrance at the Albert Hall on November 12.

The Prince of Wales, Colonel Welsh Guards, will attend a regimental Remembrance Sunday service in the Guards Chapel, Wellington Barracks, on November 13.

The Prince of Wales will visit the IBM factory at Greenock, Renfrewshire on November 23.

## Forthcoming marriages

Major A. T. Cundy and Mrs E. E. Blackthorn

The engagement is announced between Archie Condy, of Coleraine, Wiltshire, and Elizabeth (Buffy) Blackthorn, of Quoin Cottage, Biddestone, Chippenham, Wiltshire, widow of Major B. A. Blackthorn, MC, and younger daughter of Commander and Mrs A. A. Humphreys, of Elm Lodge, Biddestone.

Mr A. F. Haggis and Miss E. T. Malone

The engagement is announced between Andrew, son of Mr and Mrs D. C. F. Haggis, of Moor Park, and Eileen, daughter of Dr and Mrs P. C. Malone, of Mossley, Birmingham.

Mr J. C. James and Miss L. E. Aldridge

The engagement is announced between Jonathan, son of Cdr and Mrs A. D. James, of Boars Head, Sussex, and Lucy, daughter of Mr and Mrs K. E. Aldridge, of Newton Abbot, Devon.

Mrs G. V. Favell and Miss A. C. Laird

The engagement is announced between Giles, younger son of the Rev R. J. and Mrs Favell, of Aberystwyth, South Wales, and Angela, youngest daughter of Mr and Mrs Jack Laird, of Scampton, Lincoln.

Mr S. D. E. Peppiatt and Miss E. R. H. Kendall

The engagement is announced between Stephen, eldest son of Mr and Mrs Hugh Peppiatt, of Wimbledon, London, and Karen, eldest daughter of Mr and Mrs John Kendall, of St John's Wood, London.

## Marriages

Mr J. C. Bickley and Miss H. M. Perrott

The marriage took place on August 20, 1983, at St Margaret's Church, Westminster, between Mr John Charles Bickley, eldest son of Mr and Mrs F. Bickley, of Highgate, London, and Miss Hilary Margaret Perrott, only daughter of the late Mr I. B. Perrott and Mrs R. Perrott, of Charlbury, Oxfordshire.

Latest wills

Latest estates include (net, before tax):

Akhermatov, Mr Francis Bonifacio Maria, of Breukelen, Holland, estate in England and Wales £1,081,462

Baldock, Mr Richard William, of North Chantry, East Sussex £481,613

Bartlett, Mrs Constance Alice, of Folkestone, Kent £321,349

Bradford, Mrs Kathleen Winifred, of Washington, West Sussex £373,805

Collins, Sir David Charles, of Sidmouth, Devon, chairman of Westland Aircraft 1970-77 £383,332

Mr P. D. M. Ellis and Miss M. J. McLeod

A service of blessing was held on Wednesday, August 17, at All Saints' Parish Church, Wimbish, near Saffron Walden, after the marriage of Mr Peter Ellis and Miss Marie McLeod.

Science report

Electronic sensor 'safer than diabetic's syringe'

By Clive Cookson, Technology Correspondent

Scientists at the Cranfield Institute of Technology and Oxford University have developed an electronic sensor which automatically records blood glucose levels.

Their goal is to link the device to a miniature insulin pump that could be implanted in diabetics as an artificial pancreas, putting an end to the unpleasant and slightly hazardous chore of daily insulin injections.

The glucose sensor is an early example of a new type of "biosensor" being developed at several research laboratories around the world. They measure concentrations of biologically important molecules directly, with a special electrode incorporating an enzyme.

The Cranfield/Oxford team uses a carbon electrode coated with the enzyme glucose oxidase. It records the flow of electrons as the glucose (the main blood sugar) is oxidized by the enzyme.

Their prototype blood sugar sensors are beginning clinical tests at Guy's Hospital, London. They are small strips which measure glucose concentrations within 20 seconds, using just a tiny pin-prick of blood.

These first generation electronic sensors are said already to be more accurate than conventional blood glucose test kits. The latter work less directly, measuring a chemical, hydrogen peroxide, which is produced as glucose is oxidized; it reacts with a dye to

give a colour change depending on concentration.

In the August issue of the British Diabetic Association's journal *Balance*, Dr Anthony Turner, of Cranfield's Biotechnology Centre, writes that the next step would be to incorporate a continuous glucose sensor in a fine needle just below the diabetic's skin. It could give a reading of blood glucose on a watch-like monitor and sound an alarm if the level falls too low.

Eventually the sensor would be connected to a miniature pump, controlled by a micro-computer, which would constantly feed small doses of insulin to the diabetic, just like a healthy pancreas. That should be far safer than the present practice of injecting large amounts of insulin with a syringe.

The principle used for measuring glucose can be applied to other important chemicals.

The basic reactions necessary to produce conventional sensors for lactate, cholesterol, amino acids, and glucose have all been demonstrated, according to Dr Turner, although they have not been developed as far as the glucose strip. The range could be extended to measure hormones, such as insulin, by including antibodies in the sensor.

But practical problems remain to be overcome before biosensors become available for routine implantation. One is to avoid blood clotting and infection around the device. Source: *Balance*, number 76, pages 4-5 (August 1983).

# Dangers in the world of computer predictions

By Pearce Wright, Science Editor

## BRITISH ASSOCIATION

The future of the world, nations and individuals is being determined to an increasing extent by the predictions of enormously complex mathematical models analysed on giant computers.

But there is a danger that the sheer size and complexity of those mathematical equations employed in such diverse fields as war-gaming, analysing the arms race, weather forecasting, and economic prediction may come to dominate the judgements of governments and corporations because of insufficient understanding of the limitations of computer models and of the degree of uncertainty attached to their predictions.

Those ominous-sounding observations did not come from a latter-day George Orwell, but they were made last night by Sir John Mason, FRS, in his presidential address that marked the opening of this year's annual meeting of the British Association, at Brighton.

Although sounding a cautionary note, Sir John was endorsing the spread of computer modelling. He told his audience: "As scientists, we would probably agree that major policy decisions should be based as far as possible on rational analyses of the facts and objective predictions rather than on intuitive and subjective judgements."

Mathematical models were a powerful method for those purposes. But like most powerful tools they were dangerous if used unintelligently and for the wrong job, he concluded.

Sir John, former director-general of the Meteorological Office, drew on experience of computer modelling in weather

forecasting in the contrasts and parallels he drew between those activities that were subject to that type of prediction and those that were not.

But he said: "Man has an innate requirement to predict the future course of events, including the consequences of his own actions, as part of his survival mechanism."

Even in mundane activities, such as riding a bicycle or driving a car, an individual made a rapid sequence of observations, predictions, and reactions. And that involved the use of unconscious experience. But in more complex situations experience and intuition were less likely to lead to useful long-term predictions.

Sir John said an amateur observer might successfully forecast the weather over the next few hours by watching the sky and calling on experience, but he would be quite unable to predict what would happen a few days ahead.

In economics, too, prediction by simple extrapolation of experience, the technique of the Chartists, was an unreliable, ill-founded procedure because the past record almost over contained regular cycles of fluctuation.

of repeated amplitude and frequency, he said. Historical records, both of the weather and the economy, were so irregular that they had little predictive power.

Sir John said it became apparent more than 20 years ago that time-honoured empirical methods, based largely on extrapolation of recent developments and the experience of the human forecasters, were unlikely to improve significantly or produce reliable forecasts for more than 24 hours ahead.

With the arrival of powerful computers, it became possible to replace those highly subjective methods by objective techniques that treated weather forecasting as a problem in mathematical physics.

That involved the building of very large and complex models which were mathematical representations of the atmosphere based on the laws that governed the birth, growth, decay, and movement of the main weather systems. The model atmosphere was divided into 15 layers between the ground and 25km (about 80,000ft), and into a network of points about 150km apart.

That computerized picture of the atmosphere was revised every 12 hours from observations made simultaneously from land stations, ships, buoys, balloons, aircraft, and satellites.

That approach had extended reliable forecasting from one day to four to five days, Sir John said.

That did not mean models were incapable of predictions two to three weeks ahead, but the uncertainties were so great to regard them as valid forecasts.

# OBITUARY

## DR ERIC KANN

### Quality control in textile retailing

Dr Eric Kann, who died in London on August 16, at the age of 81, was in many ways a world pioneer of quality performance standards in the retailing of garments and other textile products. His role was crucial in the world renown for science-based quality achieved by Marks and Spencer, of which he was technical and later merchandise development director until his retirement.

This pioneering work was to have a profound effect not only on the store group's relations with its supplier companies and on its competitors, but also on the whole world of textile retailing.

Kann was born on February 1907, in Hildburghausen, Germany. He studied at Munich and Freiburg University, and graduated in chemistry and economics. After working for four years at the Kaiser Wilhelm Institute for Leather Research in Dresden, in 1927 he joined the firm of Schocken at their head office in Zwickau to start a laboratory for merchandise quality testing and standards development.

Within a short time his wide organizational and analytical talents became recognized and Salzman Schocken appointed him as his personal assistant with responsibility for some of the more difficult negotiations and investigations of his growing department store organization. By 1933 he had also been appointed director of personnel with responsibility for a staff of 5,500.

With the rising tide of anti-Semitism he decided to emigrate, and tried for two years to establish himself in Holland. By then he realized that he needed to move further away from Nazi Germany and on his way to the United States via London he first made contact with Marks and Spencer. This firm had for some time been convinced that their goods must be linked with a move in the direction of standardization and quality control of merchandise, but had not been able to find anyone with the necessary qualifications. In 1935 the late Lord Marks appointed him to build up a laboratory which could give impartial advice to the textile industry as a whole, and thus was involved in that important part of the Marks and Spencer selling slogan "quality tested".

After his emigration from Germany he had been much involved in helping, wherever possible, some of the ever-increasing stream of refugees. He succeeded in extricating his parents and an aunt and uncle from Germany at a very late hour, and helped to support them until their death.

He is survived by his widow, Ruth, a daughter and a son.

## SIR FRANCIS EVANS

Sir Francis Evans, GBE, KCMG, who was Agent for the Government of Northern Ireland in Great Britain from 1962 to 1966, and had previously been Ambassador to Israel and to Argentina, died in Belfast on August 21. He was 86.

Evans was born in Belfast on April 4, 1897, and educated at the Belfast Royal Academy and the London School of Economics. He served with the Royal Irish Rifles in the First World War. In 1920 he joined the consular service, and from 1944 to 1950 was consul-general in New York.

In 1951, he went to Israel as

## BRIG C. C. PARKMAN

Brigadier Claude Charles Parkman, CBE, who died on August 21, at the age of 80, played a leading role in the expansion of Ward, Ashcroft, and Parkman, the Liverpool-based firm of consulting engineers which now has practices in several overseas countries.

From 1975 to 1982 he served as chairman of the group board and of the British firm.

Parkman was born on May 18, 1903, and educated at the Barry School for Boys and Cardiff University. Having been an active Territorial in the

## MR GORDON GREEN

Mr Gordon Green OBE, who was General Secretary of the Fairbridge Society from 1922 to 1948, was responsible for the organized emigration of underprivileged British children to the Society's Farm Schools in Australia and Canada, died on August 9 in a Belfast hospital, at the age of 95.

Born in Ballarat, Victoria, Australia, he served in the Australian Army in the First World War, both in France and in the Middle East. From 1918 to 1922 he worked with the Y.M.C.A. in London and developed a strong belief in the importance of nurturing and protecting the rights of children.

Green came close to joining the staff of the Fairbridge Society after reading the words of the Founder, Kingsley Fairbridge: "The supreme test of human progress is the quality of child life and its opportunities for wholesome development, happiness and satisfaction." He was particularly successful in fundraising for the society, an activity which attracted favourable attention from all the sons of King George V, especially the Prince of Wales whose subscription headed the appeal which made possible the founding of the Prince of Wales Farm School in British Columbia in 1933. This activity brought Green into close touch with Geoffrey Dawson at *The Times*, whose interest in the work of the society was important in the period before the Second World War.

Green spent the last years of his life in rural County Down, Northern Ireland.

## PROF SAN-ICHIRO MIZUSHIMA

Professor San-ichiro Mizushima, who died in Tokyo on August 3 at the age of 84, was the leading physical chemist in Japan and for more than 30 years a major influence in Japanese science. Many of his pupils and associates at Tokyo University became known in Japan and abroad.

Mizushima's teaching focused on molecular theories, analytically expressed. His own findings were summarized in a work published in English in 1954, *The Structure of Molecules and Internal Rotation*.

Lieutenant-Colonel Sir Edward Wills, BT, died on August 19 at the age of 82.

## English aid for Argentine pilgrim

By Clifford Longley

Churches in central London have paid the fares and expenses of a young Argentine so that he can join a British pilgrimage to Israel, which leaves today.

They did so to honour a message of friendship to the young people of Argentina which Pope John Paul II took with him at the end of his visit to Britain last summer, at the height of the Falklands war. He passed the message on in Buenos Aires.

Nearly £4,000 was raised from Roman Catholic parishes in central London.

## Woman producer to be BBC chief's aide

By a Staff Reporter

A woman has succeeded in capturing one of the BBC's most senior appointments, chief assistant to the director-general, Mr Alan Darby.

Miss Margaret Douglas, aged 49, who began her career with the BBC in 1951 as a secretary in radio drama bookings, takes up her post in October, succeeding Mr David Holmes, who was appointed secretary of the corporation earlier this month. She will be the first woman to hold the post and one of the very few near the top of the BBC's hierarchy.

As senior producer in BBC television current affairs, Miss Douglas has supervised the transmission of all the party election broadcasts, edited the live coverage of party conferences, and from mid-1960s, directed the BBC's *Panorama* programme.

She also produced many television biographies including those of Lord Butler, of Safiron Walden, Lady Violet Bonham-Carter, and the Earl of Avon. She is now producing Ludovic Kennedy's wide-ranging interview with Mr Harold Macmillan, OM, to be transmitted on BBC1.

## Birthdays today

Mr Geoff Cope, 34, Dr Carl Dolmetz, 72, Sir Arthur Forde, 83, Mr Alexander Gilmore, 52, Sir William Gorell Barnes, 74, Sir George Harvey-Watt, 80, Sir John Hoskyns, 56, Mr Gene Kelly, 71, Lord Kistin, 71, Mr S. Kitchen, 70, Brigadier C. A. Langley, 86, Mr James Quinn, 64, Sir John Wriothley Russell, 69, Sir Roy Strong, 48, Mr Peter Thomson, 54, Lieutenant-General R. F. Vincent, 52, Sir Brian Young, 61.

## Press award

Mr Leslie Ashbenham, honorary chairman of the Gleamer Company of Kingston, Jamaica, publisher of *The Daily Gleaner* and other Jamaican publications, has been named by the Commonwealth Press Union as the recipient of the 1983 Astor award, its highest honour.

The award is in recognition of his work in forging closer Commonwealth ties and his vigorous defence of press freedom.

## Whitehall brief

### Preparing a new administrative elite

By Peter Hennessy and Andrew Arents

Whenever two or three Whitehall watchers are gathered together and the subject of training top civil servants arises, someone will mention "ENA", the Ecole Nationale d'Administration in Paris which takes young men and women in their early twenties and turns them into future technocrats, administrators, prime ministers and presidents.

The school is widely credited with producing an elite corps which helps lay the foundations of the French economic miracle in the 1950's despite the surrounding political shambles. The question is often asked "Why cannot Whitehall have a British ENA?"

Whitehall has never wanted one. It still does not. Mr Noel Moore, principal of the civil service college, said last week: "I have visited ENA. It is a fine institution which happens to suit their educational and cultural background admirably. I am not particularly convinced it would be right to translate ENA, just as it stands to the British context."

Mr Moore believes that, taken over a full career, the British bureaucracy trains its people as well as anyone, with a spell at the college for young administration trainees, refresher and specialist courses

course will be largely left to the individual chosen as its first director: "It's all to play for," says Mr Moore.

Some guidelines, however, have been fixed. They are contained in a report produced by Mr Angus Fraser, now chairman of Customs and Excise which the management and personnel office released to *The Times* last week. The course will last between three and four weeks rather than three months recommended by the Commons Treasury and Civil Service Committee, in a report published in March 1982.

About fifty administrators, scientists and professionals enter the under secretary grade each year. The college would need to run two or three courses a year to deal with them (at a cost of £1,000 per head per week). The Fraser Report, however, recommends that individuals from the public and private sectors attend as well, for the purpose of mutual enrichment, which would double the load to four or six courses.

Teaching would be in seminar form ("Blackboard and chalk") is inappropriate for people at that level," says Mr Moore and would be imparted by senior officials and outsiders with business experience, possibly drawing on overseas talent. The course would be residential and its members would convene away from college's beautiful Sunningdale Park near Ascot in Berkshire, which, it appears, some senior men regard as too bustling and spartan.

Four weeks is too short to do an ENA for Whitehall's 40 year olds. Mr Fraser suggests concentrating on a unifying theme, relevant to all participants like "communications in large organizations", "changing attitudes to work", "management information and resource control" or "the impact of the social and business environment upon decision taking".

The new course has a wider significance. It finally removes the question mark hanging over the future of the civil service college which appeared four years ago when Mrs Margaret Thatcher began her search for manpower economies. The place is generally booming despite a requirement in force since April that departments must pay for their trainees where tuition was formerly free.

Productivity is up too. Teaching staff have remained static at about 90. But since 1980-81 courses have increased from 590 to 1000 and student days from 60,000 to 72,000.

Mr Noel Moore

for principals and assistant secretaries blended with parrotical department experience throughout. Now Mr Moore is engaged in creating a new training course for those passing into the magic circle, the 688-strong open structure embracing under-secretaries and above.

Sir Robert Armstrong, Secretary of the Cabinet is head hunting a man to design the course and to run it in its initial year or two (the plan is to launch it in autumn 1984). Sir Frank Cooper, former Permanent Secretary at the Ministry of Defence, was asked to take the job but turned it down, pleading lack of time. The shape and scope of the under secretaries'

**Jane's Fighting Ships 1983-84**

Edited by Captain John Moore RN

Jane's Fighting Ships is the only publication that keeps you fully up-to-date with the equipment and deployment developments of the world's naval forces. It is the prime reference book for navies and governments throughout the world and is trusted by them as being the most accurate and impartial source of naval information available.

The new 1983-84 edition of Jane's Fighting Ships is packed with fully comprehensive facts and data about the world's naval vessels.

- International Survey of significant naval events
- New and additional information on Chinese equipment and operations
- Comparative fleet and equipment tables
- Ship designations and pennant list of major surface ships
- Recognition silhouettes

Stay up-to-date with Jane's Fighting Ships 1983-84. The new edition is published today at £55 per copy.

Make sure of your copy now.

THE ARTS

EDINBURGH FESTIVAL

Galleries: John Russell Taylor visits the new exhibitions

Visions of a musical maelstrom

Vienna 1900 National Museum of Antiquities of Scotland

The Scottish Room Fine Art Society

Wiener Werkstätte 1903-1932 Mercury Gallery

Man and Music Royal Scottish Museum

Though Edinburgh is a festival of the arts very much in the plural, it must be admitted that often in the past Art itself - painting and sculpture and such - has come trailing in towards the rear of the field. Of course, everyone thought it a good idea to have a few interesting exhibitions on at the same time, but their provision seemed on the whole to be left to the good sense and/or commercial instinct of the Scottish Arts Council and the major selling galleries. The results of this ad hoc policy were sometimes unexpectedly pleasing, in a vague, scattered sort of way, but it felt like a very long time indeed since the really eye-opening exhibitions which were a great feature of the festival in the Fifties and early Sixties, when we had the definitive Impressionist and Post-Impressionist retrospectives, major tributes to more modern artists like Epstein and unforgettable one-off shows like the 1954 Diaghilev Exhibition.

This year there has clearly been a deliberate attempt to restore that particular tradition, by again putting exhibitions at the very centre of the festival's planning. The principal theme

running through the opera, the concerts and even the drama is Vienna at the turn of the century. And, binding it together visually and spiritually, is the show Vienna 1900, in the National Museum of Antiquities' quite newly acquired and little used Ynrk Buildings, across the road from the main building, until September 25. One might hope, from the prominent positioning of the show, that it would be physically a large one. Undoubtedly there is a slight feeling of disappointment to find that it is not only four rooms seem very little to evoke a city, a way of life, an atmosphere and a very rich and productive art. But given this slight caveat, it must be said that Peter Vergo has done a splendid job in putting together this collection of beautiful, suggestive and invariably choice objects. Quite a number of them will be familiar already to those who have had occasion to keep an eye on the London art market in the last two or three years - as grateful acknowledgements to such specialists as Fischer Fine Art,

the Piccadilly Gallery and Whitford and Hughes make clear. But even in the selection of things borrowed from London collections there are surprises: if we wonder why we have never seen at the Victoria and Albert Museum its splendid Kiln Moser secrétaire of 1903, the answer is that it here receives the first public showing since it was acquired.

And many of the borrowings, from as far afield as Los Angeles, are going to be entirely unfamiliar to nearly all visitors. The collection of paintings by Schoenberg, for instance. Though many are faintly aware that Schoenberg, the friend and associate of painters, painted himself and designed settings for his stage works, it has not been easy to see the results of this activity, even in Los Angeles where Schoenberg ended his life. But now we have his portraits of friends such as Berg and Zemlinsky, designs for Erwartung and several of his strange, spectral heads, emerging like ectoplasm from smokily indeterminate backgrounds. True, these remain the spare-time occupation of a man whose real work lay elsewhere. But, even in close comparison with Schiele's portraits of Schoenberg and Webern, they do retain a curious and quite personal quality - you would know at once that they are not by nobody.

The show is admirably conceived in another way: its introductory section does give a very clear idea of the Vienna into which the young revolutionaries of the Secession and the movements which followed it, up to the Blue Rider in 1914, burst so dramatically and which continued, though we tend to forget it, to flourish very happily up to the First World War - as though the most important Strauss around was still Johann the Younger. Indeed, despite the sensation of Salome, which seemed for a

moment to ally Richard Strauss with the Decadent strain in art, there is little in his music, apart from a touch of over-ripeness, to recall the fin de siècle atmosphere, and the set designs here for the first production of Rosenkavalier, like the Wagner designs of the same artist, Alfred Roller, have scarcely a hint of any avant garde about them.

Clearly artistic Vienna at this time was a small world where everyone knew (though not necessarily approved of) everyone else, and yet these amazing contrasts could still continue to exist. Klimt and Schiele and Kokoschka could live quite successfully in a world where many still thought of Makart and the height of daring modernity and fine artistic taste. If we can carry back to the music and the theatre insights like this, so freshly offered by the Vienna 1900 show, then during the course of the festival proper we shall be enriched indeed.

Those in search of further enlightenment should not fail to collect also two small but fascinating related shows. The Fine Art Society has, for the occasion, chosen to emphasize the Scottish connexion by reconstructing the Scottish Room devised by Mackintosh and his associates for the eighth Vienna Secession exhibition in 1900. This, also open until September 25, comes as close as is now possible (there have had, inevitably, to be some substantial omissions) to conveying to us the dazzling effect this exhibit had on Vienna and the whole of central Europe - one which was to influence radically the later development of the Art Nouveau/Deco movement, away from generous curves and towards rectilinear austerity. At the Mercury Gallery the show of applied arts from the Wiener Werkstätte 1903-1932 (until September 18) fills in the details and illustrates the hats on the road from 1900 to the elegant

Vienna 1900: Arnold Schoenberg by Richard Gerstl; and Gustav Klimt's poster - before censorship - for the first Secession exhibition, 1898

local forms of Art Deco, with the Mackintosh influence everywhere evident. The other major festival show also draws our attention, though in a very different way, to the links between the visual arts and music. Man and Music, at the Royal Scottish Museum until January 15, at once makes clear the extraordinary riches of the museum's own collection of non-European musical instruments, turns our attention to them as beautiful objects in their own right and then, before we can stop for breath, reminds us that, however beautiful we may think them as sculptural exhibits in a museum case, that is only incidental to their real intention, the making of musical sound. The deviser of the exhibition, and in many cases collector of the exhibits, Jean

Jenkins, has also devised a superior example of the suspect audio-visual, which does for once provide an extra dimension by not only letting us know how the instruments sound but also showing us very clearly how they are played, by whom and in what circumstances. In addition, during the festival, until September 3, there will be a series of concerts in the Museum Lecture Theatre given by original groups of folk and street musicians from all over the world, making the show even more vivid and immediate. Is it for the musically or the visually oriented? Finally, and very satisfactorily, it is for both. Just as the whole festival should be, and this year probably will be, I shall be writing about Edinburgh's further visual delights later.

KUNST-AUSSTELLUNG DER VEREINIGTEN BILDNER-KUNSTLER ÖSTERREICH (SECESSION) ERÖFFNUNG AM 22. SEPTEMBER 1898. SCHWABENHOFSTRASSE 11. GEBÄUDE DER K. K. GARTENBAU-GESELLSCHAFT

First concert: Paul Griffiths Impact confined

Philharmonia/Davis Usher Hall/Radio 3/BBC2

The Edinburgh Festival lost little time in getting down to its "Vienna 1900" theme. At Sunday night's opening concert, after quite the punchiest account of the National Anthem I have ever heard, Andrew Davis opened a score that more than any other conveys the atmosphere of hysteria and frustration, decadence and catastrophe, which seems to have swirled in every thinking mind as the Habsburg capital moved precariously into the new century: Berg's Three Orchestral Pieces.

He found no room, however, to colour much of the incidental detail, and any first-time listener might well not have noticed that the central "Eigen" is as full as Lulu of corrupt, seductive sensuousness. It was unfortunate, too, that the television lighting should have missed and spoiled Berg's marvellous near-silences, which are as essential as his hollow bombasts, when the wretched box was not even taking the first half of the concert. Television viewers joined us for the "Choral" Symphony, a favourite at this festival and a work seemingly more to Edinburgh taste than the Berg, although one might think Beethoven was challenging the Vienna of his day quite as outrageously. Again, Mr Davis rather dimmed the impact by the higness of his approach. In the first movement he gave all his attention to sternly marking out the string music, so that the woodwind chorus kept coming forward and finding itself embarrassed by having nothing to say. There was also a very decisive beat in the scherzo and even in the slow movement, after which the finale was just as noisy and military as one had expected.

This must be about the most complex score generally regarded as serious, with anything up to a dozen utterly different things happening at once, and Mr Davis's firm grasp was useful in keeping it all together, keeping it on the brink of an ever-threatening collapse. But the complexity is more than just textural. In this set of pieces there is at least enough material for two operas, indeed for the two that Berg went on to write, but here the music did not appear so very saturated with expressive fervour and musical idiosyncrasy.

Mr Davis was certainly alive to what was going on upon the most generous scale, bringing out the Prelude's build to a climax and dissolve, or the March's steady mount in ferocity right up to a mortally painful scream from the trumpet.

Theatre: Irving Wardle reviews Glasgow Citizens' opening production

interference, concerned with free expression no less than with the illiteracy of the opinion-formers. For Kraus, the decline of the West began with the written word. As his *Other Days*, Kraus the Grouse, puts it in *Last Days*: "We were crippled by the rotary press before we fell victim to the cannon." *Last Days* is a vast, plotless montage of Austrian society at war, moving between the front line and the home front in a succession of tragicomic vignettes that accelerate into a dance of death. Given the ferocity of the satire you think of Swift, except that in this case the material is of documentary origin. The only conspicuous characters, apart from Kraus himself, are journalists and whatever the attacks on big business and the military, clerical and medical professions, his main target is always the press.

Robert David McDonald, translator and director of this Glasgow Citizens' production, has built this fact into the stage picture. Instead of Kraus's endless changes of scene, he sets the entire piece in a sumptuous Ringstrasse restaurant (a stunning walk-down set by Terry Bertlett) where battlefields, hospitals and imperial audiences come and go under the eyes of the diners. Not that they are looking. They are immersed in their newspapers, and the dominant image of the four-hour evening is of a forest of arms going up, fingers snapping for the next edition. The drawback of this scheme is that it fails to deliver the expected contrast between what happens and what the papers say about it. For this, Kraus is partly to blame, as he uses journalism as a direct source of information as well as a satirical target.

On the Assembly Hall stage, the unhappiest effect is on Kraus himself. Played by Giles Haverall in the likeness of a hawk-faced family solicitor, he sits impassively at his table throughout the evening, superciliously detaching himself from newspaper to deliver crushing judgments on the passing scene. A Diogenes of the festpots who invariably awards himself the winning argument, I admire the theatricality of the translation, however much it misses of Kraus's use of dialect and literary wordplay, but in the case of Kraus's own lines there is not much trace of the brilliantly corrosive aphorist. Whatever the drawbacks of the setting, it develops tremendous life as a stage metaphor: a piece of privileged content gradually engulfed by external disaster, as the walzes harden into

marehime, shellfire moves closer and Kraus at last pays his bill and delivers Hnraty's epitaph to a cork-strewn floor. By this time, it really has become the restaurant at the end of the universe. Individual scenes are beautifully slotted in to make their own points and mark the stages of general disintegration. "No meat!" roars Robin Hooper's bullet-headed diner. "Well, General," explains the waiter (John Brock), "there's a war on." The young company sometimes strive too hard for a grotesque style with nonsense jabber and strident grimacing, but the doubling of the huge cast-list is successful as well as courageous. Performances like Jane Berth's governess war correspondent and Laurence Rudi's hysterically enraged factory-owner are spellbinding by any standards.

The Last Days of Mankind Assembly Hall

Vienna is the central matter at Edinburgh this year, and, doing nothing by halves, the Festival announces its theme with two Beethovenian thunderclaps, the "Choral" Symphony and Karl Kraus's no less apocalyptic ode to ruin. Kraus is an ideal candidate for festival treatment: virtually unknown over here, a potent figure in modern Austrian culture, and the author of one gigantic drama that relates as challengingly to mass media as it did to journalism under the Kaiser. Through his long-lived magazine, *The Torch*, he is remembered above all as a defender of language against

Music and dance in Venezuela A staging post for British companies

Proscenium curtain design by Jesús Soto for the Teresa Carreño theatre

What could be a significant new touring location in South America for major companies from Britain, whether opera, dance or drama, was opened earlier this year in the Venezuelan capital, Caracas. The Teresa Carreño theatre and arts centre, on a midtown site overlooking a park of mahogany trees, has just come into its own as the focal point for celebrating the bicentenary of Simon Bolívar, "el Libertador" of Venezuela and a native of Caracas.

Britain's interest was reflected in a two-week visit by London Festival Ballet and a major exhibition of the works of Henry Moore. Both were sent through the British Council's management and financial support (in addition to Venezuelan and other sponsorship by British business interests there), and both drew wide spread public interest, the ballet company becoming the first to test the new theatre's full resources.

Dr Salvador Iriago, director-general of the Teresa Carreño Foundation which manages the theatre, and an anglophile of wide cultural interest, saw London Festival Ballet's visit as the harbinger of others from Britain at intervals of a few years. He hoped these might include the Royal Ballet, and perhaps the Royal Opera. The National Theatre was also invited to send a company from London this year but arrangements could not be made; Dr Iriago would like to think this is only a postponement.

The theatre has a seating capacity of some 2,300, and a stage 30 metres wide and the same high, comparable in proscenium to the Metropolitan at New York's Lincoln Center, although there are one-third fewer seats in the Caracas auditorium. The centre square, which incorporates a small 400-seat theatre and a separate large studio for rehearsals and ballet classes, while the main theatre is also convertible for concert use with an open platform.

It is named after Venezuela's leading nineteenth-century musician, who died in 1917. Teresa Carreño not only had a successful international career as a pianist (she was a student of Anton Rubinstein, among others), but combined with this the talents of composer, conductor and opera singer, as well as running her own opera company for a time. Three of her four husbands were musicians of comparable distinction: the violinist Emilio Sauret, the baritone Giovanni Tagliapietra and the composer Eugen d'Albert.

The Teresa Carreño theatre is no more appealing from a distance than the National Theatre in London, and with a similar angular bulk, but it becomes more impressive on closer acquaintance. "Inside" is hardly the word for foyers which are protected from the park but open at the side to the above; beyond, their bareness made more striking by thousands of vertical tubes, extruded plastic in ivory and yellow, hanging in

clusters from the ceilings like stalactites. Their design is the work of Jesús Soto, a distinguished Venezuelan artist who has similarly embellished other large buildings in France, Germany and South Africa. His *escribanos*, patterns of abstract lines "written" on a symmetrical background, are the source for his transverse proscenium curtains in the theatre itself, on which black curves and angles are superimposed on vertical bars of black and white.

The overall shape of the auditorium and stage area forms a hexagon, with the seats fanned out widely in three segments on a raked floor, but set squarely in a single upper gallery. Some front stalls have seriously restricted sightlines at the side, extremes, a strange miscalculation, but the orchestral acoustics are clear and direct and, on the evidence of the single opera performance I heard (Rossini's *L'italiana in Algera*), capable of expressive vocal balance.

Not all was as finished backstage as the front of house suggested. The lighting lacked colour-coding, requiring lengthy trial and error to match switch to light; a sprung ballet stage, which can replace that for opera and concerts, started to tilt when the Frigolio sets for Rudolf Nureyev's *Romeo and Juliet* were first built on it; increasing importance for Britain's arts exports.

dancers to the stage for lack of the usual communications. With goodwill on both sides these problems were adequately overcome for Festival Ballet's first-night gala on Venezuela's national day, at which President Herrera Campesino made a delayed arrival a full hour late while audience and performers alike were kept waiting (and the *Romeo and Juliet* performance took all the first act to recover).

A resident ballet company is already formed and working under the direction of the Cuban-born Enrique Martínez, former ballet-master of American Ballet Theatre, whose plans for next season include a new three-act *Miguel de Mañara*, with Albéniz music arranged by John Lanchbery. The nucleus of an opera company is also evident, and a planned April-July season includes *Madama Butterfly*, *Figaro*, *Lucia di Lammermoor*, *Il trovatore* and a new opera, *Chao Gil*, by the Venezuelan composer Juan Carlos Nuñez.

An Anglo-Venezuelan cultural agreement, painstakingly plotted by John Mallon, the British Council's representative in Caracas and the embassy's cultural attaché, is on the point of signature. It will help to bring about more frequent exchanges, especially in the performing arts; by offering an alternative to the Teatro Colón in Buenos Aires, the Teresa Carreño Theatre in Caracas could have increasing importance for Britain's arts exports.

Noel Goodwin

Three Choirs Festival All a matter of extended effects

The 256th meeting of the Three Choirs of Gloucester, Hereford and Worcester began in St Catharine's Church, Wotton Pitch, Gloucester, with a single voice. April Carzelo was the soloist in the first complete performance of a Symphony by Elis Pehkonen which began life at the Stroud Festival in 1981 and, for its last three movements, was commissioned by Gloucester Three Choirs Festival.

The soprano's unaccompanied "Tota Pulchra es Maria" sets in motion a massive four-part survey, more suite than symphony, of the Christian year: annunciation, nativity, crucifixion and pentecost, with the last a set of double variations and extended coda. It is, indeed, all very extended: lasting well over an hour, the language is richly romantic to

the point of satiety (Mr Pehkonen says his music is now "renovative" rather than "innovative"); the scoring makes much use, wherever it can, of brass, pitched percussion and harp; and the Latin text is stretched to the very limits of both the performer's stamina and the listener's patience. The work is conscientiously enough written; but there is simply not enough to be said, and the ear soon becomes numbed as matter is quickly drowned in matter. The Gloucestershire Youth Orchestra, conducted by Sir Charles Groves, John Scott joined them as soloist for the new work at the centre, a Concerto for organ, strings and percussion by Charles Camille. Conventional in form and substance, the music arrests by sheer force, with its grinding ritual string chords, its virtuosic timpani solos and clamorously testing organ part, bouncing off the Norman pillars and rolling down the aisles.

In the outer movements there are, if anything, simply too many unsubordinated notes, getting clogged and tangled up in each other, something even Sir Charles's incisive and

rigorous reading and Mr Scott's magnificent playing could do little about. In the middle, as if to compensate, there is a meditation upon space, where organ and pitched percussion contribute little more than figures over high sustained string chords. The total effect was one of effect alone. It would have been worth buying a ticket, though, for the last part of the concert alone. Here the festival at last came into its own, bringing back a work too long neglected, Vaughan Williams's inspired, constantly live and beguiling "masque for dancing", *Job*. Sir Charles and the RPO brought colour, rhythmic muscle and dignity to this musical recreation of Blake's engravings.

Hilary Finch

Rock Status enhanced

ZZ Top Castle Donington

Hard rock bands are not generally noted for their wit or fashion sense but ZZ Top, the ultimate power trio from Houston, Texas, are an exception. As befits their name they have perfected an act which is the last word in its particular field.

While the majority of the acts at Castle Donington's annual Monsters of Rock festival were content to grimace and grunt through the usual heavy metal clichés, ZZ Top's Billy Gibbons, Dusty Hill and Frank Beard came to unleash a different form of entertainment. By the end of the afternoon even the hardened corps of leather and denim-clad rockers were laughing in appreciation. ZZ Top are a sight for sore eyes; they are smartly clad in pastels, absurd pink guitars and extravagantly styled beards, which is not in any way that they are hell-bent on pastiche; they are all excellent musicians with a

total command of the blues-based Texan boogie tradition. Gibbons, the lead guitarist and singer, keeps his troops on the right side of understatement, ensuring that they deliver songs rather than endless riffs. And what songs they are. In numbers like "Party on the Patio", "Cheap Sunglasses" and "Pearl Necklace" ZZ Top maintain the tradition of glorifying Americana while simultaneously deflating their countrymen's acquisitive excesses. The heavy metal hordes appreciated the group's lighter material, and the sound of sixty thousand people singing the refrain to "I'm Bad, I'm Nationwide" threatened to drown the roar of overhead planes from the nearby airport.

This was probably the first time most of the crowd had witnessed ZZ Top, but I have a feeling that, by the time they return to headline an autumn tour, their cult status in England will have been replaced by something much more substantial. Max Bell

Harrie Peeters, a bass from the Netherlands, has won first prize in the second International Belvedere Competition for Opera Singers organized by the Wiener Kammeroper. Second prize went to Angela Denning (soprano, Australia) and third was divided between Ulrike FINDER (mezzo, Austria), Johann-Werner Frein (bass, Austria) and Anton Scharinger (baritone, Austria).

The performance of *Adriana Lecouvreur* scheduled for the Barbican Hall on September 14 has been postponed due to difficulties in casting the tenor role of Maurizio.

# What Micro?

The Electron is bound to be compared to the BBC Micro. However it would be better compared to other micros in its price range, the likes of the Spectrum, Oric and Vic 20. There is however no real comparison as the Electron wins on all counts—it has better graphics, a better keyboard, faster and more versatile Basic. We rate the Electron higher than any of its competition. Acorn had better be ready for a rush, there's going to be one. *What Micro? Sept. '83*

## This micro.

Actual size.

Today, Acorn Computers unveil their new home microcomputer, called the Electron.

And, as you can see, it has already met with critical acclaim in its first independent review from one of Britain's leading computer publications.

This comes as no surprise as Acorn also produce the only other Micro that uses BBC Basic. (This machine is already being selected by over 80% of U.K. Schools under the current Department of Industry scheme.)

You can judge for yourself just how good the £199 Electron is by visiting the Acorn User Show at the Cunard Hotel, Hammersmith, London from August 25th-28th.

We've every confidence that you and "What Micro?" will be in complete agreement.

Acorn Computers Limited, Fulbourn Road,

COMPUTER**

# Massive new 'banks' deal

THE WEEK by Roger Woolnough

Changes in the banking community, and the opportunities these open up for more automation, have caused two major US computer companies to form joint ventures with third parties to secure their positions in financial markets.

Burroughs Corporation has signed a £21m joint development and manufacturing agreement with Fortronic, the Scottish company which has specialised in banking and financial computer terminals. Simultaneously, Sperry Corporation announced it is to market the new Ericsson System 2100 branch automation system for financial institutions.

Of the two, the Burroughs-Fortronic deal is the more intriguing. The US company has been serving the financial markets since the end of the last century, and had a turnover in 1982 of \$4.2bn. Fortronic was established only in 1970, and is a minor by comparison. What does it have to offer the US giant?

"The facts of life are you can't do everything", says Bob King, managing director of Burroughs Machines Ltd, the UK subsidiary. "What we are trying to do here is bring the special skills of two groups of people together."

Key to the agreement is Fortronic's development of an intelligent integrated terminal which sits on the bank counter. Burroughs' approach has been to provide modular terminals, which allow users to build up a range of functions as they need them. Both philosophies are valid, but Burroughs' lack of an integrated terminal of its own left a gap in its product line.

"In certain markets, particularly Europe, there is a big demand for an integrated unit and this is exactly what Fortronic has," explained Clive Bartram of Burroughs. "We are continuing to develop our own modular-type terminals."

Burroughs and Fortronic are not strangers. Since 1981 the two companies have had a marketing agreement on

financial terminals covering Europe and Africa. This has resulted in orders approaching £10m, about 70 per cent exports. But the new deal ranges much wider.

It falls into three parts. Under the first, Burroughs is providing Fortronic with £1m to fund design and development of a new generation of intelligent integrated terminals. Ideas and resources will be pooled by engineers from Scotland, England, France, Switzerland and America.

Then, over the next three years, Burroughs will take delivery of at least 15,000 terminals made at the new Fortronic factory near Dunfermline. This contract is worth at least £20m.

Finally, there will be continuing collaboration to keep pace with market changes and competition. Under the deal between Sperry and Ericsson Information Systems of Stockholm, the Swedish company's branch automation system is to be marketed by Sperry as the UFTS 600 in most European countries, Canada, South Africa and South East Asia.

Unlike Fortronic, Ericsson has not taken an integrated approach. The UFTS 600 provides different modules on the bank counter to handle such tasks as customer transactions, computing, communications, passbook printing, and note dispensing.

One thing that all parties agreed on is that the banking business is changing fast. Sperry says that banks are increasingly subjected to competition, not only from other banks, but also from non-banking institutions.

Burroughs' Clive Bartram points out that in America today, Sears Roebuck offers a full range of equipment for banks including access to cash via automated teller machines. "In tomorrow's world, what will be a bank?" he asks. "It may well be a department store."

That can only be good for the

automation suppliers, who are already facing a boom in any case. During 1984 to 1986, Burroughs estimates, the worldwide cashier terminal market will absorb 547,000 units - and that excludes any newcomers in the money game.

A VENTURE which links the travel trade, a young computer company and British Telecom is about to market a hardware and software package which is designed to be equally suitable for the smallest and the largest of travel agents.

Behind the move is Tourism Technology Ltd, which is jointly owned by Future Technology Systems Ltd (FTS), the Association of British Travel Agents (ABTA), and the Travel Agents' Consortium for Information Technology (TACTIT). Together they have developed a system which exploits the multi-functional and communications capabilities of the FTS microcomputer. This allows travel agents to use a single piece of equipment for text, viewdata, bookings with tour operators, communications direct to airlines, data processing and word processing.

New Tourism Technology has appointed Merlin, the British Telecom business products operation, to market the system exclusively in the UK. Over two years, the contract will be worth £5m to FTS and £2m to Tourism Technology.

"This is probably the first time that any trade association such as ABTA has worked so closely with a manufacturer to bring a product which is tailored to its members' needs," says FTS managing director Peter McHugh. "More important, the trade association - and therefore its members - benefit commercially."

McHugh estimates the potential size of the UK market at 1,000 systems with a business price of £5,000. This is based on 5,000 ABTA members, with an average of three systems per user. On top of that there are 3,000 non-ABTA travel agents who are likely purchasers.

## JOB SCENE

# Status under attack

By Richard Sharpe

Now that so many non-technical personnel are using computer systems the status of computer professionals is under attack. But changes of status will be fiercely resisted.

In the first place special rates of pay for computer staff are becoming rare as they are merged into general clerical and technical grades.

Second, job turnover has begun to come down, making staff that fit from employer to employer no longer a valued asset; they are now being judged in the same way as other staff with a patchy employment record.

Third, the role of contractors has been firmly established, weakening the subtle blackmail that highly technical personnel in computer departments have used as a weapon to further their careers.

Status has, however, always been a moveable feast in the computer industry. At the beginning, when pioneering systems were built from valve technology and the applications were scientific and technical, programming had low status. Designing the system and keeping it running held the glory while the job of programming was mostly performed by women.

Once men designers realised that programming was half the job of getting new technology working they muscled into the role, turned programming almost into a black art.

Status is often linked to skill in the computer community; it does not always come from the individual's position in the managerial pecking order.

However, while computer hardware is more and more compact and runs faster and faster, full computer systems, the complex combination of hardware and software, do not have the same radical advances in performance. A lot of the speed of the machine is often absorbed by more complex software, written by skilled employees. As a result the highly skilled can seem to be a bottleneck, an impediment to further productivity increases.

The more non-technical personnel use computers, the less need there seems to be, at least on the surface, for the skilled people. All is, however, far from lost for the status conscious computer professional.

Many have realized that the job of educating the new wave of users is so vital that it gives them extra leverage, and therefore status, as they fall out over organizations carrying the word of the coming of the micro computer.

## People/Ronald Young of Systematics

Alan Howard

# From Tudor to future

Ronald Young lives in the past, the present and the future, all at the same time. His company, the Systematics International Group, occupies a Tudor manor house in the Suffolk town of Haverhill, reputedly given to Anne of Cleves by Henry VIII. I joke Tudor manor houses," says Young, who lives in one.

That takes care of the past. The present is the booming world of microcomputers, for which Systematics supplies a range of packaged business software.

And the future? "We very much believe that the technologies of video, computing and telecommunications will converge," Young says. "We are even thinking of buying a satellite dish."

Originally, Ronald Young was articled to a chartered accountant, but the weekly regime of five nights studying on a £3 pay-packet drove him to banking for a princely £12. In 1966 he switched to programming.

After working for a number of user companies, he had the chance to set up a computing services company with a firm of management consultants. A little later, this company acquired a computer bureau specializing in services for manufacturers of agricultural machinery. He developed it to a profitable, if fairly modest, concern. Then the microcomputer arrived.

"I was quite happy with a bureau which was specialised, profitable, and giving us all a

satisfying way of life." Young recalls. "The micro shook us up. The company now makes more profit in one month than it did in a year."

This transition was not achieved easily. In 1980, after five years of profits, Systematics invested heavily in developing a range of business software for microcomputers. It was December 1982 before substantial profits returned, but the investment has paid off.

Young ticks off progress: 2500 software packages sold in 1981, 6400 in 1982, "and we expect to sell well over 10,000 packages this year". From breaking even in 1982, he expects profits of £400,000-plus this year, and is looking for £1m next.

But he sees many changes ahead in software, and Systematics continues to invest heavily in development.

"Some companies take the view that as computers become bigger, they should produce bigger programmes," he says. "We believe we should employ this greater power so that users

can do the same jobs far more easily."

This emphasis on user-friendliness shows up in several ways. Systematics had an early preview of the Apple Lisa. The micro which took a major step towards simplifying computer use. "We are developing business software for Lisa which will exploit its visual techniques," says Young.

Video is another tool. Already Systematics is putting business programs on video-cassettes for training purposes, and Young looks forward to the possibilities offered by the interactive video disk. "We are also trying to eliminate the need for manuals," he adds.

But as much as anything, it is the coming convergence of video, computing and telecoms which intrigues him. "They will all come together into a single information technology very soon. As an organisation specialising in software, we must have an increasing awareness and involvement in all of them."

## Computer Appointments

### MARKETING CONSULTANTS

As a young, growth minded company, involved in consulting on high technology computer related products, we are seeking a number of additional marketing consultants to join our professional team.

Based in Ascot, candidates will be responsible for initiating, developing and conducting market research projects covering key developments in the computer industry.

Applicants should be well educated, with experience in marketing and/or market research. This will preferably have been gained within the computer industry. A knowledge of statistical analysis along with excellent communication skills, both oral and written, are essential.

The ability to work on initiative and willingness to travel are a requirement, excellent salary, 4 weeks holiday and scope for rapid advancement will be offered to the right candidates. For further information, phone Ascot (0990) 23377.

(No Agencies please)

## Finding the jobs

"On your bike" is being superseded by electronics: jobcentres throughout the country are going linked through a computer-based system, so that details of vacancies can be transmitted quickly throughout the network, writes Roger Woolnough.

Last week work began on the seventh and final stage of the project when the first of 150 Jobcentres throughout south-east England was connected to a Perkin-Elmer 3230 supermini-computer in Basingstoke. By November, all the south-east's Jobcentres will be linked electronically to virtually every other Jobcentre in the country.

Known as the Vacancy Circulation and Statistics (VACS) system, it has been introduced over the last five years by the Manpower Services Commission in conjunction with Perkin-Elmer Data Systems. At first, Jobcentres with VACS could communicate only within their own region, but all seven regional computers and a development centre in Sheffield are now being linked over the PENNET networking system.

When the system is complete, about 750 of the 1000 Jobcentres throughout the country will be able to communicate with British Telecom's packet-switching service.

"This improves our standard of service to potential employees and employers alike, while helping to contain our administrative costs," says John Taylor, head of the MSC's employment service Computer Development Branch.

### Business game

Engineers, often criticized as being poor managers, will have a chance to prove otherwise by joining a business game run on computers. The game, called TEMEWORK (The Engineering Management Exercise) is being sponsored by the Engineering Council, Ashgate Management College and The Engineer magazine. The Department of Trade and Industry has made a software development grant.

The game begins in October, with teams from industry competing against each other and the

## COMPUTER BRIEFING

game's controller to win £2,000. The organizers claim that unlike other business games, this one deals with the interrelated concepts of design, finance, production and marketing. Those taking part will have to work under pressure in a realistic situation.

Teams will compete using home computers, and software will be supplied on cassettes for a variety of popular machines. A computer is not essential, but the various tasks will be longer without one. "Huge again," say the organizers, "the exercise mirrors reality."

Those interested in competing should write to Wendy Smith, The Engineer, 30 Galders Road, London, SE18 6QH.

### UK Events

Computer Open Day, Dreganora Hotel, Leeds, September 1, First Hampshire Computer Fair, Southampton Guildhall, September 8-9, Video, Audio & Computer Show, Bradford Exposition Centre, September 15-18, Home Entertainment Show, Olympia, London, September 17-23, Computer Open Day Exhibition, Central Hotel, Glasgow, September 22, Microcomputers in Business, Warwick University, Coventry, September 27-29, MIP one-day workshop, City Conference Centre, September 29, Personal Computer Works Show, Barbican Centre, London, September 29-October 2, Computer Fair, The Sir Frederic Osborn School, Welwyn Garden City, October 2.

### Overseas

Personal Computers & Office Automation Systems Exhibition, Amsterdam, The Netherlands, September 5-8, Australian Computer Exhibition, Melbourne, Australia, September 13-16, International Peripheral Equipment & Software Exposition, Moscona Centre, Anaheim, USA, September 13-15.

Compiled by Personal Computer News

## Where's the plug?

By Alan Simpson

Far from encouraging user satisfaction, many of the documents with computer industry products are too difficult to understand. Typical are the manuals which say "Unplug his connect to power source and switch on". That the user often does not know his power transformer unit from his DIN plug or PAL modulator seems to have escaped some instruction writers.

No surprisingly, a new industry has been created, offering a guided tour round new systems. The Learning to Use book series, for example, supports popular micro models like Apple, BBC Acorn, Dragon, Oric and Pet and assumes that the user is very much in the beginners class and requires practical assistance rather than large doses of computer theory and technology.

The suppliers, Newtech Publishing, say they have problems in keeping pace with demand and the rate of introduction of new home computer equip-

ment. Newtech have also marketed Sound Training audio cassette packs which offer the business user a faster and possibly more enjoyable method of understanding his software application package. The packs are selling well not only in Europe, but, surprisingly in the United States where much of the software originated.

Now training consultants and specialists in communication of Hereford, who are responsible for the Sound Training products, have decided to spread their expertise and are presenting a series of workshops aimed at teaching teachers the fundamentals of good documentation at two-day courses.

For those who have difficulty in following Euro/Japanese translation texts on how to load and operate a home video or micro-controlled camera, software documentation can simplify the complexities of everyday technological life.

# Is yours an 8 or a 16-bit business?

PC-8800 Series Personal Computer. £1,501\*

When NEC — component-makers to the computer world — make their own computers, naturally they make them more competitive in price.

And performance. So whatever the volume of repetitive paperwork in your business, one of NEC's new personal computers will give you a better price/performance than any other system in its price range.

Which you choose — the new NEC PC8800 or the more powerful Advanced Personal Computer — depends on the processing power required and the volume of data you wish to store — up to 20 megabytes on the APC. In either case, each machine gives you access to a wide range of business software, including integrated accounting, word processing, business planning and graphics.

Each machine has too many features to list here. But on the corner of this page, a small snippet for you could mean a giant leap for your business.

Advanced Personal Computer. £1,985\*

Get out from the middle man's grasp. Go straight to the top.

NEC Corporation

**TOP CALIBRE PRODUCTION MANAGER**

We are a fast expanding UK company in the Information Technology Field and need a fully qualified, experienced go-ahead Production Manager for the initiation, development, management and re-location of production. You will take responsibility for the control and further development of the production line and bring to fruition any new ideas. You will be autonomous reporting only to the Managing Director.

You must be able to relate outstanding technical innovations to applications and market trends and be able to plan future systems against future demands.

This key position will appeal to a competent, imaginative individual who has had "Start-Up" experience in the past. You must also be able to travel in order to coordinate our rapidly expanding marketplace.

Salary will be negotiable (circa £25,000+1) to the right person. If you feel that your experience and aspirations meet our needs please contact:

Richard Cowen (Managing Director), Wyrtham International Ltd., Gillingham House, 28-44 Gillingham Street, London SW11. Telephone: 01-430 5331

**INTERNATIONAL MARKETING MANAGER**

£20,000 + CAR - Location: LONDON

Marketing manager sought for new high quality software programme to be marketed to corporations and financial institutions. Suitable candidates will have current experience in the Marketing side of the Computer Industry. A university degree is essential and languages preferred.

Please reply with C.V. to:

**Threadneedle Financial Services,**  
Thorney Court,  
Palace Gate, London W8

MARKET REPORT

Index still on record run

ACCOUNT DAYS: Dealings began, Aug. 15. Dealings end, Sept. 2. Contango day, Sept. 5. Settlement day, Sept. 12.

The stock market entered the second leg of the three-week holiday account hitting a record, despite the seasonal fall in volume.

The FT 30 index began to dip ahead of Wall Street's opening late yesterday afternoon but booming prices in New York reinforced London's move forward and by the close the index had gained 4.7 to 740.4.

The main boost to sentiment resulted from the better-than-expected United States money supply figures, the second good one in a row, and forecasts that United States monetary growth will be back within target over the next two months.

That defused fears of any further rises in United States interest rates, particularly as the American economic recovery is slowing. Some dealers were even talking of significant cuts.

This would effectively take the pressure off British rates and rekindles hopes that Britain's clearing banks will be able to hold the 3% per cent level for longer than expected.

Government stocks came in for some heavy buying, with long-dated issues, some paying

yields of more than 10 per cent, recording gains of 1.5%.

That gave the government broker the opportunity needed to slip to two "tapets" totalling £500m. The sale last week of £500m 10 per cent convertible was sold out so some form of tap was needed.

Leading equities quickly followed gains higher and there were widespread gains of more than 10p. US buying put 10p onto Boots at 183p after that it had received over-the-counter US sales permission for its new pain-killing drug ibuprofen which Beecham at 353p was 10p to the good.

News that British petrol sales are falling rapidly and the big companies may start cutting prices again soon caused some fresh selling in the oil sector.

BP dropped 6p to 438p while British 2p to 248p, despite reports that the fall in profits, due soon, will not be as bad as expected.

Lasmo, with profits due today, was also hit, dropping 10p to 376p. Shell lost 4p to 630p. Profit-takers moved against the Irish offshore ex-

where Lex Group featured with a 15p gain to 368p after the company managed to dampen fears over alleged problems with Volvo gear boxes.

Whitbread, up 4p at 152p, led breweries higher as the continuing good weather and news of price rises supported the sector.

In the building and construction sector Taylor Woodrow jumped 20p to 550p in anticipation of today's interim figures. Blue Circle, reporting this week, gained 7p to 445p but fears of increased competition hitting the profits of SGB Group, pushed those shares 12p lower to 144p.

London Brick held steady at 86p on hopes that Tarmac or Hanson Trust will step in to buy the company if it does not go ahead with its own bid for Hanson Johnson. London reports profit figures on Thursday, when a statement of intent is expected.

Booming August car sales helped motor distributors, Games maker John Wad-

dington's shares fell 4p to 242p as hopes faded of the group fighting off the unwanted bid from BPCC, whose offer closes today when the level of acceptances should be known.

In insurance, Commercial Union at 170p and Royal Insurance at 560p held steady even though both companies are heavily involved in Texas where a hurricane caused £1bn worth of damage. Analysts say CU will lose £6.5m and Royal between £5m and £10m.

Also firming ahead of interim figures due this week was Hawley Group at 185p, up 8p and Electro-Protective, 7p better at 183p.

One stock to lose favour with the speculators was Bellair which slumped 40p to 580p. Majority stakeholder Wasson Establishment has still not responded to calls for further information about its intended activity for the two minnow companies.

Wayne Lintott

placers quite heavy, Atlantic Resources fell 83p to 380p while on the USM Elington lost 45p at 200p.

ANNUAL MEETINGS

Triplex Foundries, West Bromwich Moor House, Beeches Road (noon).

Yvelton Investments in which financiers Mr Jim Slater and Mr John Bentley have big shares stakes, has used its option to buy a further 15 per cent of Wordnet information processing system for £150,000. This takes its stake to 40 per cent and makes the company, which has designed a system that can link eight electric typewriters to a single word processor or small computer, Yvelton's biggest single investment.

Now Wordnet has signed contracts with three big distributors including AES, one of the world's largest word processing companies, which have already placed orders for £5m of equipment. Linford Holdings is to seek shareholders approval for a name change to Dee Corporation. Frank Dee Supermarkets is part of the group. The board believes the Linford name fits the company to food wholesaler, whereas retaining now accounts for some 75 per cent of its profits. Charterhouse Petroleum has agreed to take over the 70 per cent shares in Jubilee Oil it does not already hold. The deal involves Charterhouse issuing up to 3.1 million ordinary shares to Jubilee shareholders, and a further 2.9 million if the first well drilled on the two Jubilee North Sea blocks show significant oil reserves. BAYER of West Germany has improved its first half world group pretax to DM660m (£217m) from DM722m in the same period last year.

New company will be fourth biggest grocery retailer Gulliver merges food and drink chains into Argyll Group

By Andrew Connell Mr James Gulliver, the Scot who made his name by transforming the Fine Fare supermarket chain in the 1960s, yesterday announced details of a proposed merger between his Argyll Food store and Asda-gamazed Distillers Products to create a new force in the British food and drinks industry. The new company, Argyll Group, will have a market capitalization of £250m, annual sales of £1,360m, and forecast pretax profits of £26.5m in the year to March 31 1984. It brings together 900 Presto, Temptations and Liptons stores owned by Argyll with ADP, which is one of Scotland's last remaining independent whisky producers. The new group will rank fourth in Britain behind Sainsbury, Tesco and Asda in the food retailing sector, and third behind Victoria Wine and Arthur Cooper in terms of off-licence sales. Mr Gulliver claimed yesterday that his ultimate ambition

ARGYLL GROUP (£m) Argyll Foods ADP Group Argyll Group Turnover 1135 230.3 1365.8 Pre-tax profits (year ending April 2 1983) 21.6 7.2 28.8 Forecast pre-tax profits (year ending March 31 1984) 28.0 8.5 36.5

is to beat Sainsbury and become Britain's biggest food retailer. The merger of Argyll Foods and ADP has been effected through a new holding company, Argyll Group, which was previously called James Gulliver Associates. The merger will be on the basis of one ordinary share of the new company for every ordinary share in Argyll Foods, and four shares of the new company for every three shares in ADP. Last night Argyll Foods shares were unchanged at 126p while shares of ADP were down by 3p at 165p. Mr Gulliver outlined four main reasons for concluding the deal. First, it would create greater scale in the food and drinks industry at a time when there is growing concentration of market share in the hands of big corporations, both in Britain and internationally. Second, it would allow Argyll to diversify in the longer term to avoid the stiff competition which will emerge in food retailing if the big groups continue their rapid expansion. Third, the deal would provide opportunities for expansion in the US through ADP's Barton Brands drinks business. Fourth, it would offer important distribution opportunities for ADP, whose liquor brands could be sold through Argyll stores. Mr Gulliver said he was looking at the possibility of putting some of ADP's Liquor-off-licences into Argyll's Presto stores. Mr Gulliver said that the continued development of the

Gulliver: challenging Sainsbury

St Presto stores chain will not be affected by the merger and that 20 stores are planned to open next year. The new group is forecasting pretax profits of £36.5m in the year to March 31, 1984, against combined pretax profits of £28.8m in the 1982/1983 financial year. The board promises to recommend a dividend of 4.5p per ordinary share in the new company in the year to March 31, 1984. Mr Gulliver's personal holdings in the new company will be 7.5 million shares, or 3.8 per cent of the total equity. Mr Gulliver was chairman of the Fine Fare supermarket company at the age of 33. He left in 1973 with a few hundred thousand pounds and bought Oriel Foods for £2m. He sold it after a year for £11m. He began building a stake in ADP in 1979 and acquired most of the supermarkets in the Argyll Foods chain in a £104m deal with Generale Occidentale in June last year. Investors' Notebook, page 16

Call for increased pensions mobility

Employers could afford to improve pension benefits for job changes at little or no extra cost, according to pension consultants Metropolitan Pension Association. In a discussion paper on improving the pension benefits of early leavers the association concludes: "The real value of deferred pensions could be fully maintained over the period of deferment with very little increase in contribution requirements - perhaps no change at all if recent scheme experience has been favourable." The paper comes after the recent announcement of an urgent review of pensions by the Government. Mr Norman Fowler, Social Services Secretary, has called for a conference for September 14 to discuss pension problems, and representatives from the Confederation of British Industry, the Trades Union Congress and the Centre for Policy Studies will be attending. The Government is known to be concerned about the effects on job mobility of poor deferred pension benefits and has indicated that legislation could be introduced if voluntary solutions are not found. Under existing legislation it is possible for an employee who has worked for a company for up to five years to change jobs and lose all pension entitlements.

The Occupational Pensions Board recommended in 1981 that early leavers' pension benefits be updated by 10 per cent a year in the interval between leaving a pension scheme and retirement age. Referring to this recommendation the association says: "We have examined the effect of implementing this recommendation on contribution requirements for a significant number of schemes and in most cases the additional contribution requirement has fallen in the range 0.5 per cent to 1 per cent of payroll. If explicit funding provision is made for increases at 5 per cent per annum, then in principle, pension in payment can be increased in line with the Retail Prices Index." The association also criticizes as inequitable the use by employers investment returns on early leavers' contributions to reduce pension costs. It says: "Members' benefits should reset (at a minimum) a fair return for the contributions they themselves have paid. "The particular cross-subsidy which results in the interest earned on contributions paid during service being applied to reduce company contributions in respect of other members does seem hard to defend."

£500m gilts issue as dollar eases

The Government wasted no time in resuming its funding programme yesterday as financial markets moved ahead, encouraged by the good American money supply figures last Friday. Two new tranches of existing government stocks were announced by the Bank of England and they will be available from tomorrow. They are £300m of Treasury 12 per cent 1993 priced yesterday at £1025/8, and £200m of 11 3/4 per cent Treasury 2003-2007 priced at £1077/8. The Bank will be able to sell the new tranches when market conditions allow. Last week the new tax issued by the Government, £800m of 10 per cent convertible stock 1986, was oversubscribed at above the minimum tender price. Dealers said yesterday the speed with which the Government acted was a sign that it still needed to sell large amounts of government stock to help control the money supply. Last week the Treasury sought to reassure markets that money supply was being brought back under control. The gilts market closed with gains of £1/2 to £3/4 at the long end of the market yesterday, helped by the firm tone in the American bond market. The \$500m fall in American money supply M one on Friday has helped to allay fears over rising interest rates. This contributed to a weaker dollar yesterday. After falling overnight in the Far East, it recovered some ground during European trading but closed well below last week's levels. The dollar fell from DM2.6580 at Friday's close to DM2.6310 yesterday and eased against other currencies. Sterling ended the day 1.1 cents stronger against the dollar at \$1.5290. Although it was slightly weaker against continental currencies, its trade-weighted value firmed by 0.1 to 85.8. Dealers said the dollar was expected to weaken further in the short-term. Shares hit record levels yesterday as the stock market rose, encouraged by the strength of Wall Street. The FT Index of 30 leading shares closed 4.7 up at 740.4.

WALL STREET represented a major or permanent shift of leadership. Instead he said: "It seems to be part of a pattern of indecision in which there is not an obvious or persistent thread of leadership" as opinion wavered between "fear of the economic recovery overheating and fear of it stalling." International Business Machines was 122 3/4, up 1/2; General Motors 69 1/4, up 7/8; Ford 57 1/4, up 1/2; General Electric 47 1/8, up 5/8; Lanes 152, up 1 1/2; Halliburton 45 5/8, up 1/4; Superior Oil 37 1/2, up 1/8; and Texas Instruments 111 3/4, up 1 1/8. Mercantile Stores up 2 1/2 at 56 1/4; Cooper Laboratories up 2 at 34 3/4; Motorola down 1 at 129 1/4; NCR up 1 at 114 3/4.

Kean & Scott to seek full listing

Kean & Scott, the home improvement company which is 60 per cent owned by Mr Michael Ashcroft's Hawley Group, plans to get a full listing on the London stock market either this autumn or next spring. The company is quoted on the Unlisted Securities Market, but the Stock Exchange's quotations department has yet to approve the transfer to the main stock market because Kean, in its present form, has no five-year trading record. Kean is one of the biggest companies on the USM with a market capitalization of about £50m. It became a Hawley subsidiary last October and took in Sharps Bedroom Design from Hawley to run alongside its furniture retailing business. Since then it has acquired Alpine Holdings, the double glazing company, and Dolphin Showers. The current set of results show the effect of these acquisitions. Further deals are likely to the second half. Analysis now expect total profits for the year to be about £5m. Coleman Milne, another

USM company which is 85 per cent owned by Hawley, also turned in half-year results yesterday, showing an increase in pretax profits to £186,000. The City now expects profits of about £500,000 for the year. The company, based at Westhoughton near Bolton, Lancashire, makes limousines by extending Ford Groceries. Hawley confirmed yesterday its plans to demerge the Ruffler & Debit amusement machine business. Hawley shareholders will receive Ruffler shares in the form of a special dividend. Kean & Scott Half-year to 30.6.83 Pretax profit £2m (£509,000) Stated earnings 1.7p (0.4p) Turnover £23.4m (£18.4m) Net interim dividend 0.333p Share price 56p, down 2 Coleman Milne Half-year to 30.6.83 Pretax profit £186,000 (£143,000) Stated earnings 2.25p (1.77p) Turnover £2.5m (£2m) Net interim dividend 0.6p (0.5p) Share price 60p

Early 12-point rise in Dow

New York (AP-Dow Jones) - Stocks were holding their early gains yesterday but volume was moderate and further progress was proving elusive. The Dow Jones Industrial Average was up about 12 points at 1,206 - about the same gain it showed in the first half hour of trading yesterday. Advances were 2 to 1 ahead of losers. Miss Hildegard Zagorki, market strategist at Prudential-Bache Securities said: "It has been a normal reaction to the money supply with stocks following the uptick in bonds. "The problem is volume - it just isn't there. If volume and breadth improve it would help but otherwise it will indicate that the technical bounce of the past couple of weeks is over." Mr Richard McCabe, technical analyst at Merrill Lynch, said he found it hard to make the case that the oil stock rally

John Brown pays out £180,000

By Our Financial Staff Sir John Mayhew-Sanders, the former chairman of John Brown, the troubled engineering company, will receive compensation for loss of office of £180,000. Sir John Cuckney, John Brown's chairman, confirmed yesterday that he had negotiated the settlement with Sir John Mayhew-Sanders' lawyers. Sir John Mayhew-Sanders had a five-year rolling service contract which, based on his annual salary of more than £81,000, had given rise to speculation that he could receive £400,000. Such a figure, would have been a record for a "golden handshake". Sir John Mayhew-Sanders' lawyers are thought to have asked for more. Institutional shareholders furious at the prospect of John Brown paying £400,000, are still likely to question the agreed figure but will probably accept

Confusion as Brazil seeks debts deal

By Peter Wilson-Smith, Banking Correspondent The Brazilian planning minister, returned to Brazil over the weekend, after his emergency talks with M Jacques de Larosiere, managing director of the International Monetary Fund. Senator Netto also met M Michel Camdessus, chairman of the Paris Club, to request a rescheduling of Brazil's official government-guaranteed debts. The Paris Club, an ad hoc group of western creditor governments, is expected to meet later to discuss Brazil's debts. However, the British Government has yet to be formally notified of the request and there was confusion yesterday over reports that Brazil was ceasing all payments on official debts, which are estimated at \$7bn to \$8bn (£4.5bn to £5.2bn). The export Credits Guarantee Department confirmed yesterday that it had not been formally notified of Brazil's request, although there were signs that Brazil was falling behind with payments. "We are experiencing some delays and therefore we have some potential claims. But they are not massive at this stage," a spokesman for the ECGD said. The Paris Club is not expected to agree any rescheduling of official debt until Brazil has reached agreement with the International Monetary Fund on a new economic programme. However, full IMF board approval for a new economic programme which would lead to release of blocked funds is not expected until the end of next month of October. Once the IMF board gives approval, Brazil would be able to draw about \$900m of loans which have been delayed because it failed to meet IMF targets.

City Editor's Comment

Shaking off the 'hidden' handout

The big city investment institutions are becoming increasingly irritated about golden handshakes to executives who are forced out of companies after boardroom rows, takeover bids and poor results. And if the City institutions are furious, for once it can be taken as read that they fully reflect the frustrations of smaller shareholders who are in no position to vent their anger effectively. The complaint is not new. What annoys pension funds and unit trusts most is that they learn about these arrangements only when they have been activated when it is usually too late to take any effective action. There are certain limits to this argument. For instance, company prospectuses lay out significant directors' contracts and in the case of an already quoted company, they should be available for inspection at the company's annual meeting. Furthermore, service contracts lasting more than five years should be formally approved by shareholders. But there is still plenty of scope for executive directors to protect themselves. Some pension fund managers contend that the five-year rolling contract of Sir John Mayhew-Sanders, recently departed chairman and chief executive of the ailing John Brown group, is the last straw for them since it theoretically added up to some £400,000 but escaped beneath the wire of shareholder approval. Other apparently controversial recent episodes include options for directors of UBM, profitably signed a few days before a takeover bid from Norcor, and a service contract until 1986 for a director of AE, actually arranged after first news of an agreed takeover by Guest, Keen and Nettles. These latter cases, while unfortunate, are not a source for scandal. Other AE directors, for instance already had similar service contracts, and the new one is not thought to have raised any objections from GKN. In a case where post-merger rationalization is called for, the bidding company may not want to demote a competent manager from apparently making himself redundant. The John Brown case is the more pertinent one from a number of viewpoints. In practice, Sir John Mayhew-Sanders will receive only £180,000 compensation. That may be too much for many small shareholders of a company which got into deep trouble under Sir John's leadership. But, though he made expensive mistakes and argued what in the end proved an unsustainable strategy for the company, few doubt that Sir John is a manager of some class with many achievements to his name. The British tax system encourages companies to reward their executives via pension arrangements to an excessive degree and the penalties on leaving prematurely are equally steep. What is more, as Sir Michael Edwards has noted, British managers do not normally have the same ability as their counterparts in other capitalist countries to build up capital from high salaries. Clearly, a balance must be drawn between the discipline to perform and financial protection for those taking on difficult jobs. The real question is about disclosure. The schemes so far put up - for instance, for a semi-private register of service contracts - are elitist and inadequate. Much progress has been made in recent years in disclosing directors' salaries in annual accounts. This should be expanded to include pension arrangements and service contracts on the same, mostly anonymous terms. Managers should not be embarrassed by their contracts, if they are, the contracts are probably bad.

Robinow merger expected

By Vivien Goldsmith Dealings were suspended yesterday in the shares of Crosby House, the freight forwarding and container storage company, and Rightwise, a subsidiary involved in cultivation of tea, rubber and cocoa. The boards announced that they are discussing a full merger of the two companies. Crosby House, which is controlled by the Robinow family's International Investment Trust Company of Jersey, holds 51.36 per cent of Rightwise. Dealings in Sampang (Java) Rubber, another Crosby House subsidiary, were also suspended. By injecting its Jersey Holdings into Crosby the Robinow family - largely Mr Hermann Robinow, a director of N M Rothschild, and his son, Mr Richard Robinow - gained control of the company.

Taking off: the Boeing and Airbus Industrie contenders for the JAL contract

Planemakers look East for key deal

By John Lawless The three planemakers locked in battle to sell British Airways £250m worth of aircraft to replace its Trident fleet watch in fascinating detail as Japan Airlines (JAL) begins the same decision-making process. As in BA's case, JAL will announce its decision this autumn, with the short-range jets due in service by 1985. The technical side of the talks has been exhausted. Boeing demonstrated the 767's already well-known capabilities in Tokyo in February. The A310 Airbus followed it in March. McDonnell Douglas has only been able to fly a "paper plane", because it is offering the MD100, effectively the replacement of the ill-fated DC10, which it scrapped last month. The MD100 is still at the design stage. Surprisingly, the three-year-old negotiations have received one of the coverage given to the bidding for BA's business. The reason is simple. JAL has seen how an impending decision by a Japanese multinational company nowadays has a riveting effect on foreign audiences (as in the case of Nissan and its location for a European car plant). In other words, the world's largest owner of Boeing 747s, pointed out: "Once we are in with an aircraft, we want to be able to stay in for a long time." The only "gimmie" as to the value of any initial contract came in one of the few Japanese newspaper stories on the subject about £270m. The difference between JAL and BA, though, is that the Japanese will not be leasing their new planes - although a purchase may have made it easier for them to squeeze aircraft manufacturers, desperate for orders. I would be a big coup if Airbus Industrie - in which Britain has a 20 per cent wing-making stake via British Aerospace - was to outbid McDonnell Douglas for the JAL fleet. capacity of 200 to 250, and fuel-efficiency of at least 6 to 8 per cent better than the DC8s - was one that any aircraft must have "the potential for future technical developments". In other words, the world's largest owner of Boeing 747s, pointed out: "Once we are in with an aircraft, we want to be able to stay in for a long time." The only "gimmie" as to the value of any initial contract came in one of the few Japanese newspaper stories on the subject about £270m. GE buys aviation stake

By Our Banking Correspondent General Electric of the United States has taken a 22.7 per cent stake in Guinness Peat Aviation (GPA), the aircraft leasing business, with an \$18m (£11.8m) capital injection. GPA is an associate of Guinness Peat, the banking and formerly commodities group. The capital injection is important for Guinness Peat because it will allow it to revalue substantially its stake in GPA. The stake was valued at £1.1m in the accounts of April 30, 1982, but revalued to £6.6m in October, 1982. After the capital injection, Guinness Peat and the other big shareholders, Aer Lingus and Air Canada, will hold 22.7 per cent each. Guinness Peat will therefore be able to nearly double the value at which it carries its GPA stake in the balance sheet. GPA is expected to gain a quotation and it is thought this would place a higher value on it than the \$79m imputed by the General Electric deal. It made profits of \$9.1m (£6.2m) last year. Guinness Peat, which last month announced a return to a small profit in its latest half-year to April 30, has been working hard to reduce borrowings. It recently sold a Loodoo property for £3.5m.

ISSUES OF GOVERNMENT STOCK

Table with columns: Stock, Redemption date, Interest payment dates. Includes Treasury 12 per cent 1995, Treasury 11 1/2 per cent 2003-2007, etc.

Privatization - 1: Jonathan Davis on the prospects and problems
Turning the big guns on the state frontier

In the first four years of Mrs Thatcher's Government, privatization and public sector asset sales raised £2bn for the Treasury. In the next five years, the total could be as much as £10bn, if all goes according to the Government's plan.

Lawson stepping up the tempo

The new company will be vying with BP for the title of Britain's largest single quoted company. It is clear that the Government's privatization programme is now entering a more ambitious phase, both in scale and scope.

Not only are the sums involved becoming larger, but the tentacles of privatization are now spreading for the first time into the "heartland" industries that were the original target of Mrs Thatcher's pledge to "roll back the frontiers of the state".

The Conservative Party manifesto at the last election talked of the Government's intention to sell all or part of British Telecom, British Airways, Rolls-Royce, British Steel, British Shipbuilders, BL and the British Airports Authority.

In terms of assets, numbers employed and strategic influence, these candidates for sell-off dwarf most of those that have gone before.

The Government is also increasing its introduction of private capital into the National Gas Company, disposal of the North Sea oil assets of British Gas (and possibly later privatize the corporation as a whole); sell off the Royal Ordnance factories and complete the disposal of British Rail's hovercraft and Sealink offshoots.

The electricity supply industry is also coming under scrutiny: the chairman of both the Electricity Council and the Central Electricity Generating Board have been told by the Government to investigate ways of introducing private capital into their operations.

It is no secret that the Prime Minister and her hardline Cabinet supporters were disappointed with the slow progress that was made in her first term with both the self-off programme and the introduction of competitive and market disciplines into the hard core industries such as coal, rail and electricity.

Mrs Thatcher and Mr Nigel Lawson, the Chancellor, have made it clear that they want the tempo and range of privatization to be stepped up. This decision was motivated by the Government's well-publicized concern at the need to find ways of mitigating the long-term rise in public spending forecast by both the Treasury and the now disbanded Think Tank.

The package has been coolly received in the City and was not widely popular with many of Mr Lawson's Cabinet colleagues, who resented the maladroit manner in which it was presented.

Nevertheless, the Treasury is pressing ahead with new higher forecasts of the sums to be raised by selling state assets. An ambitious junior Treasury minister, Mr John Moore, has been put in charge of coordinating the privatization proposals put forward by sponsoring departments - which in practice means primarily Transport, Energy and Trade and Industry.

The White Paper on public spending, published at Budget-time envisaged special sales of assets raising £750m this financial year, £1.5bn next year, and £500m the year after. Apart from this year's revised target of £1.25bn, no other official figures have been given.

But with the British Telecom sale alone expected to raise £4bn (albeit almost certainly spread over three years), the White Paper numbers are clearly too conservative.

Of the other immediate candidates for privatization, British Airways and the oil assets of British Gas, also involve substantial sums.

One main constraint on a faster programme, already existing - Mr Lawson, is the amount of new equity share capital the stock market can absorb. With shares at a record and £2bn of new equity capital already raised in the first seven months of the year, market conditions are about as buoyant as they could be.

Most analysts are confident that the market will be able to absorb the British Telecom and other issues now planned, especially if the sums raised are reinvested in the expected sales of gilts and the big institutions tire of their spurge of investment abroad.

Nevertheless, with total institutional purchases of equities now running at £4bn, there is a limit to how many share issues the Government can expect to pass off, especially if it wants to avoid knocking share prices as a whole and crowding out private companies that want to raise funds.

This is one reason why ministers continue to explore alternative methods of privatization, including joint ventures (the favoured solution of the steel industry, for example) and direct sales of businesses to private sector companies - as may happen with the oil assets of British Gas and the profitable warship yards in British Shipbuilders.

Mr Fulham's future could be in doubt if a scheme to build a multi-million pound shipyard is not approved, the club's financial director, Brian Dalton, said yesterday.

The debts are getting worse and we must find a way of paying them, he said.

Private developers want to build the stand and up to 50 luxury flats at the Cottage, end of the ground. Before building can start permission has to be granted by the City Commissioners, who own the ground, Hamamstead Council and the Greater London Council.

Mr Luton Town sold their defender, Richard Money, to Portsmouth for £55,000 yesterday.

Table with 3 columns: Residual share holding, Market value. Includes entries for Britoil (48%, £900m), Cable and Wireless (45%, £700m), Associated British Ports (48%, £35m), British Aerospace (46%, £175m), British Petroleum (39%, £2,120m).

Table with 3 columns: Year, Proceeds. Includes entries for 1978/80 (£990m), 1980/81 (£356m), 1981/82 (£79m), 1982/83 (£503m), 1983/84 (£1,250m target).

Government to finance tax cuts by asset sales of £10bn over five years, believes that there are now sufficient projects, either in hand or close to completion, to meet their demands.

Whether this sort of programme amounts to the fundamental shift in the balance of power between the public and private sectors which Government rhetoric promises remains to be seen.

The last four years' experience suggests that the legal, technical and political obstacles that lie between a manifesto promise and its realization are formidable.

Ministers and officials are all too aware that so far they have succeeded in bringing only the relatively "easy" candidates into the private sector: Cable & Wireless, Amersham, British Aerospace, Associated British Ports and even Britoil were all companies that were (to varying degrees) well-run, competitive, profitable and attractive to investors.

BP, of course, has operated as a wholly independent commercial company since the Government first took a majority shareholding in 1914.

The future candidates pose far more problems, either because they have a poor commercial record (like BL, British Shipbuilders and until recently British Airways), or because (like British Rail, the electricity industry and British Telecom) their businesses have a monopoly or non-commercial nature.

Asset sales have been likened to 'selling the family silver'

British Airways will now be ready for privatization by the end of next year, according to Lord King, its chairman.

Depending on the way the Government decides to handle its outstanding debts and pension fund liabilities, the corporation restores to profitability this year - could be valued by the market at anything between £500m and £1bn.

It is likely, however, that the sale will be delayed until the 1985-86 financial year, considering the competition of market funds from the Telecom issue.

The British Gas oilfields disposal was originally scheduled for the end of this financial year, but may now be delayed until next year. The Government has still to decide whether to float the assets as a separate company, or sell them piecemeal to other oil companies. They could fetch between £300m and £500m.

David Miller's diary: a sporting scribe at large in a less than sporting world
Too many skeletons spoil the feast

Friday
A quick phone call to MY Kallima in Newport, RI, to wish Peter de Savary good luck in securing the last semi-final round-robin victory required to guarantee a final head-to-head series against Australia II to decide the America's Cup challenger. As always, he sounds about 15 feet off the ground, supercharged with enthusiasm for his multimillion-pound adventure with Victory '83.

It will be sensational if Victory '83 can defeat the Australians in the best-of-seven starting this weekend, for whichever boat wins must then have an even chance of defeating the defender selected by the seven-day sportsman-like and discredited New York Yacht Club.

Saturday 1.0
Why is it that Crystal Palace seldom generates atmosphere at afternoon athletics meetings but comes alive at night? too much a recreation centre, too little a stadium? One yearns for the old

White City of Kite and Chattaway. The timing of the European Cup final, one week after the summit meeting in Helsinki, is unfortunate for the British Amateur Athletic Board, though unconsciously wonders to what the "amateur" in the title refers.

Saturday 4.0
Wembley stadium, of course, is still owned by anonymous British Electrical Traction, much to the chagrin of the FA, who, in spite of flogging inflationary-priced England shirts to impecunious schoolboys, still cannot afford their own stadium, not that, though at the moment rate they should not look on that.

Arriving in time for the second half of the Charity Shield, with 92,000 heaving in the sunshine, one is confronted by the elegance and kaleidoscopic patterns which so much of soccer has now forfeited: a delightful player nowadays almost crashed out of existence and the obligations of a Manchester United disband the league champions, Liverpool, and give Joe Fagan premonitions of a long hard winter. Wilkins, and the galloping Graham, excite the 45,000 "live"

United fans, yet the authorities blind to the fate of the High Street Odéon, have sold out to television. Are FIFA and the FA really going to let the beauty of the game sink beneath all the fouling and finance?

Saturday 8.00
Dinner with two South Africans, an African and a Jew of English descent, who are two of those who passionately believe in the liberalization of their country's racial discrimination, and work diligently to that end - with some success at home but little so far in the international arena. The African relates with a smile how, on a trip with a four-man multiracial South African delegation he chose to room with the black man because he was the one who did not snore. The Jew spends much of his own money on underprivileged black sportsmen. There are white South Africans who care and understand.

Sunday 1.00
Back to Crystal Palace, to watch the splendid Peter Elliott putting on another gutsy show in the 800 metres only to have to be satisfied with third place on the run-in. One of these days this fine young runner is going to hold on to his lead for a result to surprise them all; meanwhile he will be promoter-fodder for record bids.

Sunday 4.0
There can be few things better in life than to have 20,000 people slip along to a private party to say "thanks for the memory". White Hart Lane has a fine turnout of those seeking nostalgia at Bill Nicholson's testimonial at which the old stagers from the sixties,

by all accounts, have put on as good a show as, if not better than, the present-day squads of Spurs and West Ham around glowing club-steepled crowd.

Monday
Breakfast with Freddie Williams, a black South African whose best performance would have won him a gold medal in Helsinki and may yet get him a medal in Los Angeles should he seek to obtain dual nationality in Swaziland. He is accompanied by the white coach, of Scottish descent, of another black runner, Matthews Tsemah, who, with the right sort of competition over the next four years, could well threaten Dave Moorcroft's 5,000 metres world record.

If nothing else, his times will be recorded officially by the association of international track statisticians, who refuse to be intimidated by the IAAF and faithfully record the achievements of all South Africans of whatever hue. They were included in the Helsinki programme.

Black South African athletes, though except their race among the more fortunate of their racial group, are nevertheless baffled when they sit in the stands in Helsinki and watch the march-past of countries such as Palestine and Sri Lanka. It is, indeed, a confused world.

YACHTING

Victory sails into the final trials

By Barry Pickthall
The Peter de Savary-backed Victory '83 made certain of her place in the final trials to select the challenger for the America's Cup by scoring a convincing win over Canada I on Sunday.

Table with 3 columns: Team, W, L, T. Includes entries for Australia II (7-0), Victory '83 (7-0), Canada I (0-7).

IN BRIEF

Record for Carey again

Carey (Reiter) - Rick Carey, of the United States, set a world record for the 100 metres backstroke for the third time in just over two weeks when he won in 55.19 seconds at the Pan-American Games yesterday.

Football

Ardiles out for month

Oswaldo Ardiles, Tottenham Hotspur's Argentine midfielder, will miss the first month of the season with an injury suffered in a testimonial match for the club's former manager, Bill Nicholson, on Sunday.

FOR THE RECORD

Table with multiple columns listing sports results: American League (Boston Red Sox vs New York Yankees), National League (St. Louis Cardinals vs Philadelphia Phillies), Hockey (Chicago White Sox vs Toronto Maple Leafs), Baseball (Boston Red Sox vs New York Yankees), Soccer (Liverpool vs Arsenal), Football (Manchester United vs Liverpool), Basketball (Boston Celtics vs Los Angeles Lakers), Tennis (John McEnroe vs Mats Wilander), Swimming (Mats Wilander), Yachting (Victory '83 vs Canada I), Athletics (Rick Carey), and various international fixtures.

TENNIS

Return to sender: Miss Navratilova beating Mrs Lloyd

Miss Navratilova, the 1981 Wimbledon champion, returned to the court yesterday to beat Mrs Lloyd in the first round of the Wimbledon women's singles.

Birthday present in the shape of McEnroe

Mats Wilander's 6-4, 6-3 victory over the top-seeded John McEnroe in the Association of Tennis Professionals championship at Mason, Ohio, on Sunday has pushed the 19-year-old Swede to top place in the grand prix points positions. Ivan Lendl of Czechoslovakia, whom Wilander beat in the semi-finals, is in second place.

BASEBALL

Chicago White Sox

Table with 3 columns: Team, W, L. Includes entries for Chicago White Sox (8-0), Toronto Maple Leafs (8-0), Boston Red Sox (8-0), Philadelphia Phillies (8-0).

HOCKEY

Chicago White Sox

Table with 3 columns: Team, W, L. Includes entries for Chicago White Sox (8-0), Toronto Maple Leafs (8-0), Boston Red Sox (8-0), Philadelphia Phillies (8-0).

ATHLETICS

Chicago White Sox

Table with 3 columns: Team, W, L. Includes entries for Chicago White Sox (8-0), Toronto Maple Leafs (8-0), Boston Red Sox (8-0), Philadelphia Phillies (8-0).

YACHTING

Chicago White Sox

Table with 3 columns: Team, W, L. Includes entries for Chicago White Sox (8-0), Toronto Maple Leafs (8-0), Boston Red Sox (8-0), Philadelphia Phillies (8-0).

SOFTBALL

Table with 3 columns: Team, W, L. Includes entries for Chicago White Sox (8-0), Toronto Maple Leafs (8-0), Boston Red Sox (8-0), Philadelphia Phillies (8-0).

CYCLING

Doyle back on the right track

By John Wilcockson
The first 14 finals in the 1983 world track championships takes place tonight at Zurich. There is no British representative in the one kilometre time-trial, which opens the programme.

Schmidke, of West Germany, will defend the title he won at Leicester last year, and there will be considerable support for him from the Swiss crowd against his main rivals who are all Eastern European. The favourite is the former champion Thomas of East Germany, and his countryman, Malchow. The other favourite rider is the young Soviet, Fyodorov. A time around 1min 55sec should win the kilometre on the 353.3 metres concrete track in Oerlikon, which has recently been resurfaced.

Three British riders compete in the amateur men's sprint championship which comes to its climax on Thursday night. Mark Barry, the national champion, aged 19, reached the eighth finals in 1982. He is aiming higher this year.

The surprise of this tournament could be Mark Gouski, the American champion. This season, Gouski has beaten the world champion, Kopylov, of the Soviet Union.

Britain has greater hopes of medals in the professional keirin and the amateur 4,000 metres pursuit, the finals of which take place tomorrow. Terry Tinsley, to his first professional season, won three national titles earlier this month, including the keirin and is therefore one of our best prospects.

In the pursuit, another triple British champion, Shaun Wallace, needs a further upgrade of a fast qualifying time, perhaps under 4min 50sec, if he is to make progress tomorrow.

To the 5,000 metres professional pursuit, the first 60 Friday, two British riders have hopes of success. The former world champion, Tooy Doyle, seems to have recovered from being beaten by Scott Yates in the recent national championship. Yates, in contrast, is not fully fit after suffering from a virus.

PROGRAMME: Today: Amateur men's keirin; Tomorrow: Professional keirin and amateur pursuit; Thursday: Amateur sprint and professional pursuit; Friday: Amateur men's and women's sprint and professional sprint and professional motorcade.

TODAY'S FIXTURES

Table listing today's fixtures: Cricket (County championship), Football (7.30 unless stated), Hockey (Kuala Lumpur), Swimming (100m backstroke), Athletics (100m sprint), Yachting (Victory '83 vs Canada I), Softball (Chicago White Sox vs Toronto Maple Leafs).

CRICKET

County championship (11.0 to 5.30 or 8.0)

SWALES: Glamorgan v Derbyshire. POLKINGTON: Kent v Warwickshire. LORDS: Middlesex v Somerset.

FOOTBALL

7.30 unless stated

COVENTRY: QPR vs Reading. BIRMINGHAM: Middlesbrough vs Coventry. LEEDS: Leeds vs Tottenham. NEWCASTLE: Newcastle vs Ipswich. SHEFFIELD: Sheffield Wednesday vs Sheffield United. SOUTHAMPTON: Southampton vs Burnley. WOLVES: Wolves vs Notts County.

BASEBALL

Chicago White Sox

Table with 3 columns: Team, W, L. Includes entries for Chicago White Sox (8-0), Toronto Maple Leafs (8-0), Boston Red Sox (8-0), Philadelphia Phillies (8-0).

HOCKEY

Chicago White Sox

Table with 3 columns: Team, W, L. Includes entries for Chicago White Sox (8-0), Toronto Maple Leafs (8-0), Boston Red Sox (8-0), Philadelphia Phillies (8-0).

ATHLETICS

Chicago White Sox

Table with 3 columns: Team, W, L. Includes entries for Chicago White Sox (8-0), Toronto Maple Leafs (8-0), Boston Red Sox (8-0), Philadelphia Phillies (8-0).

YACHTING

Chicago White Sox

Table with 3 columns: Team, W, L. Includes entries for Chicago White Sox (8-0), Toronto Maple Leafs (8-0), Boston Red Sox (8-0), Philadelphia Phillies (8-0).

SOFTBALL

Table with 3 columns: Team, W, L. Includes entries for Chicago White Sox (8-0), Toronto Maple Leafs (8-0), Boston Red Sox (8-0), Philadelphia Phillies (8-0).

County Bank names chairman

County Bank: Mr John Padovan has been appointed chairman from January 1. Mr John Leighton-Boyce will retire as chairman at the end of the year but will remain on the board. Mr Padovan will be the first executive chairman of the bank. Sir Charles Villiers will be made chief executive and Mr Jonathan Cohen deputy chief executive on January 1.

APPOINTMENTS

Uniflex Holdings: Mr Malcolm Meredith has become a director. Mr Maurice D. Lazarus has resigned as a director and company secretary and Mr Clifford Shelton has been appointed company secretary.

APPOINTMENTS

Gestetner: Mr Cyril Green has been appointed managing director of Gestetner Manufacturing Limited. Garnar Booth: Mr J.A. Fooks and Mr T. I. L. Burns are now joint managing directors.

APPOINTMENTS

Gulfair Insurance Co: Mr E. J. Turner, who retires as managing director and manager, reinsurance department, is succeeded from September 1 by Mr J. H. Bishop.

APPOINTMENTS

Scandinavisk Bank: Mr Christopher Hammond has been appointed executive director in charge of the new banking division.

APPOINTMENTS

CPC (United Kingdom): Mr Antony Roulif has joined the company as a divisional director.

CRICKET: FLOOD COULD SEND SOMERSET TO A STICKY END

Injury problem for Middlesex but thunderstorm brings ray of hope

By John Woodcock, Cricket Correspondent

LORDS: Somerset, with nine second-innings wickets in hand, are 79 runs ahead of Middlesex. A torrential thunderstorm flooded the pitch...

Yesterday, at the end of a good morning's cricket, Middlesex were 238 for nine, having started at 106 for four...

thunder and lightning. The real time came after he had been in for 20 minutes. Somerset: First innings 249 (Embury 5 for 151, 6-102, 7-101, 8-102, 9-102, 10-102, 11-102, 12-102, 13-102, 14-102, 15-102, 16-102, 17-102, 18-102, 19-102, 20-102, 21-102, 22-102, 23-102, 24-102, # Mile race offers cream of Ovet

From Pat Butcher, Oslo

The organizers offered the traditional fireworks and cream in the sunshine to the athletes here yesterday as a prelude to extracting the traditional blood and sweat from them in tonight's competition. Steve Ovet and Jerome Kozlov, both world champions, and Steve Ovet and Peter Elliott, both fourth placers in Helsinki, come seeking different fortunes in the famous Bladet Stadium. Yet their fortunes, theoretically, do not include money, for this is a B meeting, which does not have a permit to pay participants money to athletes under the IAAF trust fund system.

There is a splendid mile race in prospect between Ovet, Sydney Marco and Jose-Luis Gonzalez. Ovet has admitted that his world championship 1,500 metre final was the worst race he has ever run. But Marco is a specialist and has not reached the final.

Ovet, of course, is far from finished, and he sees the Helsinki setback as a good reason for all three of them to run a fast race. Ovet will run a fast race under 3min 50sec, as should Marco and Gonzalez. But Sebastian Coe's world record of 3:47.33 is not an easy one to beat. It is intrinsically better than Ovet's 3:50 metres world record, and two if not all three of the runners would still have to be in contention in the last 200 metres if it is to be a one.

Miss Krause may be the best bet for a world record in the 800 metres. Helped by a pacemaker, she could go through 400 metres in close to 50 seconds; she could then be capable of a time around 1:57.4, which would be well inside the current world record of 1:53.24. With times like those in the offing, the only way the British quartet of Shirley Bailey, Anne Furness, Loraine Baker and Irene French could beat her would be to run as a 4 x 200 metres relay squad, and even then you would have to give the Czech an even chance.

Steve Ovet and Peter Elliott meet in the 800 metres. There is no one else in the field capable of staying with the two Britons, and the interest will be in just how fast they can run. Coe's world record at this distance, 1:44.73, is far more remote than his mile world record. Elliott will be left with further thoughts on how to avoid being caught in the finishing straight.

# Runners to pay more

The Amateur Athletic Association have launched their new registration scheme which is to become compulsory for distance road runners by October next year. Mike Gratton, the London Marathon champion, yesterday became the first man to sign on while Steve Ovet has been allocated No 1 in recognition of his help in forming the scheme.

From October this year, the £2.30 registration will be voluntary but in the second year, subject to approval, it will be mandatory for all competitors in road races of 10 kilometres or more. In the third year the AAA are hoping to extend the scheme to track and field.

Five leading British marathons have agreed to accept only registered athletes in 1984 but London, which yesterday announced a new £10,000 sponsorship by Mars Confectionery, is not among them. London has set a record capacity of 20,000 for its race on May 13 next year.

# RACING: DUBAI CONNEXION WITH GOLDEN NEWS FOR BRITISH BLOODSTOCK

## The Classic pipeline is opened

By Michael Seely

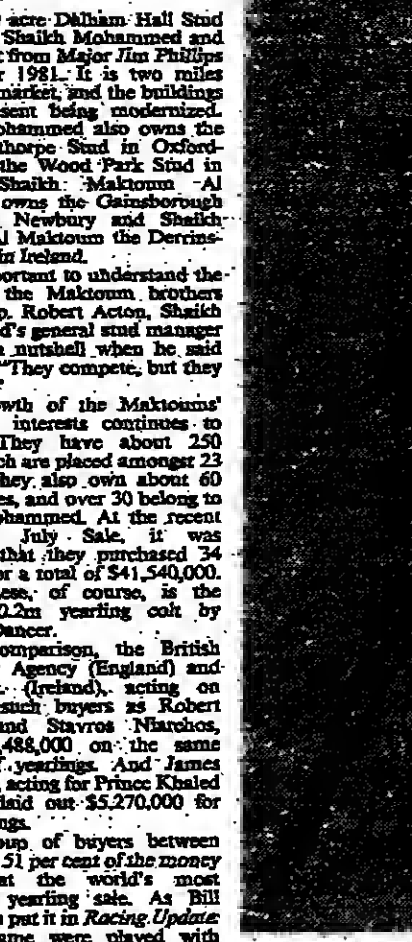

Sharief Dancer, owned by Shaikh Maktoum Al Maktoum, is to be studied probably for a world record price of more than \$2m and will stand at the Dalham Hall Newmarket Stud, near Newmarket, Cambridgeshire. Shaikh Maktoum also owns the Aston Upthorpe Stud in Oxfordshire and the Wood Park Stud in Ireland. Shaikh Maktoum Al Maktoum owns the Gainsborough Stud near Newbury and Shaikh Hamdan Al Maktoum the Derriestown Stud in Ireland.

It is important to understand the nature of the Maktoum, brotherly relationship. Robert Acton, Shaikh Mohammed's general manager put it in a nutshell when he said yesterday: "They compete, but they also share."

The growth of the Maktoums' bloodstock interests continues to increase. They have about 250 horses which are placed among 23 trainers. They also own about 60 brood mares, and over 20 belong to Shaikh Mohammed. At the recent yearling sale, they purchased 34 yearlings for a total of \$41,540,000. Among these, of course, is the record \$10.2m yearling colt by Northern Dancer.

As a comparison, the British Bloodstock Agency (England) and the B.B.A. (Ireland), acting on behalf of such buyers as Robert Kitchener and Stavros Niarchos, spent \$28,484,000 on the same number of yearlings. And James Delahouke, acting for Prince Khalid Abdullah, laid out \$5,720,000 for eight yearlings.

This group of buyers between them spent 51 per cent of the money invested at the world's most significant yearling market. It is a record. It is in *Racing Update* that this group was played with Monopoly money, this lot would own half the world.

Sharief Dancer - stepping out on a glittering road

Dubai is 3,500 square kilometres, and is the second largest country in the United Arab Emirates, after Abu Dhabi. It has been the main trading centre of the area for 2,000 years, trading principally in gold. It is ruled by the Maktoum, who can say that the bold Shaikh is wrong about the fabulous Northern Dancer blood?

Shaikh Mohammed is a bearded, athletic figure aged about 35. He is an expert rider, who stood bareback on a horse and camel in turn, as they galloped past the guests at his wedding feast. He flies his own Boeing 727. He is a crack rifle shot and likes all forms of hunting. Under pressure, he admits to writing poetry. He is also obviously a private and reserved man, with a keen sense of humour.

Recently I saw Shaikh Mohammed at Dalham Hall. It was an honour to see the Shaikh coast on holiday, and get an interview by chance, thanks to my adviser, John Lea. I must have cut a ludicrous figure to a shirt and jeans, with two whiskers sprouting on the roof of my Times Escort. It was lunchtime when I called so I had to wait. I gazed up at the great Cambridge elite, and had some immediate arrogant and worthy thoughts. And I was wrong.

Today's television and radio programmes

Edited by Peter Dear

BBC 1

- 6.00 Coaxial AM, News headlines, weather, traffic and sports news.
6.30 Breakfast Time presented by Frank Bough and Sue Cook. News from Debbie Rix at 6.30, 7.00, 7.30, 8.00 and 8.30 with highlights in the quarter hours; regional news, weather and traffic at 6.45, 7.15, 7.45 and 8.15; soap film between 8.45 and 9.05; today's television preview between 7.15 and 7.30; a review of the morning papers at 8.35 and 8.55 and horoscopes between 8.50 and 9.05.
9.00 Champion the Wonder Horse: The super steed and his owner, Ricky, fled an injured escapee prisoner. Should they escape whereabouts to the desert? A documentary. Rodney Bewes reads part two of Jeffery, the Burglar's Cat, by Ursula Moray Williams (r). 9.40 With the Wind and the Flight of the Hawk, with the voices of Kenneth Williams (r). 9.45 Take Hart with Tony Hart and his little pet, Morph (r). 10.15 Clossowood.
1.00 News After Noon with Richard Whitmore and Vivian Craig. The weather details come from Michael Fish. 1.27 Regional news (London and SE only). Friday's programme followed by news headlines with subtitles. 1.30 Bond on the Beach (r).
1.45 Film: The Reluctant Astronaut (1987) starring Don Knotts. Fairground attendant without a head for heights is catapulted into an astronaut's training. Directed by Edward J. Montagna, former producer of the excellent Bilko comedies.
3.15 Take Another Look. Meats with a difference are digested this afternoon with a look at how nature has devised different ways of acquiring food. (r). 3.35 Song of Praise from Caribou Castle on the Isle of Wight (shown on Sunday). 4.18 Regional news (North London).
4.20 The Blood. Shown earlier on BBC 2. A battle of the Planets (r). 5.05 John Craven's Newsround. 5.10 Animal Magic in Hong Kong (r).
5.40 News with Moira Stuart. 6.00 South East at Six.
6.25 Doctor Who. Peter Davison in part of the serial, The World of Illusion. The Vanishing Jungle. A documentary about a forest jungle in Costa Rica, one of the many that are threatened by man. Remarkable photography reveals, among other wonders, the coloured poisonous frog and the Quetzal, a sacred bird of the Aztecs, once thought to be extinct.
7.20 That's Life presented by Esther Rantzen. A compilation edition of the consumer affairs programme featuring the most requested items from the last series.
8.10 The Freddie Starr Showcases. The last in the series featuring Freddie Starr. Among the new guests appearing are Chopper Harris and the Jodelles.
9.05 News with John Humphrys.
9.20 Film: Permission to Kill (1975) starring Dirk Bogarde and Ava Gardner. The first showing on British television of this suspense thriller, set in Austria, about a British agent commissioned to eliminate an East European liberation leader before he returns to the country following a period of Franco. Directed by Cyril Frankson and Brian Koppelemans.
10.58 News headlines.
11.00 Flamingo Road. Constance starts yet another affair, this time with Michael Tyrone.
11.50 Weather.

TV-am

- 6.25 Good Morning Britain presented by Nick Owen and Anne Diamond. News from Garry Scott at 6.30, 7.00, 7.30, 8.00 and 8.30; the twilight world of medicine examined at 8.30 and 8.45; sport at 8.45 and 9.00; Chris Tarrant in the Isle of Wight from 8.55; audio; the Moody Blues from 7.00; pop news with Timmy Mallett and Pussycat Flowers; Hollyday at 7.50; pop video at 7.55; a preview of the day's television at 8.35; e-mails with Mad Lizzie at 8.55; and, from 9.00, Lizzy and Lizzy in Newsweek.

10.00 News followed by Thames news headlines.
10.30 Pm Gaynor - Pm Me. A documentary about a 30-year old woman whose face was virtually burnt away following a domestic accident 23 years ago (see Choice).
11.30 News and Britain. The detective brothers become involved in a sisket forgery outfit.
12.25 Night Thoughts from Quaker. Harvey Gillman.

CHOICE

Derek Fowlds in Affairs of the Heart (TV 8.30 pm)

CHOICE

Derek Fowlds as Peter Bonamy, the unfortunate man whose over-protective wife and over-zealous friends turn his period of convalescence into a nightmare.
Corsetta-born playwright Tony Fisher uses his knowledge of the area and its people for his BEFORE I AM OLD (Radio 4 3.00 pm). Set in the 1950s, the play concerns a young English writer who goes to live with a Gaelic-speaking fishing and farming community, untouched by such modern trappings as electricity or the telephone. The young man's attachment to one of the local girls soon brings him into conflict with the rest of the villagers and it is this animosity that brings a rather sad edge to the sentimental story. Anton Lesser stars as the young man, Neil, with Marcella O'Riordan as Mary, the object of his affections.

CHOICE

time privately. From this point the programme follows the progress of Gaynor, who was eventually again treated on the National Health, from the Harley Street examinations to the skin-grafting operations at a Biliary hospital. The physical transformation, although not striking, is noticeable. What is clearly evident is the vestly improved demeanour of Gaynor who, at the start of her latest treatment, was introverted and apathetic but is now confident, with a mind of her own.
Actor Paul Daneman has turned his talents to writing and the result is a clever comedy about the untimely business of recovering from a heart attack. AFFAIRS OF THE HEART (TV 8.30 pm) stars

- 6.05 Open University Museum of Modern Art, NY (ends at 6.30) 5.58 Biology: Form and Function. 7.20 From Snowdon to the Sea. 7.45 Titan: Three Paintings. Clossowood at 8.15.
10.30 Play School. For the under fives, presented by Shneelagh Gilbey and Patrick Abernethy. The story is the traditional King's Handkerchief, read by Brian Cant (r). 10.55 Clossowood.
5.10 A Second Chance. An Open University production in which a former student explains how identity changes in adult life.
5.40 Elephant Man. From the Kelvin Hall, Glasgow, Bobby Robert Jr demonstrates his skill as an elephant trainer (r).
6.20 Wildcat. The seventh of ten films in which Magnus Magnusson traces the history of the Nordic race. Today he is in Iceland, the clearest and most reliable source of all Viking history, to chronicle the creation of this quintessential Viking nation (r).
6.50 Pop Carnival. The first of a series of pop-art pop concerts recorded at Sefton Park, Liverpool, and introduced by Janice Long. Tonight's concert features Big Country.
7.20 Open Space: A Day Off the Bus. A documentary that follows drivers and clerks from Putney Bus Garage as they, with their families, take a day trip to Britain's largest pleasure park, Afon Towers in Staffordshire.
7.50 News summary with subtitles.
7.55 Carmo. A delightful short from the BBC East, which explores the magic of a Berkshire trout stream in Spring. The narrator is Douglas Leach.
8.05 Arthur Negus Enjoys. In the fifth of his seven-part series Mr Negus visits Stanway House, a Cotswold stately home in Gloucestershire, the home of a collector and historian Lord Nepean. Accompanying Mr Negus is Hugo Morley-Fletcher and together they examine the house's wonderful collection of porcelain.
8.30 Scraples. The final episode and Billy, exhausted after the opening of her new boutique, repairs to the South of France where she meets an ambitious film producer, Vito Orsini (r).
10.00 Top Crown. The sentimental of the BBC 2 Invitation Party Crown Green Bowling Tournament. The holders, Alan Thompson and Bob Hitchen play Brian Porter and Jack Bachman. Introduced by Richard Duckenfield from the Westfield Hotel, Blackpool, with commentary by Harry Rigby.
10.50 Eastern Eye. The last programme in the series looks back at the best and the worst of the present run.
11.45 Clossowood.
